Database

external

- Single Certificate
  - Product Type, SKU/ASIN, Manufacturer
  - Link to BYCT page
  - Detail info: expiration, manufacturer contact, manufacturer webpage or amazon store front location
- Manufacturer
  - All SKU/ASIN
  - Manufacturer Brands
  - All Certifications
  - Single Certificate Page
  - All SKU/ASIN
  - Storefront links or manufacturer webpage links
  - Link to manufacturer page and/or BYCT
  - Single Certificate Page
- Product Type
  - All Certifications
  - Certificate Page with SKU/ASIN , Manufacturer
- Manufacturer Location
  - All Certifications

internal

- Certificate Form with all necessary information
  - Expired certificates must be saved
  - informationGroup of previous certifications together: by company, by product name

Goal

- Visually appealing, user friendly, valued added database
- API links
- Meet needs of clients, Amazon, and future large brands/large retailers

Must have

- Full search bar
- Drop down searching (aiding the user)
  - Cert type
  - Product type
  - Manufacturer
  - Country
- Multiple searching and filtering for the user for continued filters
- Sort by product type
  - Ops will need to create categories and sorting + reduce current ‘types’
- Searchable SKU or ASIN? - TBD
  - From main search bar or from manufacturer page ?
- Multi attribute tags to the certification type
- Click in is more visually appeal for clients & users (currently looks like a form)
- Key certification information
  - certificate information (#, company name, location, product name, product type, cert type + multi cert tags), link to BYCT page, link to customer page, ability to add SKU/ASIN list, ability to match to QR code,
- API: the top platforms are Ecomedes, mindfulmaterials, and Toxnot (3E)

How to include SKU / ASIN

- Will need to allow Multiple identifiers
  - SKU
  - ASIN
  - OTHER - client requested

Wish list

- Downloads with time stamp
- Download in bulk – single dated PDF
- Search by impact
  - Visual tag icon (climate, eco, social, etc)
- Search by applicability (Amazon, LEEDv5, etc)

example https://search.fsc.org/en/

Certificates (FM and CoC) | Project Certificates | Promotional Licences | FM Evaluations

Search by organization name, licence code, or certificate code

Certificate characteristics

Filter by status, type, certification body, and/or ecosystem services claims

Certificate Status
Select options

Certificate Type
Select options

Certification Body
Select options

Ecosystem Services
Verified ecosystem services impacts
Only applicable to FM and FM/COC certificate types

Organization characteristics

Filter by role of the organization and/or country/area

Role
Select options

Country/Area
Select options

Product characteristics

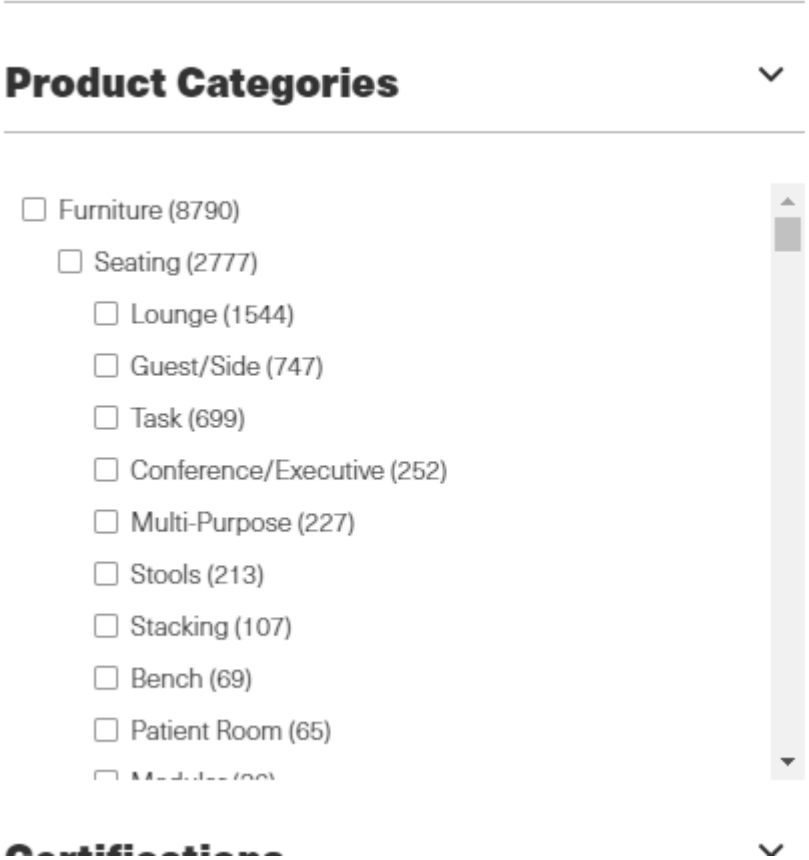

Filter by product category eg. paper, food, packaging, etc, or by species

Product category +

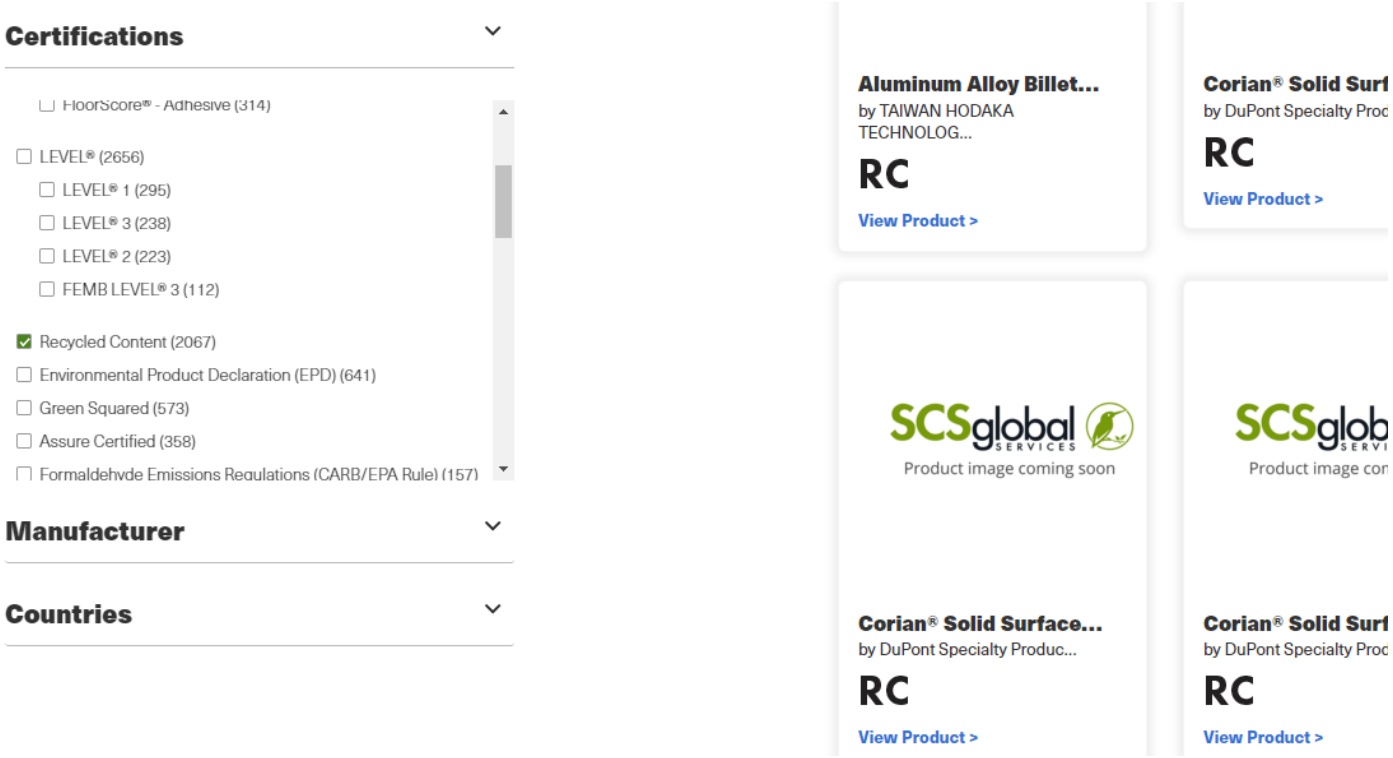

Species +

Example: SCS

https://www.scsglobalservices.com/certified-green-products-guide?category=827&program=24&manuf=24422

Search list includes GCC Marks with Manufacturer Name and Product Name

Ecomedes link

- Manual periodic upload to ecomedes – FREE
- API to ecomedes only
- Ecomedes builds front end to our back end, hosts on their site
  - $30k-$60k/annually
  - At what level does our back end ‘stop’
  - What does our back end need to look like… can it just be a form?
    - Plus certificate uploaded
- Will our clients like ecomedes??
  - What level of customization; would need to ensure it meets non-building clients
