Public

Consumers, partners, and organizations searching for product or company certification information.

Access:

View only, no editing, no list exporting

Permissions:

- Basic list filtering
- Download certificate PDF

List Field Access:

- Certificate #
- Company
- Product
- Product Category (currently Type)
- Certification
- Effective
- Expiration
- Location
- Certificate Download
- Tags [external]

External User

Clients with large certificate count (as needed) or partners that need additional data access.

Access:

Login required, view only, no editing. Can export lists. Limited to only certain content based on selections (e.g., “Amazon” flagged clients for Amazon, only client’s certs)

Permissions:

- Advanced list filtering
- Download certificate PDF (multiselect)
- Export full or filtered list

List Field Access:

Same as Public, plus:

- ASIN #’s
- UPC #'s

GCC User

Internal user with ability to upload client information/certificates and run reports/list exports.

Access:

Login required, editing access. Can export lists. Access to full list. Upload new certificates

Permissions:

Same as External User, plus:

- Data/certificate upload

List Field Access:

Same as External User, plus:

- Status
- Tags [external + internal]
- Amazon Marketplace ID

NOTE: Developer needs to confirm through Amazon conversations other field and data passing requirements.

Admin

Internal user with highest level of access with database field editing capabilities.

Access:

Same as GCC User

Permissions:

Same as GCC User, plus:

- Add / delete / rename fields and tags
- Data/certificate upload + mass data upload
- User access management
- Report dashboard creation

List Field Access:

Same as GCC User

NEW

Requirements

- Improved UI / UX and enhanced search capabilities
- Allow for multiple ASINs, UPCs, and tags per cert
  - Ability to pull count/number for ASINs, UPCs per cert
- External and internal fields and tags*
- Filtering, sorting*, export (data + cert PDFs)
- Download multiselect (ability to download multiple certs at once)
- API (Amazon, Mindful Materials, Ecomedes, Toxnot, etc.)
- Field addition / maintenance
- Customizable dashboard
- Automatic public view archive when expiration date is past (keep with updated status to ‘Expired’, do not delete record, expired should be available to users only not public)
- Suggest UPC (vs SKU which is listed throughout prior doc)
- Saved page history (as you navigate and click on options) – open new tab when selecting product/cert
- Database website tracking (visits/page views, unique visits, time of page, downloads) – Google Analytics reporting

NEW

Requirements

- Cert import system UI
  - Fields and cert PDF upload process / interface
- Standard DB table fields
  - [external] Certificate #, Company, Product, Product Category, Certification, Effective, Expiration, Location, Certificate Download, Tags [external]
  - [internal additional] Tags [external + internal], ASIN #’s, UPC #'s, Status, Amazon Marketplace ID
- Filter Options
  - Search bar (with ‘Clear filters’ option like SCS has)
  - Need ability to have different levels within filter categories (see SCS example – Furniture > Seating > Lounge)
  - [external] Product Category, Certification, Company, Location (country), Tags [external]
    - External Tag Examples: LEED, LBC, APR, Revinylze
  - [internal additional] Tags [all], Status
- User access types and maintenance

NEW

DB Examples

- SCS Database Example (like checkbox filtering, search bar, clear filters functionality, UI), competitor so don't want to match exact design too similarly but like UI / functionality
- Ecomedes Example
  - Multi select to narrow down search
  - Drop down for searches within fields is imperative

Preferred - SCS
