Certification Information API Documentation

Overview

This API allows authorized vendors and clients to retrieve certification information from our database. The API provides secure access to certification details, status, expiration dates, and related information.

Base URL

```
https://api.example.com/v1
```

Authentication

All API requests require authentication using an API key. Include your API key in the request header:

```
Authorization: Bearer YOUR_API_KEY
```

To obtain an API key, please contact our support team at api-support@example.com.

Rate Limiting

Requests are limited to 100 requests per minute per API key. If you exceed this limit, you'll receive a 429 Too Many Requests response.

Endpoints

Get All Certifications

Retrieves a list of all certifications for a specific vendor or client.

Endpoint: `GET /certifications`

Query Parameters:

Parameter	Type	Required	Description
vendor_id	string	No	Filter certifications by vendor ID
client_id	string	No	Filter certifications by client ID
status	string	No	Filter by certification status (active, expired, pending, revoked)
page	integer	No	Page number for pagination (default: 1)
limit	integer	No	Number of results per page (default: 20, max: 100)

Example Request:

```
GET https://api.example.com/v1/certifications?vendor_id=V12345&status=active
Authorization: Bearer YOUR_API_KEY
```

Example Response:

```
json
```

```
{
  "status": "success",
  "data": {
    "total": 42,
    "page": 1,
    "limit": 20,
    "certifications": [
      {
        "certification_id": "CERT-001",
        "name": "ISO 27001",
        "holder_name": "Example Vendor Inc.",
        "holder_id": "V12345",
        "issue_date": "2023-06-15",
        "expiration_date": "2026-06-14",
        "status": "active",
        "issuing_authority": "International Organization for Standardization",
        "certification_type": "Information Security",
        "last_updated": "2023-06-15T14:30:45Z"
      },
      // Additional certifications...
    ]
  }
}
```

Get Certification Details

Retrieves detailed information about a specific certification.

Endpoint: `GET /certifications/{certification_id}`

Path Parameters:

Parameter	Type	Required	Description
certification_id	string	Yes	Unique identifier of the certification

Example Request:

```
GET https://api.example.com/v1/certifications/CERT-001
Authorization: Bearer YOUR_API_KEY
```

Example Response:

```
json
```

```
{
  "status": "success",
  "data": {
    "certification_id": "CERT-001",
    "name": "ISO 27001",
    "description": "Certification for Information Security Management Systems",
    "holder_name": "Example Vendor Inc.",
    "holder_id": "V12345",
    "holder_type": "vendor",
    "issue_date": "2023-06-15",
    "expiration_date": "2026-06-14",
    "status": "active",
    "issuing_authority": "International Organization for Standardization",
    "certification_type": "Information Security",
    "scope": "All internal information systems and cloud services",
    "standards_version": "ISO/IEC 27001:2013",
    "audit_information": {
      "last_audit_date": "2023-05-20",
      "next_audit_date": "2024-05-20",
      "audit_firm": "Security Auditors LLC"
    },
    "documents": [
      {
        "document_id": "DOC-001",
        "name": "ISO 27001 Certificate",
        "type": "certificate",
        "url": "https://api.example.com/v1/documents/DOC-001",
        "date_added": "2023-06-15T14:30:45Z"
      }
    ],
    "last_updated": "2023-06-15T14:30:45Z"
  }
}
```

Search Certifications

Allows searching for certifications using various criteria.

Endpoint: `GET /certifications/search`

Query Parameters:

Parameter	Type	Required	Description
query	string	Yes	Search term
certification_type	string	No	Filter by certification type
issue_date_start	string (YYYY-MM-DD)	No	Filter by issue date (start)
issue_date_end	string (YYYY-MM-DD)	No	Filter by issue date (end)
expiration_date_start	string (YYYY-MM-DD)	No	Filter by expiration date (start)
expiration_date_end	string (YYYY-MM-DD)	No	Filter by expiration date (end)
page	integer	No	Page number for pagination (default: 1)
limit	integer	No	Number of results per page (default: 20, max: 100)

Example Request:

```
GET https://api.example.com/v1/certifications/search?query=security&certification_type=ISO
Authorization: Bearer YOUR_API_KEY
```

Example Response:

```json
{
  "status": "success",
  "data": {
    "total": 5,
    "page": 1,
    "limit": 20,
    "certifications": [
      {
        "certification_id": "CERT-001",
        "name": "ISO 27001",
        "holder_name": "Example Vendor Inc.",
        "holder_id": "V12345",
        "issue_date": "2023-06-15",
        "expiration_date": "2026-06-14",
        "status": "active",
        "issuing_authority": "International Organization for Standardization",
        "certification_type": "Information Security",
        "last_updated": "2023-06-15T14:30:45Z"
      },
      // Additional certifications...
    ]
  }
}
```

Get Certification Document

Retrieves a document associated with a certification.

Endpoint: `GET /documents/{document_id}`

Path Parameters:

Parameter	Type	Required	Description
document_id	string	Yes	Unique identifier of the document

Example Request:

```
GET https://api.example.com/v1/documents/DOC-001
Authorization: Bearer YOUR_API_KEY
```

Response:

The response will be the document file with appropriate Content-Type header (e.g., application/pdf, image/jpeg).

Error Handling

The API uses standard HTTP status codes to indicate the success or failure of requests.

Common Error Codes

Status Code	Description
400	Bad Request - The request was malformed or contains invalid parameters
401	Unauthorized - API key is missing or invalid
403	Forbidden - The API key doesn't have permission to access the requested resource
404	Not Found - The requested resource doesn't exist
429	Too Many Requests - Rate limit exceeded
500	Internal Server Error - Something went wrong on our end

Error Response Format

```json
{
  "status": "error",
  "error": {
    "code": "resource_not_found",
    "message": "The requested certification does not exist",
    "details": "No certification found with ID: CERT-999"
  }
}
```

Webhook Notifications (Optional)

You can set up webhooks to receive notifications when certification data changes. Contact our support team to configure webhooks for your account.

Available notification events:

- `certification.created`
- `certification.updated`
- `certification.expired`
- `certification.revoked`

SDK and Code Examples

Python Example

python

```python
import requests

API_KEY = "your_api_key"
BASE_URL = "https://api.example.com/v1"

headers = {
    "Authorization": f"Bearer {API_KEY}"
}

# Get all active certifications for a vendor
response = requests.get(
    f"{BASE_URL}/certifications",
    headers=headers,
    params={"vendor_id": "V12345", "status": "active"}
)

if response.status_code == 200:
    certifications = response.json()["data"]["certifications"]
    for cert in certifications:
        print(f"{cert['name']} - Expires: {cert['expiration_date']}")
else:
    print(f"Error: {response.status_code}")
    print(response.json())
```

JavaScript Example

```javascript
const API_KEY = "your_api_key";
const BASE_URL = "https://api.example.com/v1";

// Get certification details
fetch(`${BASE_URL}/certifications/CERT-001`, {
  headers: {
    "Authorization": `Bearer ${API_KEY}`
  }
})
.then(response => {
  if (!response.ok) {
    throw new Error(`HTTP error! Status: ${response.status}`);
  }
  return response.json();
})
.then(data => {
  console.log("Certification details:", data.data);
})
.catch(error => {
  console.error("Error fetching certification:", error);
});
```

Changes and Versioning

This API follows semantic versioning. Breaking changes will only be introduced in major version updates.

- Current version: v1 (2024-03-06)
- Next scheduled update: Q3 2025

Support

For technical support, please contact:

- Email: api-support@example.com
- Support hours: Monday-Friday, 9am-5pm EST

Terms of Use

Use of this API is subject to our Terms of Service and Privacy Policy.
