GreenCircle Certified
Database Project

ANUKI CONSULTING

GreenCircle Certified Database Site Map

Assumptions:

- Certificate List 1.0 is a different page than Certificates 3.0.
- Admin will have the ability to Add, Edit or Delete a Certificate, Company, Products, Users, Certificate Type, Product Types and Tags.

Notes:

- CRUD: [Create, Read, Update, Delete] – Wireframes include the details of the screens.
- Notifications & Alerts: Color-coded: Green for success, Red for errors, Yellow for warnings, Blue/gray for info)
- Sign-up Registration will be included but hidden and disabled for all users except the admin.

User Stories

GCC: User Roles

Public

Consumers, partners, and organizations searching for product or company certification information.

Access:
View only, no editing, no list exporting

Permissions:
- Basic list filtering
- Download certificate PDF

List Field Access:
- Certificate #
- Company
- Product
- Product Category
- Product Type (+ Subcategory)
- Certification Type
- Effective
- Expiration
- Location
- Country
- Tags [external]
- [Certificate Download]

External User

Clients with large certificate count (as needed) or partners that need additional data access.

Access:
Login required, view only, no editing. Can export lists. Limited to only certain content based on selections (e.g., "Amazon" flagged clients for Amazon, only client's certs)

Permissions:
- Advanced list filtering
- Download certificate PDF (multiselect)
- Export full or filtered list

List Field Access:
Same as Public, plus:
- ASIN
- UPC
- GTIN
- EAN
- Status
- CSF Attributes
- Tags [external + internal - if given permission by Admin]

GCC User

Internal user with ability to upload client information/certificates and run reports/list exports.

Access:
Login required, editing access. Can export lists. Access to full list. Upload new certificates. Metrics dashboard

Permissions:
Same as External User, plus:
- Data/certificate upload

List Field Access:
Same as External User, plus:
See spreadsheet for all Cert fields
- Company Contact Email/URL
- User Last Modified
- Record Created Date
- Record Last Updated Date
- Tags [all internal and external]

NOTE: Developer needs to confirm through Amazon conversations other field and data passing requirements.

Admin

Internal user with highest level of access with database field editing capabilities.

Access:
Same as GCC User

Permissions:
Same as GCC User, plus:
- Add / delete / rename fields and tags
- Data/certificate upload, deletion + mass data upload
- User access management
- Report dashboard creation

List Field Access:
Same as GCC User

ANUKI CONSULTING

User Stories – Public User

Access & Visibility

- As a public user, I want to browse publicly available active certifications so that I can verify product compliance.
- As a public user, I want to access certifications without needing to log in so that I can quickly find information.
- As a public user, I want to view only non-confidential certifications so that I do not access restricted data.

Search & Filtering

- As a public user, I want to search for certifications by ~~**certificate number**~~, Certification Type, **Product Categories**, Company, Country or **Tags** so that I can verify compliance.
- As a public user, I want to filter certifications by **product, product type / category, and product subcategory** so that I can narrow my search. Product Categories is the only section that has multiple levels.
- As a public user, I want to see the most recently issued certifications and those with upcoming expiration dates.

Viewing & Downloading Certifications

- As a public user, I want to view details of a certification so that I can verify product compliance.
- As a public user, I want to view and download single certifications so that I can reference them offline.

User Stories – Public User

Tagging & Classification

- As a public user, I want to see tags assigned to certifications so that I can understand additional certification classifications.
- As a public user, I want to search for certifications by tag so that I can find related certificates.

Data Access & Security

- As a public user, I want to access only publicly available information so that confidential data remains protected.

User Stories – External User (Client)

Access & Visibility

- As an external user, I want to log in securely so that I can access my company's certification data.
- As an external user, I want to see all certifications related to my company so that I can track compliance.
- As an external user, I want to ensure that I cannot see certifications from other companies so that my access is restricted to my organization.
- As an external user, I want my permissions to be pre-defined by an admin so that I only access the relevant data.
- As an external user, I want to be able to filter my certifications based on status (active, expired, pending) so that I can quickly find relevant information.

Search & Filtering

- As an external user, I want to search for certifications within my company so that I can locate specific records.
- As an external user, I want to filter certifications by type, category, and subcategory so that I can narrow down the results.
- As an external user, I want to sort certifications by expiration date so that I can prioritize renewals.
- As an external user, I want to search certifications by product name so that I can verify specific items.
- As an external user, I want to filter by location, tags, and other available filter options based on their intended search purpose.
- As an external user, I want to export my company's certification data into Excel so that I can use it for reporting and documentation. purposes.

User Stories – External User (Client)

Viewing & Downloading Certifications

- As an external user, I want to view details of each certification so that I can verify product compliance.
- As an external user, I want to download certificates in multi-select format so that I can share them with my stakeholders.
- As an external user, I want to check the expiration date of a certification so that I can ensure timely renewals.

Tagging & Classification

- As an external user, I want to see assigned tags on certifications so that I can categorize data effectively.
- As an external user, I want to filter certifications based on assigned tags so that I can group relevant products together.
- As an external user, I want to view which products are associated with a specific certification so that I can understand product compliance.

Data Access & Security

- As an external user, I want my access restricted to only my company's data so that I do not see competitors' certifications.
- As an external user, I want to log out securely so that I can prevent unauthorized access to my account.
- As an external user, I want my account to be managed by an admin so that permissions are properly controlled.

User Stories – External User (Partner)

Access & Visibility

- As an external user, I want to log in securely so that I can access my program's certification data.
- As an external user, I want to see all certifications related to my program so that I can track compliance.
- As an external user, I want to ensure that I cannot see certifications from other companies or programs so that my access is restricted to my program.
- As an external user, I want my permissions to be pre-defined by an admin so that I only access the relevant data.
- As an external user, I want to be able to filter my certifications based on status (active, expired, pending) so that I can quickly find relevant information.

Search & Filtering

- As an external user, I want to search for certifications within my program so that I can locate specific records.
- As an external user, I want to filter certifications by type, category, and subcategory so that I can narrow down the results.
- As an external user, I want to search certifications by product name so that I can verify specific items.
- As an external user, I want to filter by location, tags, and other available columns to filter options based on their intended search purpose.
- As an external user, I want to export my program certification data into Excel so that I can use it for reporting and documentation purposes.

Partners (where they will have access across companies for products that are part of their program only – for example Amazon CPF clients/certs)

User Stories – External User (Partner)

Viewing & Downloading Certifications

- As an external user, I want to view details of each certification so that I can verify product compliance.
- As an external user, I want to download certificates in multi-select format so that I can share them with my stakeholders.
- As an external user, I want to check the expiration date of a certification so that I can validate certification period.

Tagging & Classification

- As an external user, I want to see assigned tags on certifications so that I can categorize data effectively.
- As an external user, I want to filter certifications based on assigned tags so that I can group relevant products together.
- As an external user, I want to view which products are associated with a specific certification so that I can understand product compliance.

Data Access & Security

- As an external user, I want my access restricted to only my program's data so that I do not see competitors' or restricted certifications.
- As an external user, I want to log out securely so that I can prevent unauthorized access to my account.
- As an external user, I want my account to be managed by an admin so that permissions are properly controlled.

User Stories – GCC Analyst

Access & Visibility

- As an analyst, I want to log in securely so that I can access certification data.
- As an analyst, I want to see all certifications so that I can manage records effectively.
- As an analyst, I want my access restricted to only my assigned role so that I do not see unauthorized data.
- As an analyst, I want to view dashboard reports so that I can track data and trends.

Search & Filtering

- As an analyst, I want to filter certifications by all fields so that I can generate reports and narrow by results based on my search needs.
- As an analyst, I want to sort certifications by modification date so that I can easily find a recent certificate that may need additional edits.

Viewing & Downloading Certifications

- As an analyst, I want to view detailed certification records so that I can ensure compliance accuracy.
- As an analyst, I want to download certification data in bulk so that I can conduct offline analysis.
- As an analyst, , I want to see the history of modifications for a certification so that I can track changes.
- As an analyst, I want to download multiple certifications based on search criteria to view or save in bulk.
- As an analyst, I want to be able to add and edit certificates, cert status, products, and companies.

User Stories – GCC Analyst

Tagging & Classification

- As an analyst, I want to assign tags to certifications so that I can classify them effectively.
- As an analyst, I want to edit or remove assigned tags so that I can keep records up to date.

Data Access & Security

- As an analyst, I want my access to be restricted based on admin settings so that I only see relevant data and don't make unintended changes.
- As an analyst, I want to track user activity logs so that I can review who made modifications to records.

User Stories - Admin

Access & Visibility

- As an admin, I want to manage user roles and permissions so that I can control access levels.
- As an admin, I want to view all certifications across all companies so that I can oversee compliance.
- As an admin, I want to create, edit, and delete user accounts so that I can manage system access.

Search & Filtering

- As an admin, I want to search certifications across all companies so that I can manage records efficiently.
- As an admin, I want to filter any of the certificate fields so that I can oversee compliance trends.
- As an admin, I want to sort certifications by the last modified date so that I can track updates.
- As an admin, I want to be able to set the certificate status (active, expired, pending).

Viewing & Downloading Certifications

- As an admin, I want to view detailed certification records across the entire platform so that I can manage data integrity.
- As an admin, I want to export all certification data so that I can generate system-wide reports.
- As an admin, I want to track certification history and changes so that I can audit modifications.

User Stories - Admin

Tagging & Classification

- As an admin, I want to create, edit, and remove tags so that I can organize certifications effectively.
- As an admin, I want to standardize tags across the platform so that users have consistent classification options.
- As an admin, I'm the only role that has the ability to edit product categories, product types and subcategories, certification types, CSF attributes.
- As an admin, I have the ability to add new fields to Certificate page.

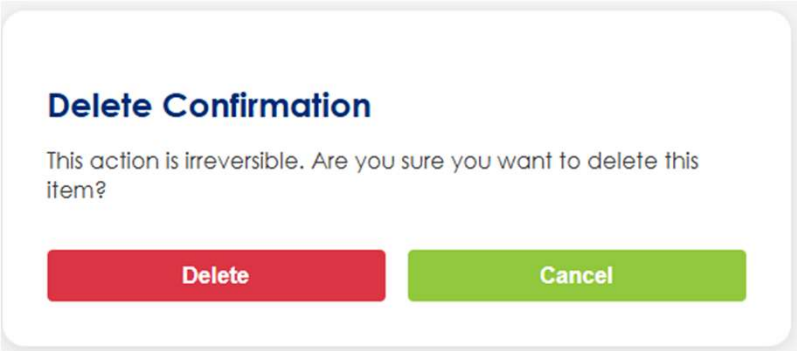

Data Access & Security

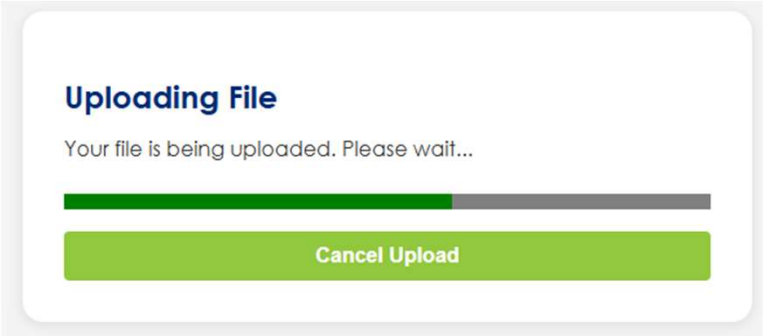

- As an admin, I want to enforce multi-factor authentication so that system security is enhanced.
- As an admin, I want to track user activity logs so that I can monitor system usage.
- As an admin, I want the ability to add a new field to certificates.
- As an admin, I want to restrict access to certain certifications so that only authorized users can view them.
- As an admin, I want to integrate API connections with third-party platforms so that external vendors can securely access data.
- As an admin, I want the ability to add, update or delete data for Companies, product types, certificate types, partners, CSF Attributes, and Tags
- As an admin, I want the system back-end to handle certificate numbering with manual override option available if needed.
- As an admin, I want the system back-end to manage what appears in the public database based on active status.

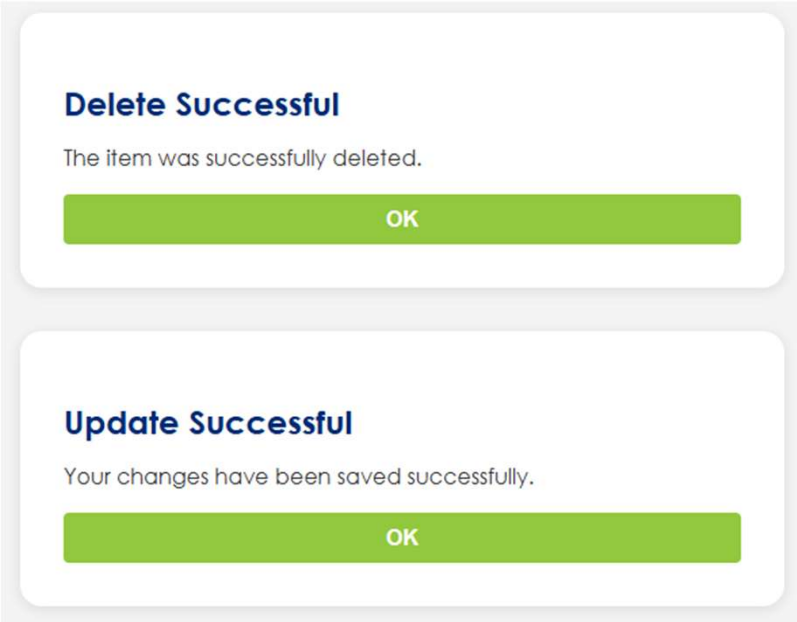

Login & Notification Screens

Notifications & Alerts

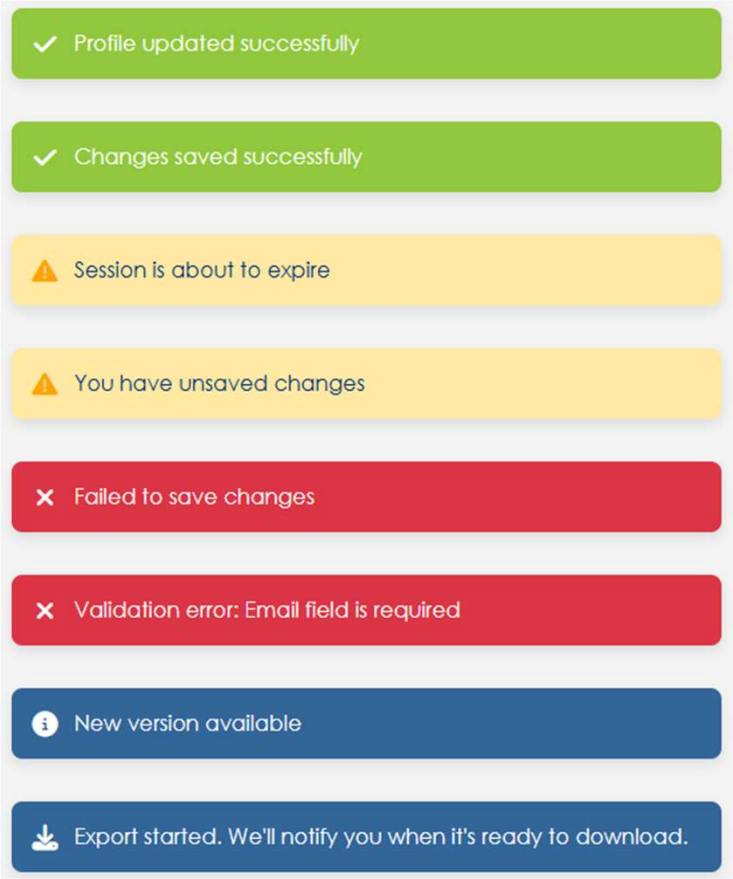

Notes:

- Examples of notification and alerts.
- We will need to identify all instances of where notifications and alerts need to occur.
- Color-coded:
  - Green for success
  - Red for errors
  - Yellow for warnings on toast messages.
  - Blue/gray for info(navy blue)

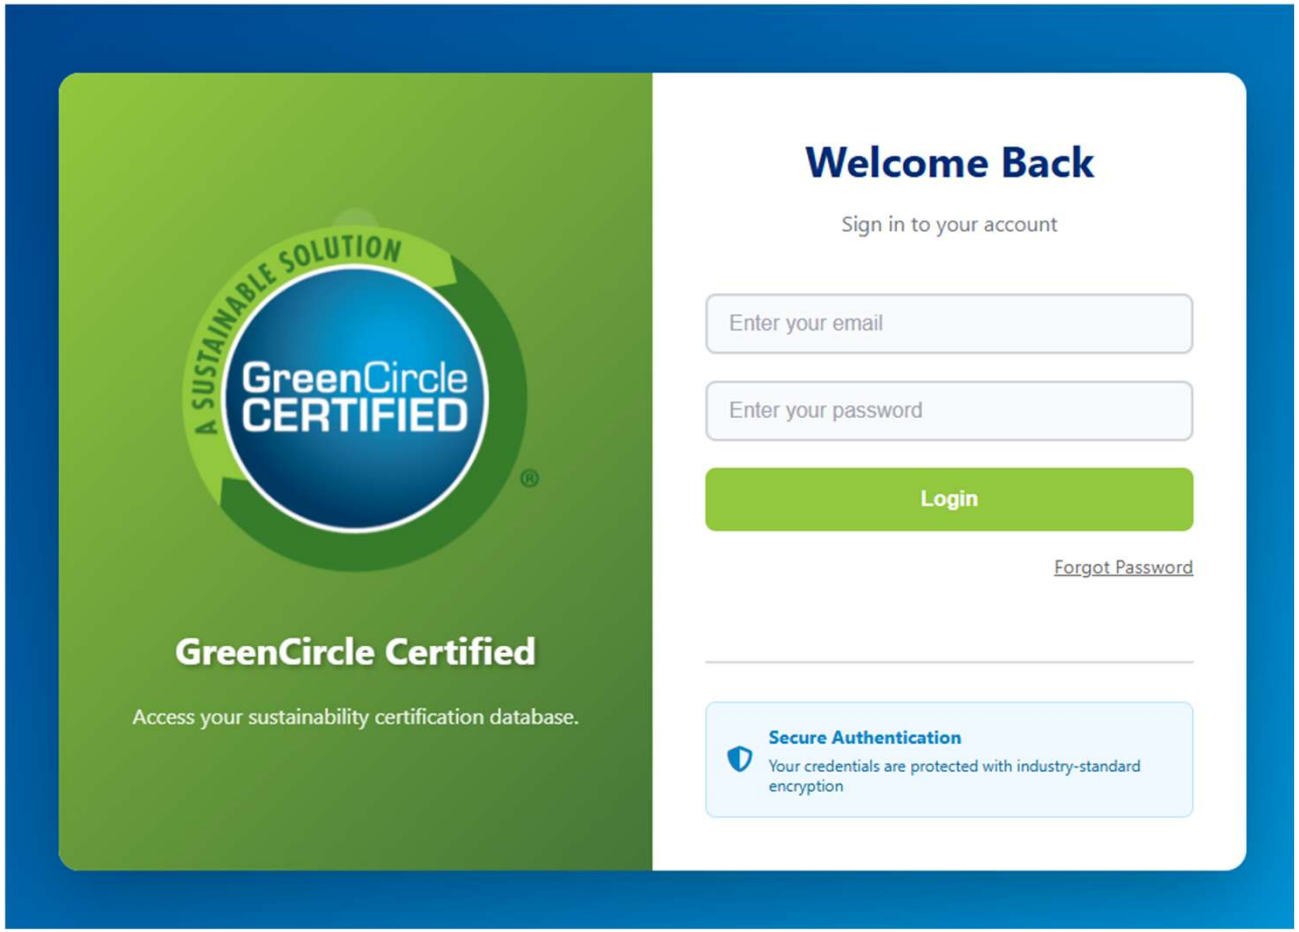

Notifications & Alerts

Notes:

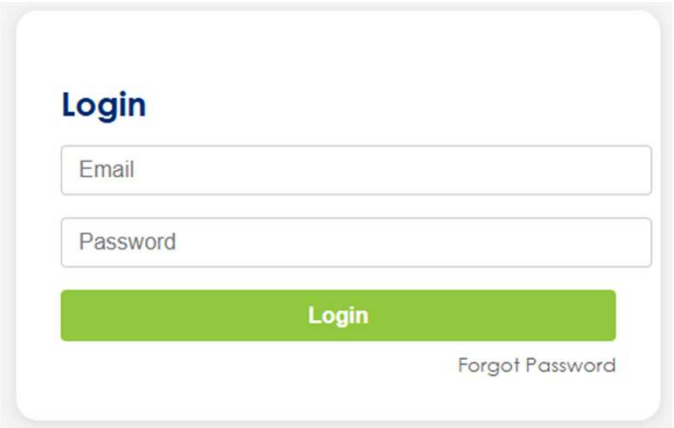

- Examples of notification and alerts.
- We will need to identify all instances of where notifications and alerts need to occur.
- Color-coded:
  - Green for success
  - Red for errors
  - Yellow for warnings
  - Blue/gray for info(navy blue)

Wireframe Notes – 6.1 – Login

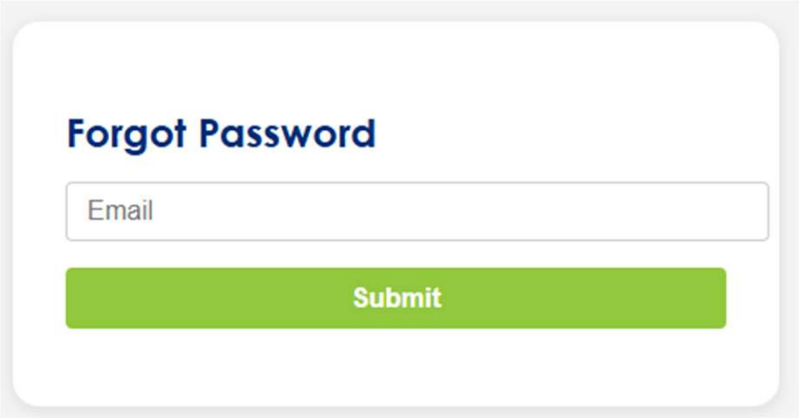

Login Screen
- Username/Email and Password fields
- Login button
- "Forgot Password" link

•The login screen has been updated. If this UI is preferred. We can update the remaining login screens to match.

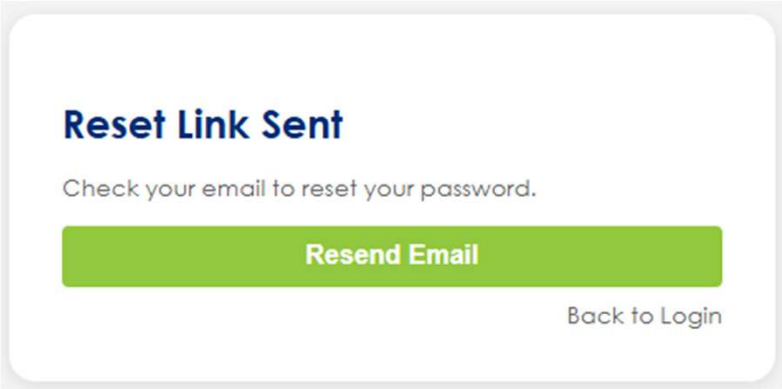

Wireframe Notes – 6.2 – Forgot Password

Forgot Password Screen
- Input: Email
- Submit button

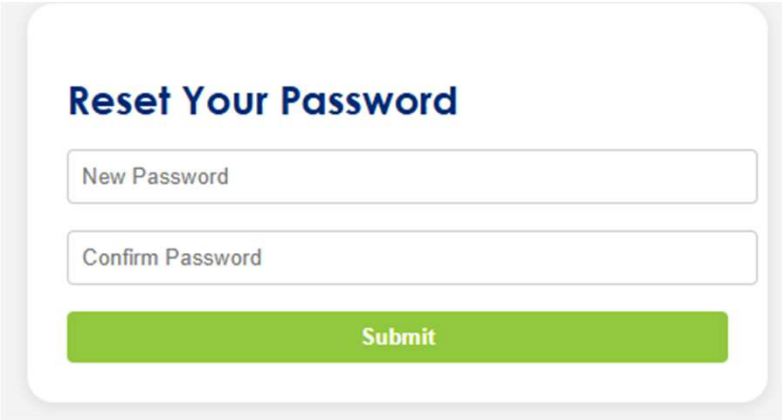

Wireframe Notes – 6.3 – Password Reset Confirmation

Password Reset Confirmation Screen (Email Sent)

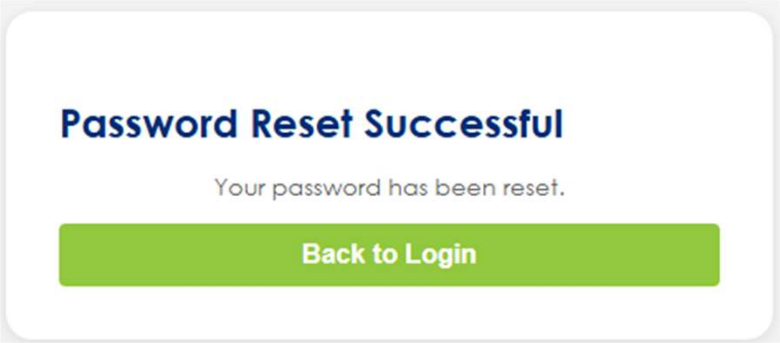

- Confirmation that an email was sent
- Option to resend
- Option to go back to Login

Wireframe Notes – 6.4 – Reset Password

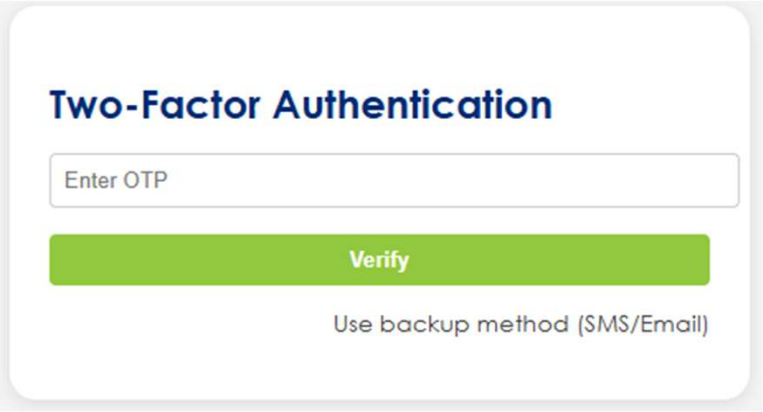

Reset Password Screen
•Accessed via email link (usually with token)
•New Password + Confirm Password
•Submit button

Wireframe Notes – 6.5 – Password Reset Successful

Password Reset Success Screen
•Message: "Your password has been reset"
•Button to go back to Login

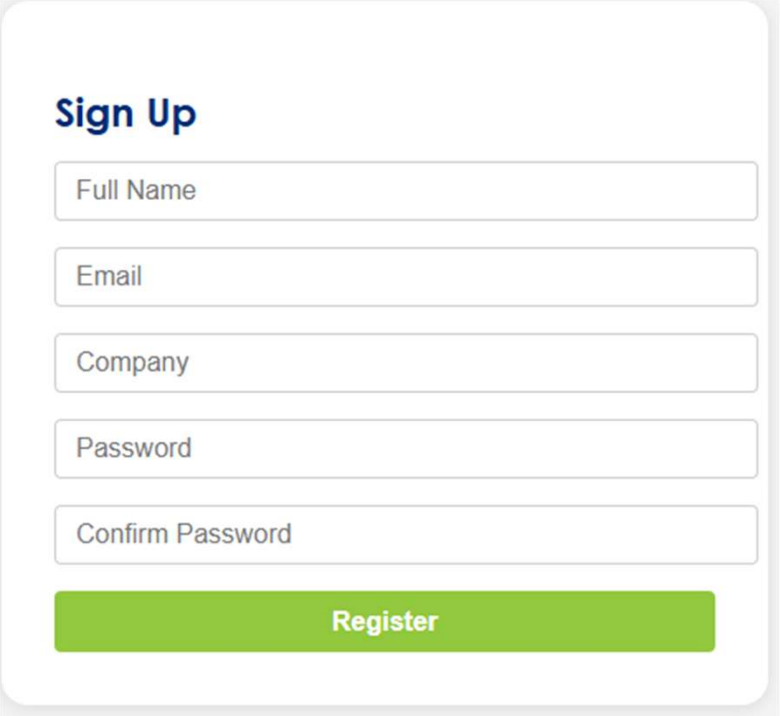

Wireframe Notes – 6.6 – 2FA Authenticate OTP

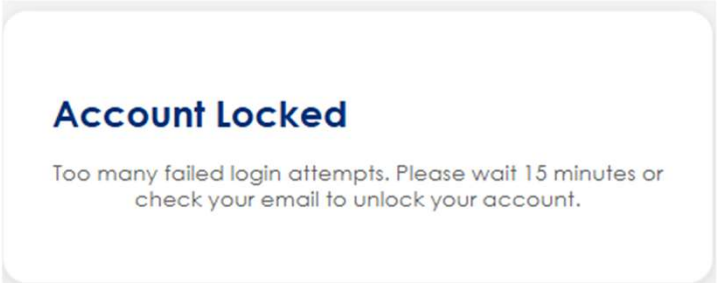

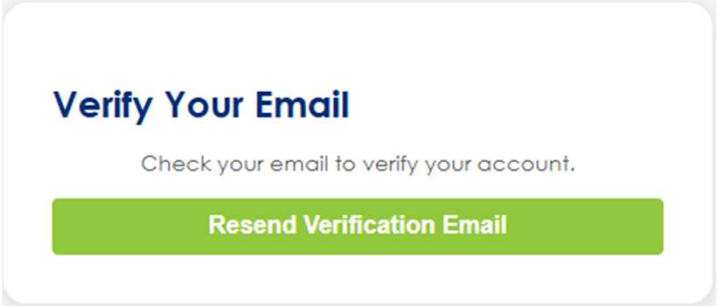

Two-Factor Authentication (2FA) Screen

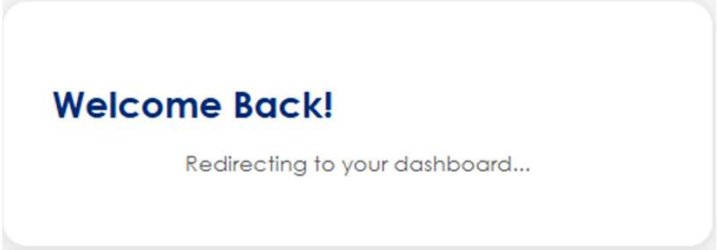

- Prompt for OTP or code from authenticator app
- Backup methods (e.g., SMS, email)

Wireframe Notes – 6.7 – Sign-up Registration (out of Scope)

Sign Up / Registration Screen (Disabled/Hidden)
•If account creation is allowed in the future

•Additional Screens:
Account Lock/Too Many Attempts Screen
•Inform user of lockout
•Time remaining or action to unlock (e.g., via email)
Email Verification Screen (Post Sign-up)
•"Check your email to verify your account"
Resend Verification Email Screen
•In case the user didn't receive the initial verification
Login Success Redirect / Dashboard Screen
•After login, redirect to home, dashboard, or intended page

SW1

Requirement: Ability to sort tiles on all Public database columns (Certificate #, Certification Type, Effective Date, Expiration Date, Company, ~~Company Contact Email/URL~~, Product Name, Product Category, Product Type, ~~Product Type Subcategory~~, Location, Country, ~~External Tag~~) (Striked out does not need sorting)

NUKI CONSULTING

Slide 29

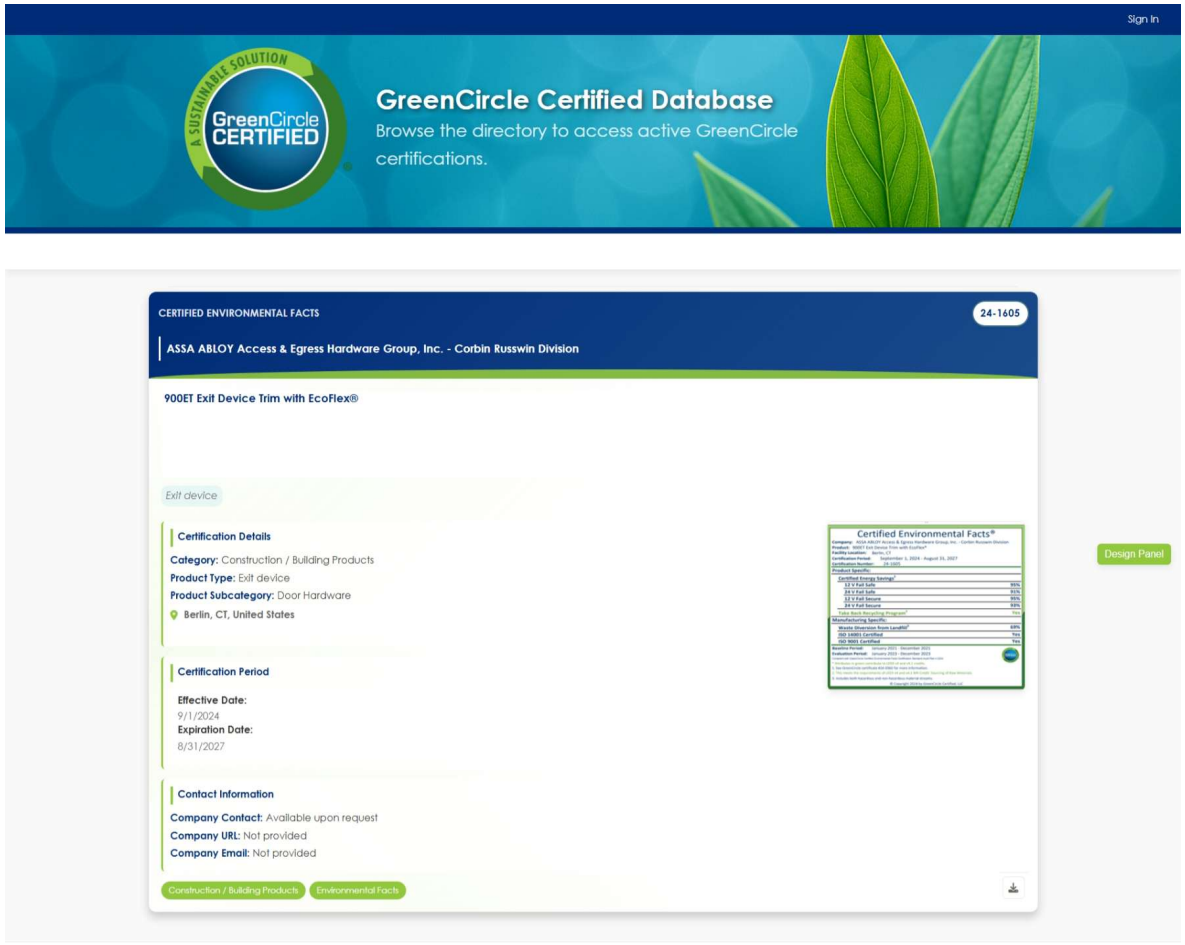

SW1 What are the options for Sort By?

Shawn West, 2025-03-12T16:06:10.434

Wireframe Notes – 1.0 - Certificate List (Public Page)

- This is the landing page (https://db.greencirclecertified.com/certificate) on the current website.
- Clicking anywhere on the tile of a certificate will take the user to the Certificate View, separate page that opens into a new window, that shows details about the selected certificate.
- Search bar, autocomplete suggestions, filters on search terms within results, mobile compatibility, and the ability to narrow down search results based on specific criteria within categories, allowing users to easily find specific content on a site.
- Ability to sort tiles on all Public database columns (Certificate #, Certification Type, Effective Date, Expiration Date, Company, ~~Company Contact Email/URL~~, Product Name, Product Category, Product Type, ~~Product Type Subcategory~~, Location, Country, ~~External Tag~~) (Striked out does not need sorting)
- Ability to filter by search categories
- All Public data fields to be displayed: Certificate #, Certification Type, Effective Date, Expiration Date, Company, Company Contact Email/URL, Product Name, Product Category, Product Type, Product Type Subcategory, Location, Country, External Tag
- Need to make sure a unique URL can be created based on search criteria so clients can directly link to DB with just listing of their certifications (SCS does this as you add search criteria). Unique URL per Certification View for direct cert access.
- Ability to view # Results
- Ability to Clear filters
- Certification download capability. Ability to download certificate directly from tile via download icon.
- *Wishlist: The ability to load the table as a user scrolls Lazy loading, rather than have the page control.

Wireframe Notes – 1.1 – Single Certificate View

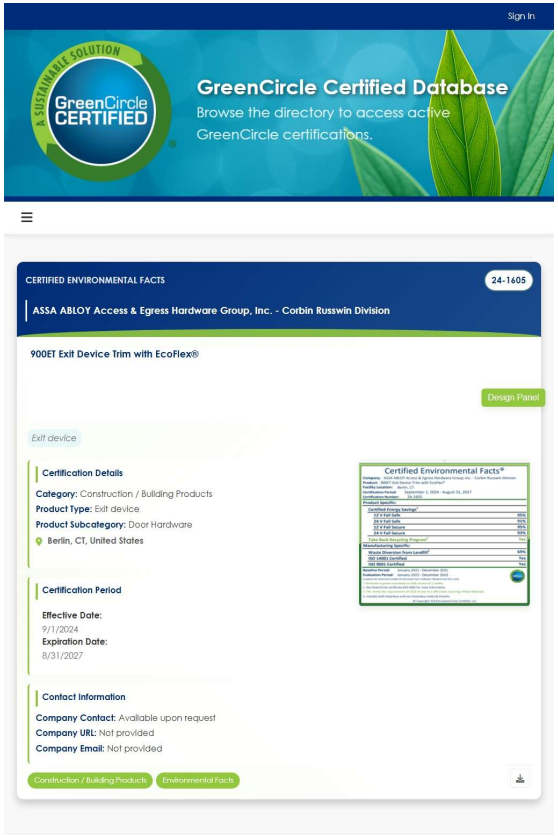

Notes:

- This is the Single Cert View for Public Users.
- Ability to view all Public data fields for the selected Single Certificate.
- Ability to Download the Certificate.
- Certificate view will load into a new tab.

Wireframe Notes – 1.1 – Single Certificate View (Mobile/Tablet Views)

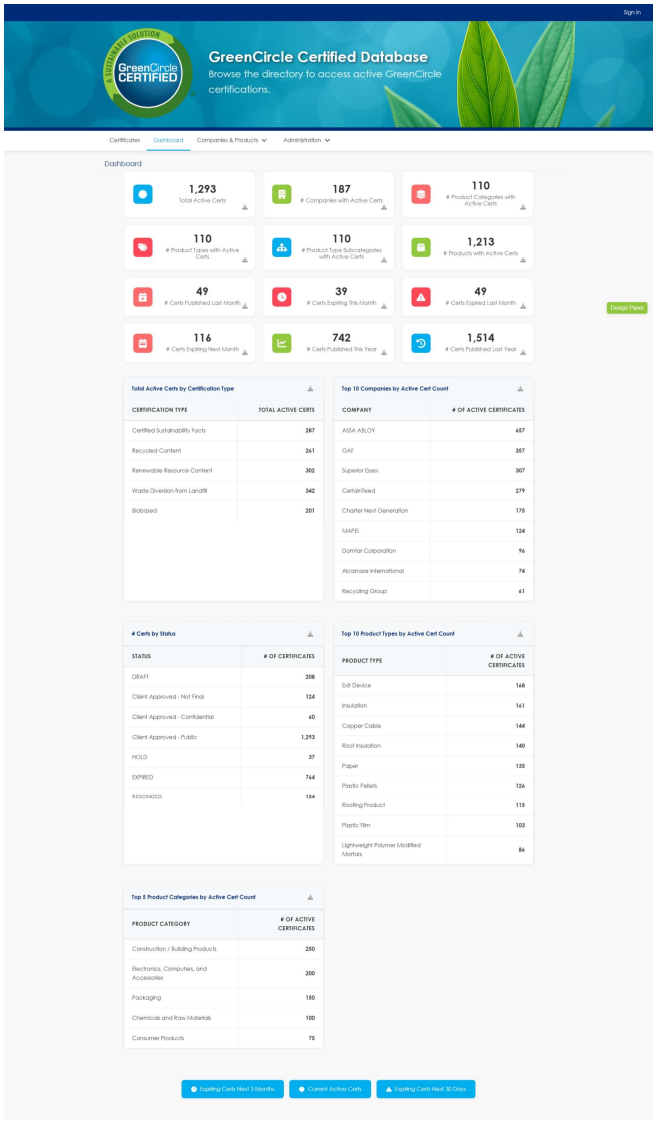

Wireframe Notes – 2.0 – Home (Dashboard)

Notes:

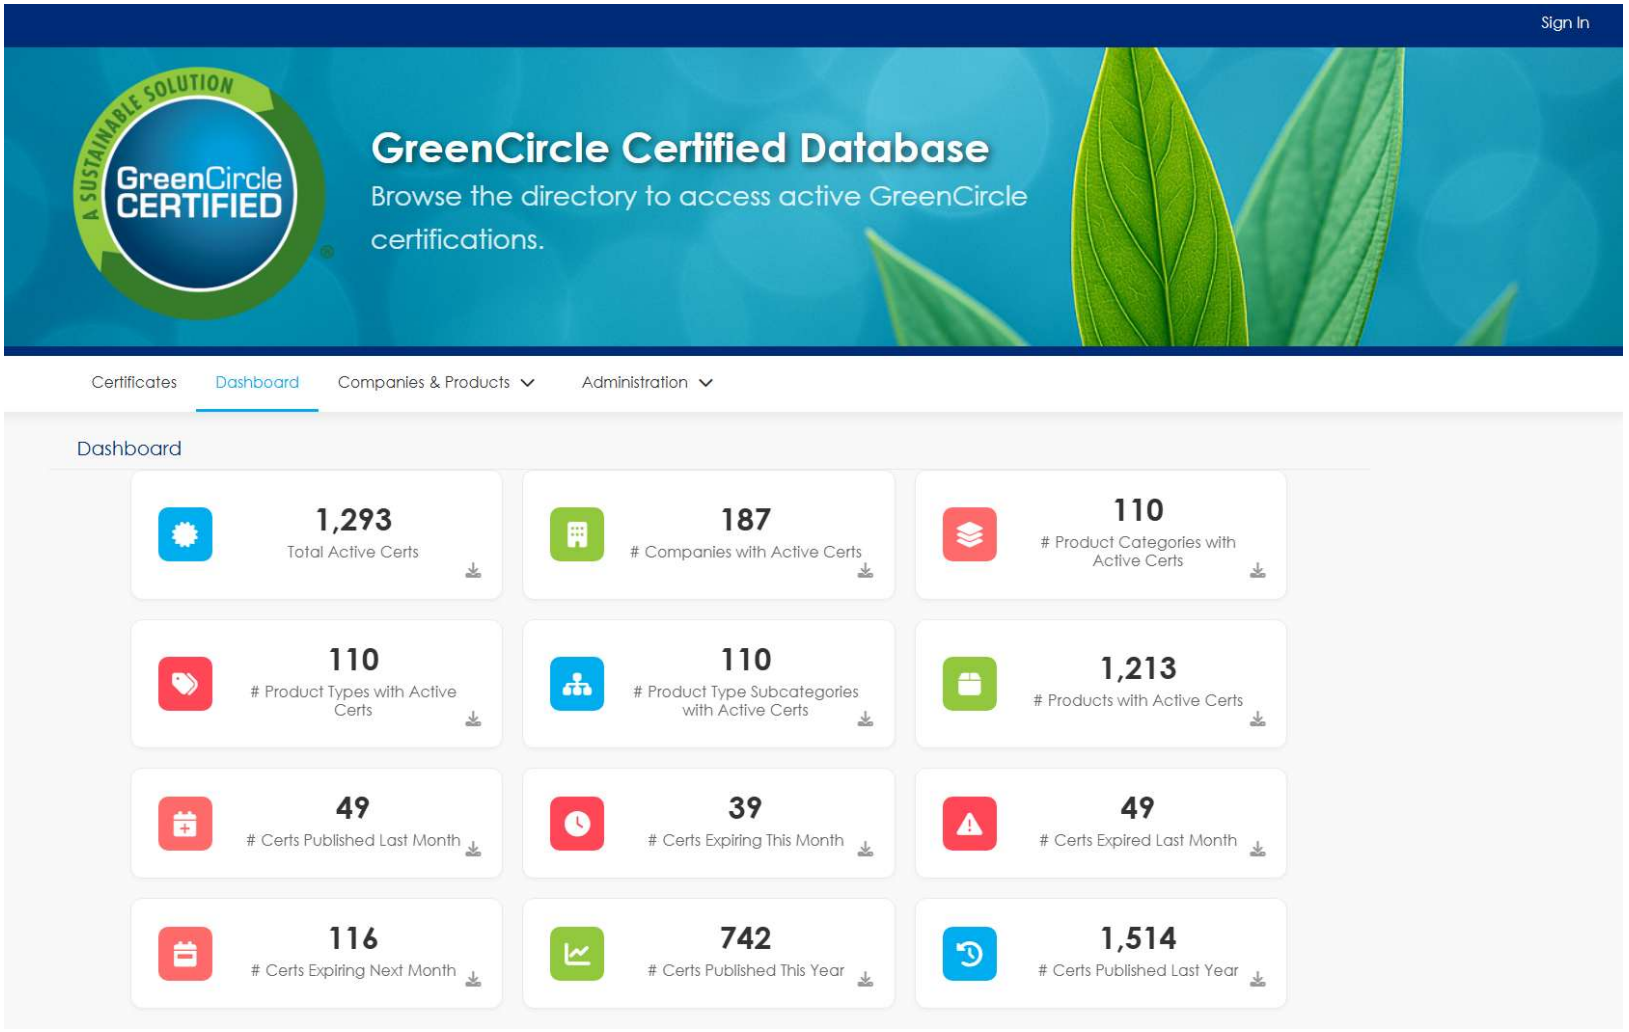

- This is the dashboard reporting page for logged in GCC users (Analyst and Admins).
- Containers represent the required metrics.
- Ability to view designated metrics.
- Ability to export Prebuilt Lists to Excel.
- Ability to export the selected metric to Excel.

Other

- Nice to have, not part of scope, would be to have the dashboard available for external users with there specific data. (out of scope)

Wireframe Notes – 2.0 – Home (Dashboard)

Wireframe Notes – 3.0 – Certificate List (External)

- **Notes**:
- Wireframe updated for infinite scrolling instead of pagination.
- Add Certificates will only be available for Analyst and Admin users.
- Edit/Delete Certificate will only be available for Analyst and Admin users.
- Ability to toggle between List and Tile views.
- The Tile view will display the same as 1.0 Certificate view.
- List Sort by will allows users to sort on any column.
- All data fields to be displayed based on user's permissions: Certificate #, Certification Type, CSF Attributes, Status, Effective Date, Expiration Date, Company, Company Contact Email/URL, Product Name, Product Category, Product Type, Product Type Subcategory, Location, Country, External Tag, Internal Tag, ASIN, UPC, GTIN, EAN, ~~**Certificate Upload, Record Created Date, Record Last Updated Date, Preview**~~
- 2 types of External Users
- Customers (accounted for here)
- Partners (where they will have access across companies for products that are part of their program only – for example Amazon CPF clients/certs) (Need Clarification)
- Defaults to List View

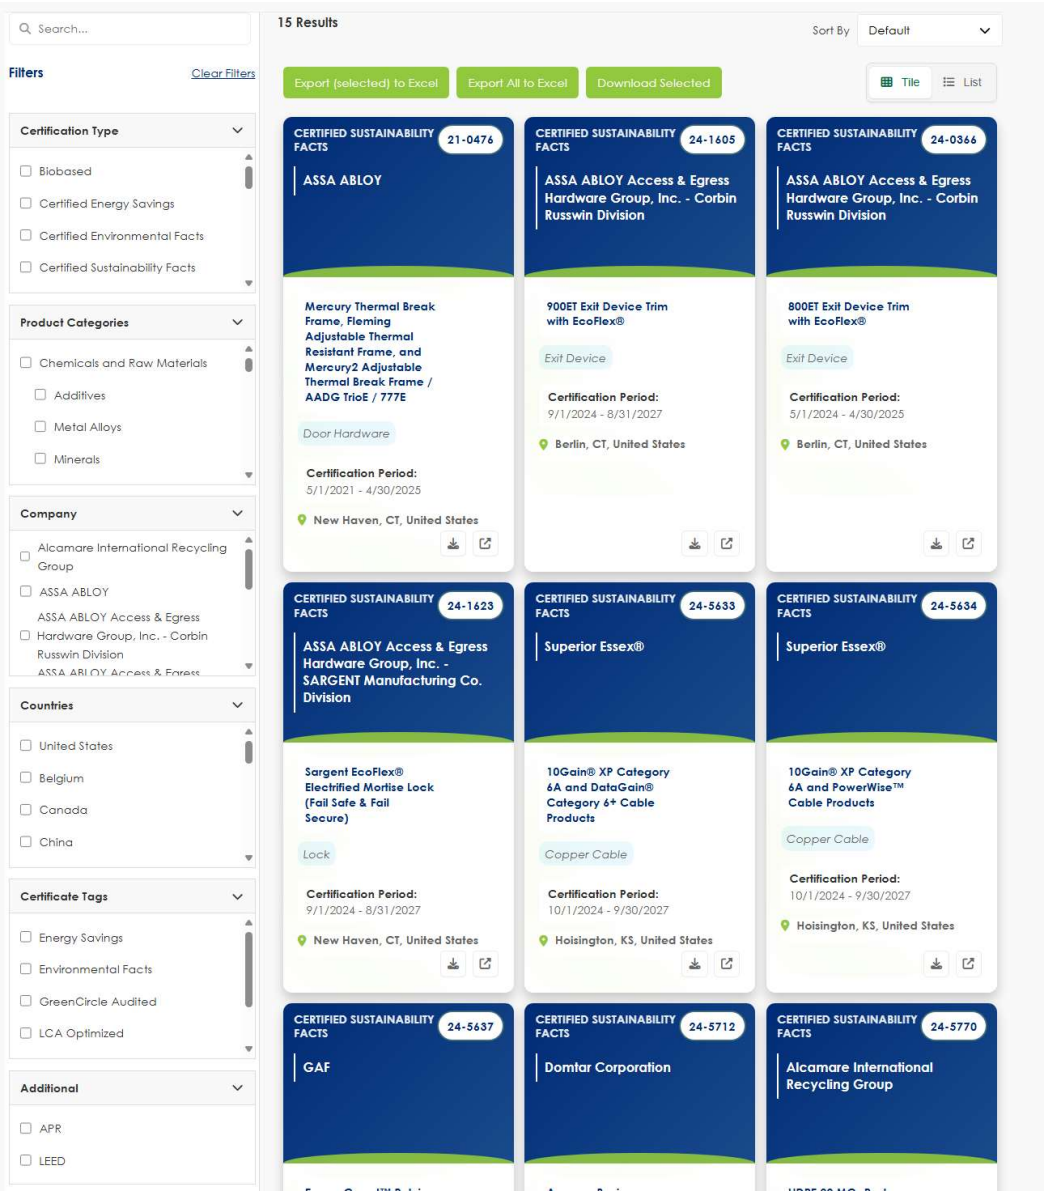

Wireframe Notes – 3.0 – Certificate List (External)

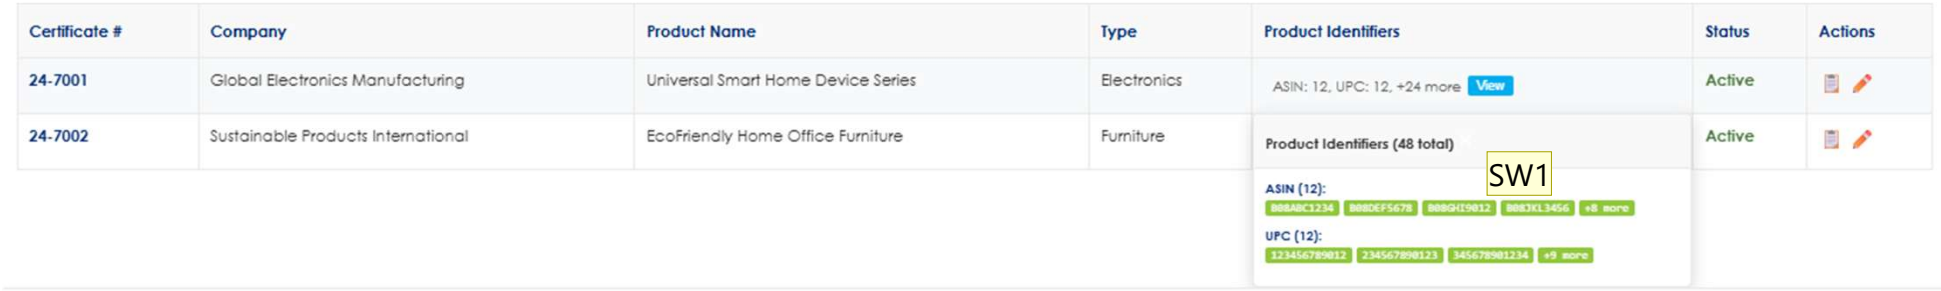

ANUKI CONSULTING

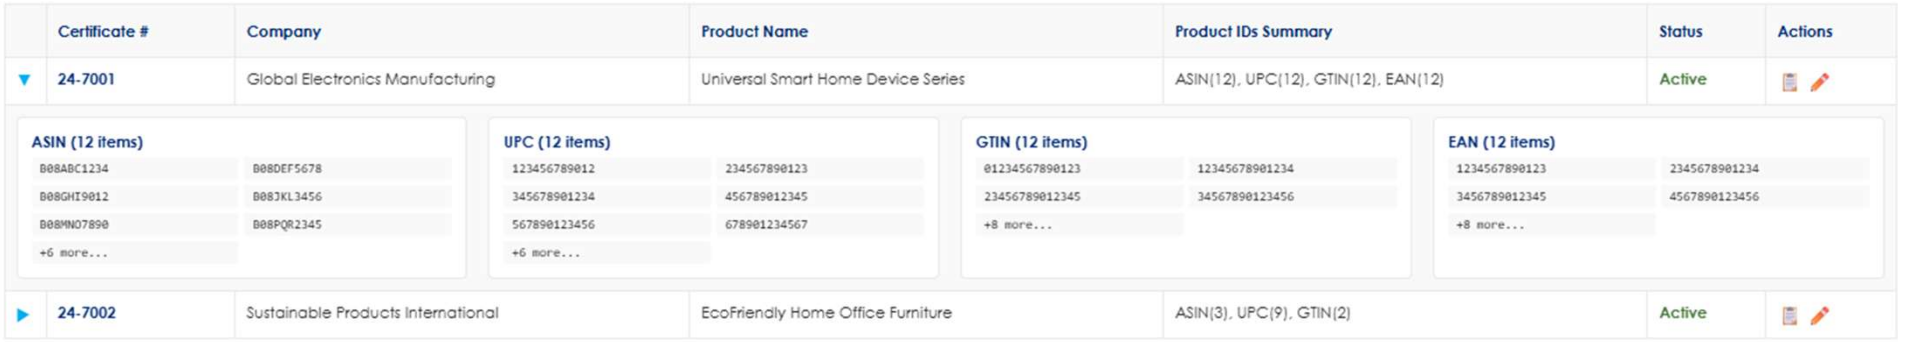

Wireframe Notes – 3.0 – Certificate List (External)

Wireframe Notes – 3.0 – Certificates List (External) (Samples)

- Handling a large amount of ASINS Options

- **Pending Decision:** Discuss how would you handle where there are thousands of ASINs under a certificate.
  - May need to give Products page access to external users because listing here would not be realistic. In which case there would not be a column for this, UPC, etc.

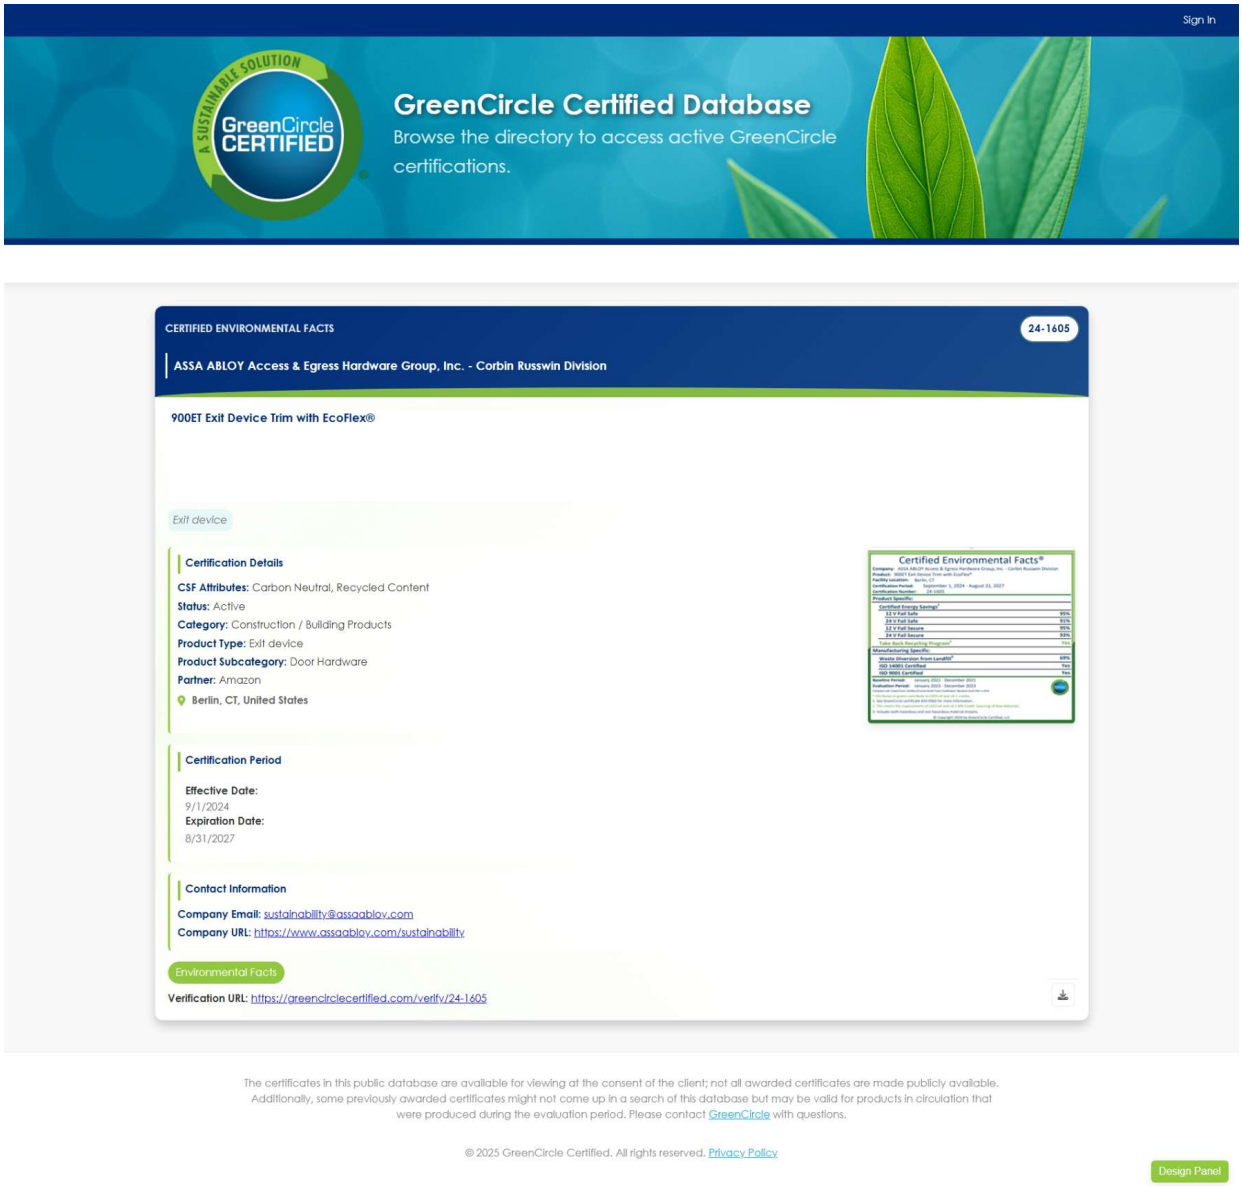

Slide 40

SW1 this is for when adding cert -- but they can download cert

Shawn West, 2025-03-13T23:06:58.973

Wireframe Notes – 3.1 – External Single Certificate View

- All data fields to be displayed based on user's permissions: Certificate #, Certification Type, CSF Attributes, Status, Effective Date, Expiration Date, Company, Company Contact Email/URL, Product Name, Product Category, Product Type, Product Type Subcategory, Location, Country, External Tag, Internal Tag, ASIN, UPC, GTIN, EAN, ~~**Certificate Upload, Record Created Date, Record Last Updated Date, Preview.**~~
- Verification URL: displayed at bottom of page to enable
- Certificate View will load in a new tab.
- CSF Attribute will only show when it is selected for a certification. (The field will not be required on the certificate create page)
- **Record Information will only be available for Analyst and Admin**

Wireframe Notes – 3.1 – External Single Certificate View

- This is the List View for Logged In Clients.
- Ability to Sort on all columns.
- Ability to Filter by designated Search Categories.
- Ability to scroll horizontally and vertically to see additional data fields.
- Ability to multiselect for Download.
- Will Clients fall under the 'Company' data field or is there another way to associate them to a Product/Certificate?
    - When we grant permissions to clients it would be through Company -
      and there could be multiple companies associated with 1 client (ASSA ABLOY for example).
      However, on the partner side they would not be by Company but by new partner field.

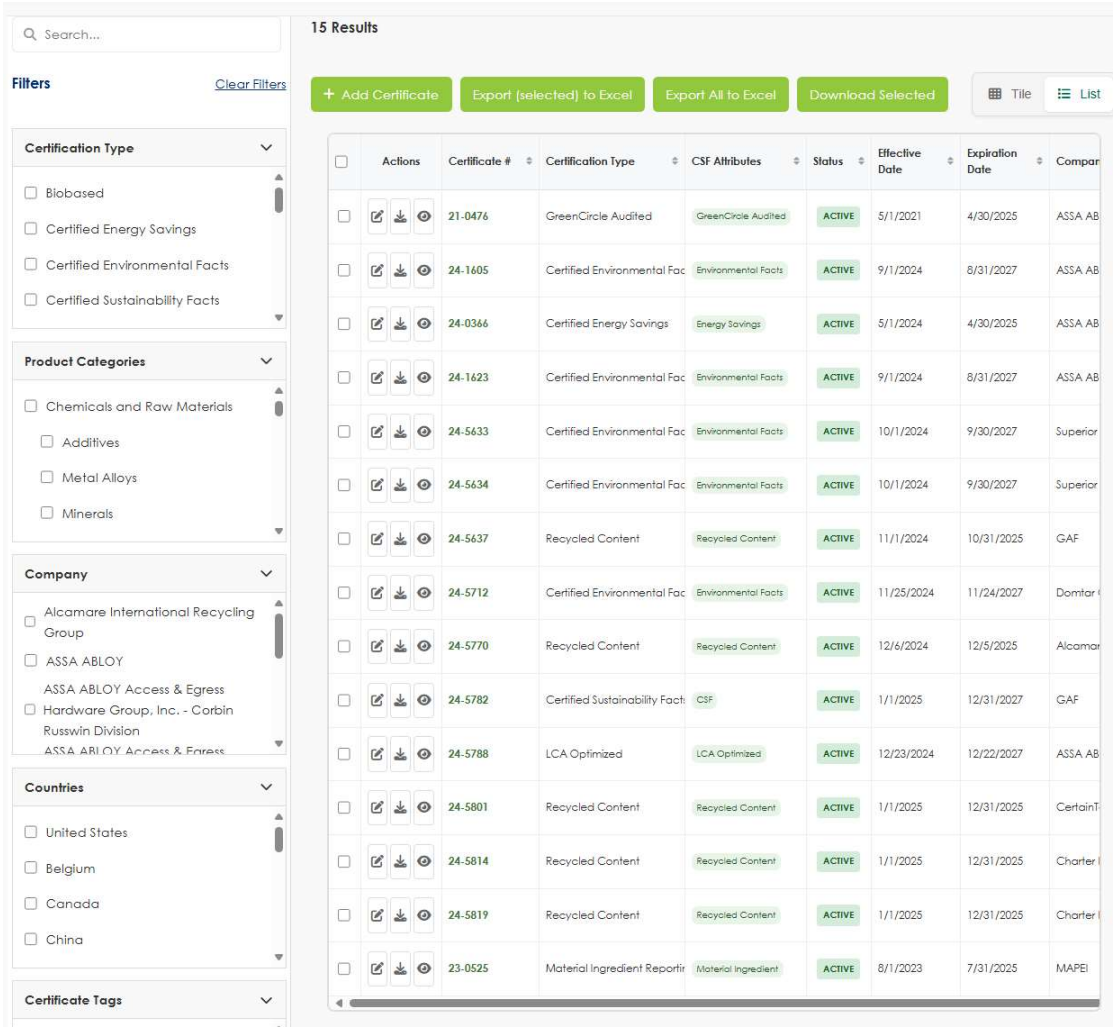

Wireframe Notes – 3.2 – Certificate List (GCC Only)

Notes:

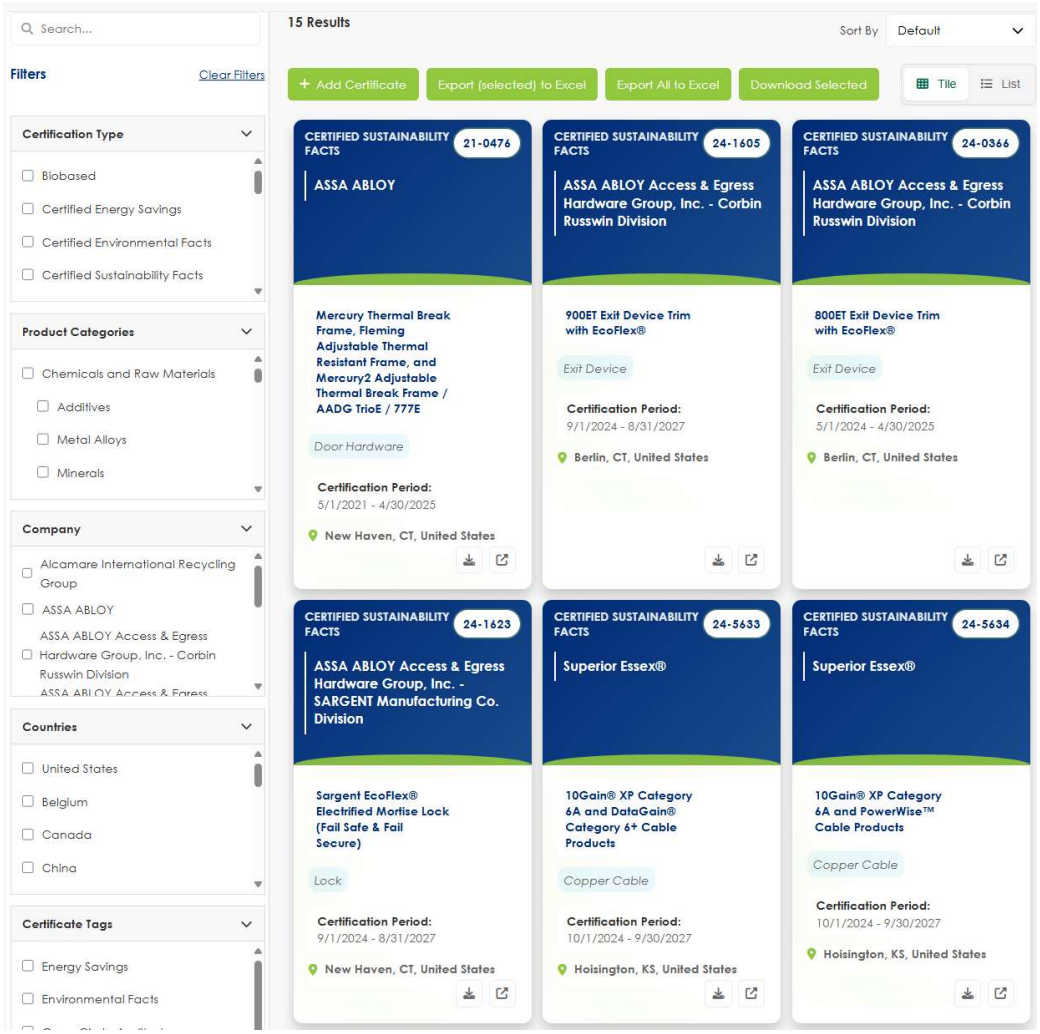

- Wireframe updated for infinite scrolling instead of pagination.
- Add Certificates will only be available for Analyst and Admin users.
- Edit/Delete Certificate will only be available for Analyst and Admin users.
- Ability to toggle between List and Tile views.
- The Tile view will display the same as 1.0 Certificate view.
- List Sort by will allows users to sort on any column.
- All data fields to be displayed based on user's permissions: Certificate #, Certification Type, CSF Attributes, Status, Effective Date, Expiration Date, Company, Company Contact Email/URL, Product Name, Product Category, Product Type, Product Type Subcategory, Location, Country, External Tag, Internal Tag, ASIN, UPC, GTIN, EAN, Certificate Upload, Record Created Date, Record Last Updated Date, ~~**Preview**~~

ANUKI CONSULTING

Wireframe Notes – 3.2 – Certificate List (GCC Only)

Wireframe Notes – 3.2 – Certificate List (GCC Only)

- This is the List View for Logged In Users.
- Clicking anywhere on the row of a certificate will take the user to the Certificate List that shows details about the selected Certificate.
- Ability to Sort on all columns.
- Ability to Filter by designated Search Categories.
- Ability to scroll horizontally and vertically to see additional data fields.
- Ability to multiselect for Certificate Download.
- Ability to Add a Certificate.
- Ability to Edit/Delete a selected Certificate.
- Note: Edit/Delete will be one at a time, no multiselect.
- Excel download - based on filters can export full or filtered list
- *Wishlist: The ability to load the table as a user scrolls Lazy loading, rather than have the page control.

SW1

SW2

SW3

Slide 47

SW1 this is for when adding cert -- but they can download cert
Shawn West, 2025-03-13T23:06:58.973

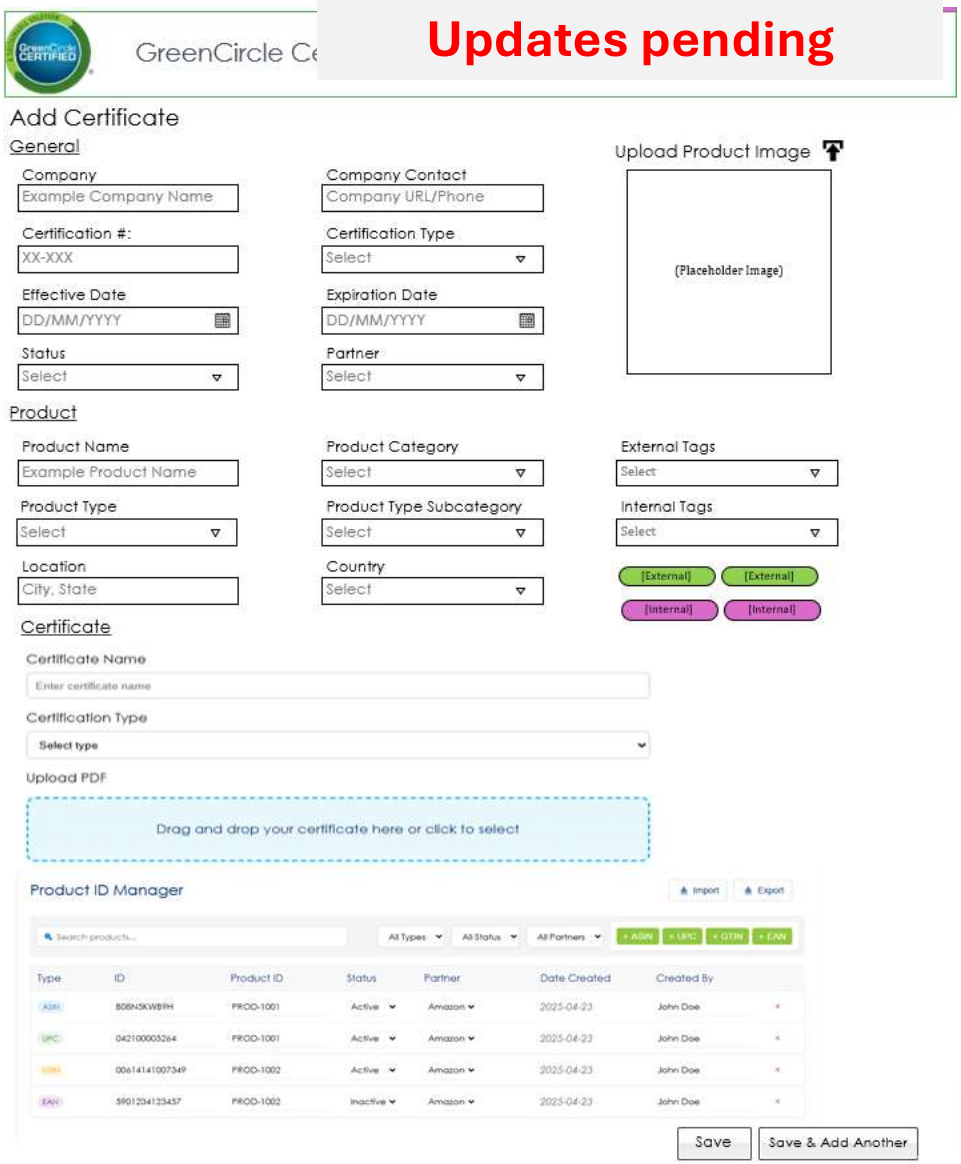

SW2 this doesn't make sense to list
Shawn West, 2025-03-13T23:07:48.878

SW3 What sort option are available?
Shawn West, 2025-03-13T23:08:33.413

Wireframe Notes – 3.3 – Add Certificate (GCC Only)

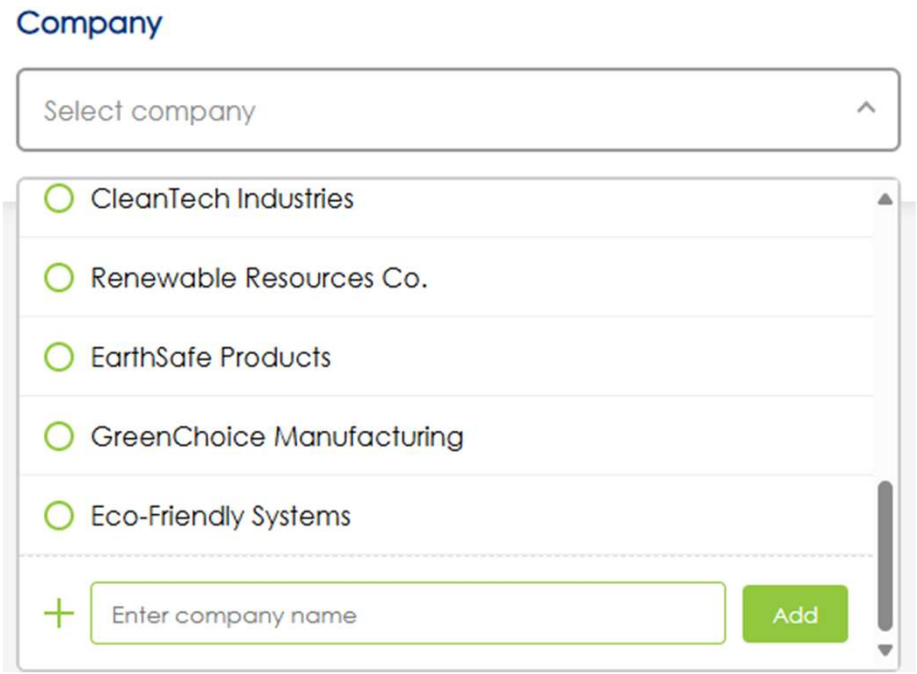

- Notes:
- Admin can add new product categories.
- Certification # will be auto generated by the database and created on the save **(As discussed prior, unless manually entered, you need instructional copy on the page for this like current db)**
- **New Field:** Partner: Amazon/Wayfair - required. **(Need to add option of none and multiselect)**
- ~~**New Field:** Status Type: to signify if a client doesn't want to move forward. (This was added based on meeting)~~
- Products will only show if they are associated with the certificate that is being displayed.
- Users can select from dropdown existing Products or add a new. Product Category, Type, and Subcategory are not editable on this page and are assigned when adding a new product.

- Update Screenshot, add record information.
- Remove image section
- Change Product ID Manager to Products
- Company Contact should be two different fields. URL and Email (Phone?)
  - Info should carry over from the Companies page fields, so it should not be open to edit here. When selecting company it would autopopulate.

Wireframe Notes – 3.3 – Add Certificate (GCC Only)

SW1

Notes:

- Example of Multi-select dropdown

Slide 49

SW1 Review documents for Clarity

Shawn West, 2025-06-11T00:45:33.886

Wireframe Notes – 3.3 – Add Certificate (GCC Only)

- This is the Add Certificate View. SW2
- All Internal View Data:: Certificate #, Certification Type, CSF Attributes, Status, Effective Date, Expiration Date, Company, Company Contact Email/URL, Product Name, Product Category, Product Type, Product Type Subcategory, Location, Country, External Tag, Internal Tag, ASIN, UPC, GTIN, EAN, Certificate Upload, Record Created Date, **Last Edited By,** Record Last Updated Date, Preview

- Ability to Add a Certificate with all Required Data Fields.
- **Which data fields are required to Add a Cert?
  - Cert Type, Status, Effective Date, Expiration Date, Company, Product Category (required when you have product name), Product Type (required when you have product name), Location, Country, Partner.
  - Need to make sure we have N/A option for Product Category, Product Type, Subcategory, Partner.
  - Cer # is required – but auto generated by DB if not manually entered. SW1
- Which data fields will be generated by the system after adding?
  - Just Cert number. It would pull in company contact fields from the Companies page. System also needs to automatically remove expired and inactive certs from public view.
- Ability to upload an image to use for the Product.
- **Should we incorporate Product Image?

Slide 50

SW1 Will not be something we do right away but could use later if it's there (but then would need different tile layout)

Shawn West, 2025-03-13T23:21:38.384

SW1 0 Not right now.

Shawn West, 2025-06-11T01:38:45.378

SW2 The repeat is to list what will be displayed on that page and by role.

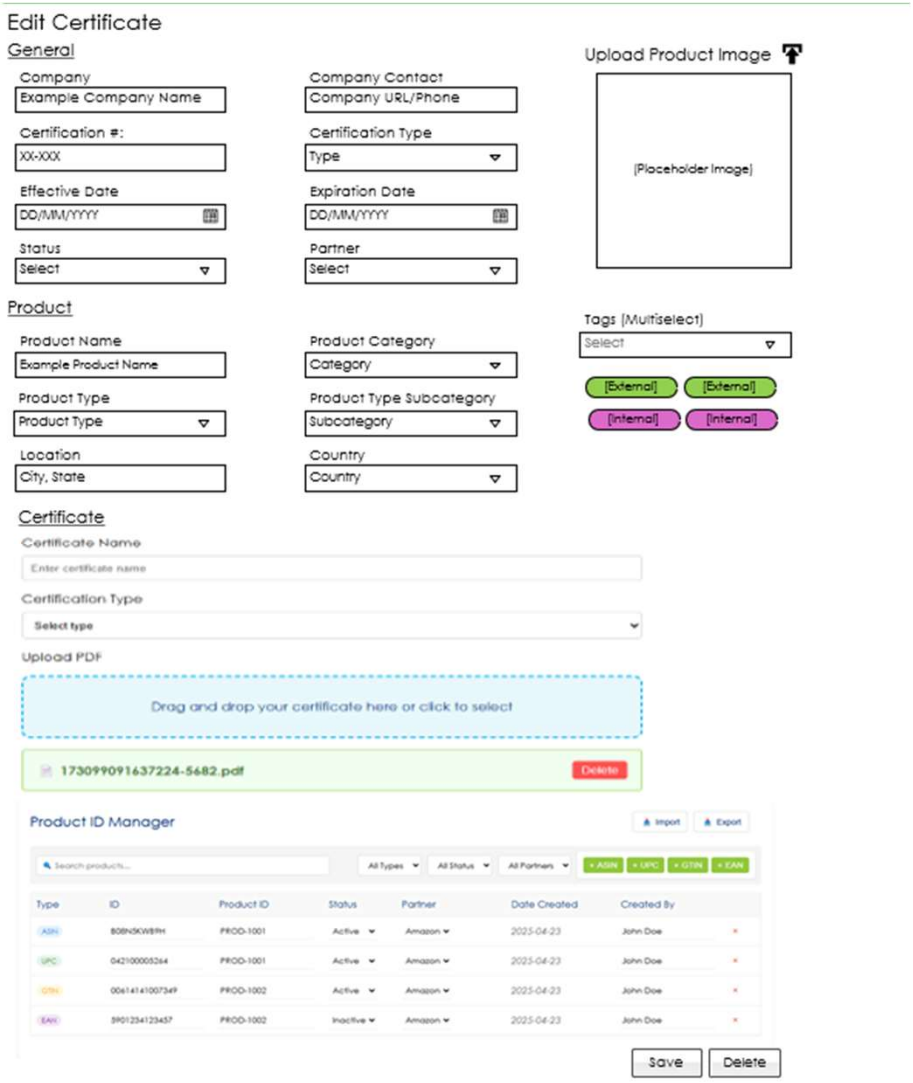

Shawn West, 2025-06-11T01:18:33.569

Wireframe Notes – 3.4 – Edit/Delete Certificate (GCC Only)

SW1

Updates pending

- Admin can add new product categories.
- Certification # will be auto generated by the database and created on the save
- **New Field:** Partner: Amazon/Wayfair - required.
- **New Field:** Status Type: to signify if a client doesn't want to move forward.
- This is the Edit/Delete Certificate View.
- All Internal View Data: Certificate #, Certification Type, CSF Attributes, Status, Effective Date, Expiration Date, Company, Company Contact Email/URL, Product Name, Product Category, Product Type, Product Type Subcategory, Location, Country, External Tag, Internal Tag, ASIN, UPC, GTIN, EAN, Certificate Upload, Record Created Date, Last Edited By, Record Last Updated Date, Preview
- Company Contact: separate into two URL/Email
- Ability to Edit/Delete the selected Certificate information and file.
- The Products section should only show products under the Cert# being viewed.
- Users can select from dropdown existing Products or add a new. Product Category, Type, and Subcategory are not editable on this page and are assigned when adding a new Product. (see current DB?)

Slide 51

SW1 This page is the same as Add with the exception of CRUD operations.

Per Carly: combine these to reduce confusion.
Shawn West, 2025-06-11T01:44:10.191

SW1

Wireframe Notes – 5.0 – Companies & Products

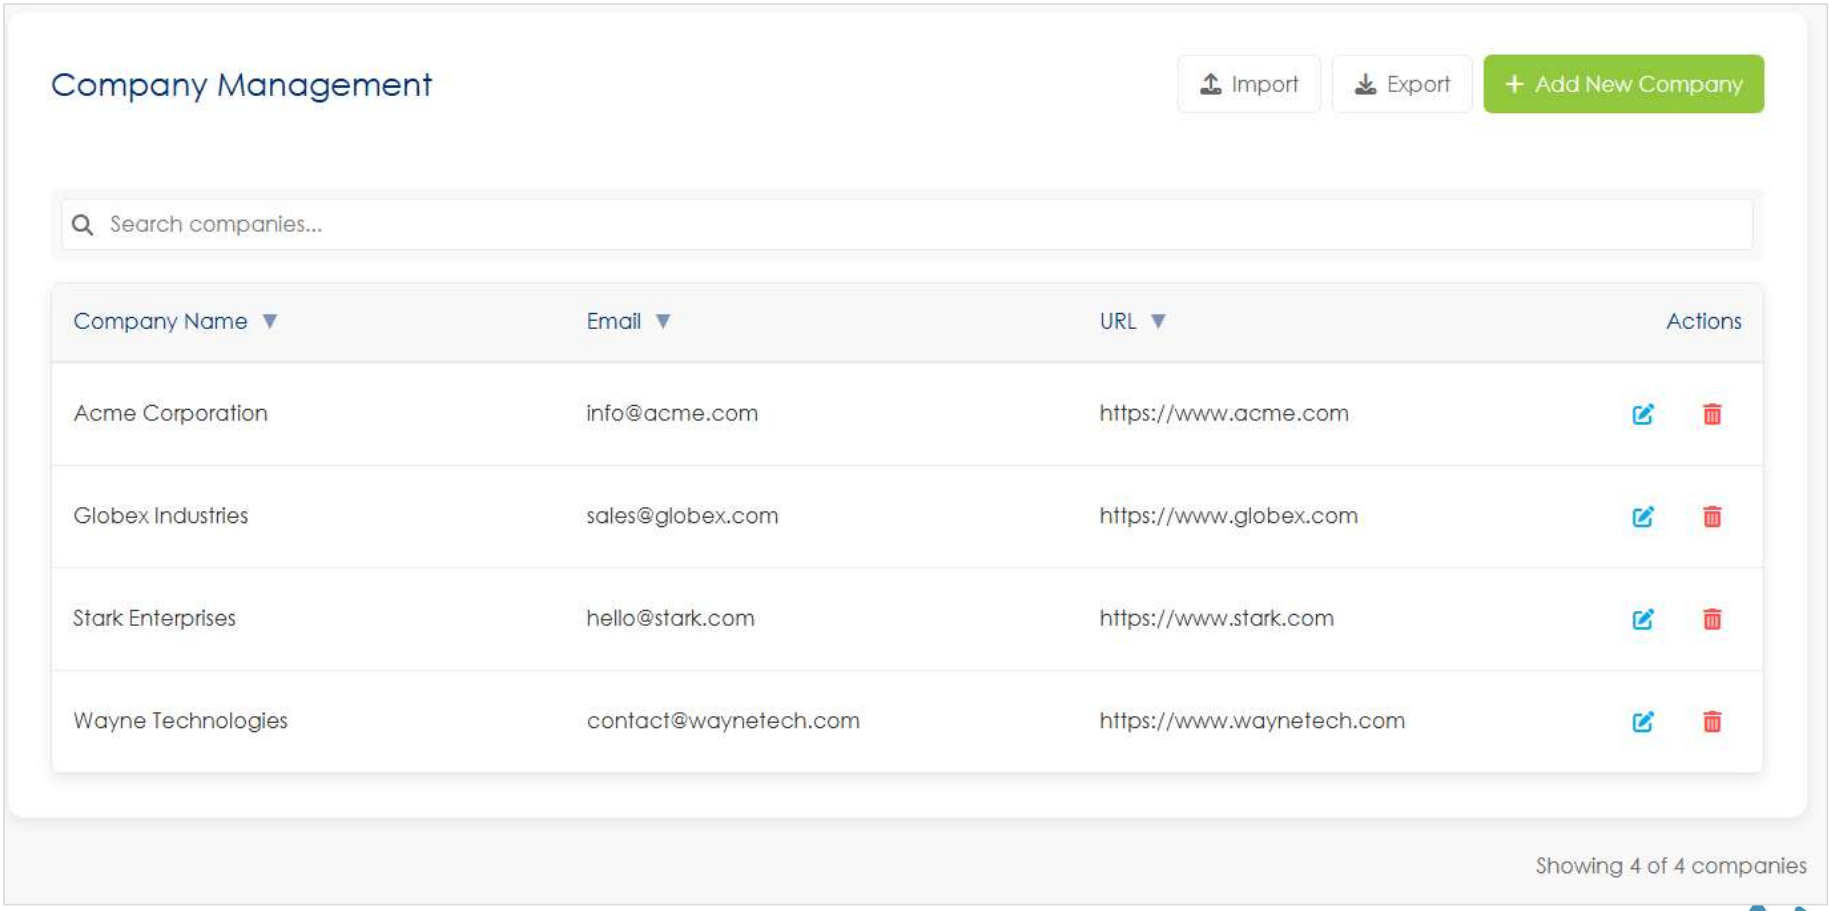

- Navigation only, not a page.

Slide 52

SW1 Add the metrics that will be attached, GCC wants to know what would these be?
Shawn West, 2025-03-14T20:45:19.741

Wireframe Notes – 5.1 – Companies

- Required Fields
- Company Name - Required dropdown with add capability (as referenced in Cert Upload Fields)
- Company Contact Email - Separate field from URL
- Company Contact URL - Separate field from Email

Wireframe Notes – 5.1 – Companies

Data Integration & Auto-Population

- Certificate Auto-Population: Company information from the Company Management screen should auto-populate when creating/editing certificates
- Field Mapping: When selecting a company during certificate creation, Email and URL fields auto-populate and are not editable on the certificate form
- Contact Information Usage: Only Email and URL are used as contact options on certificates (Phone field eliminated)

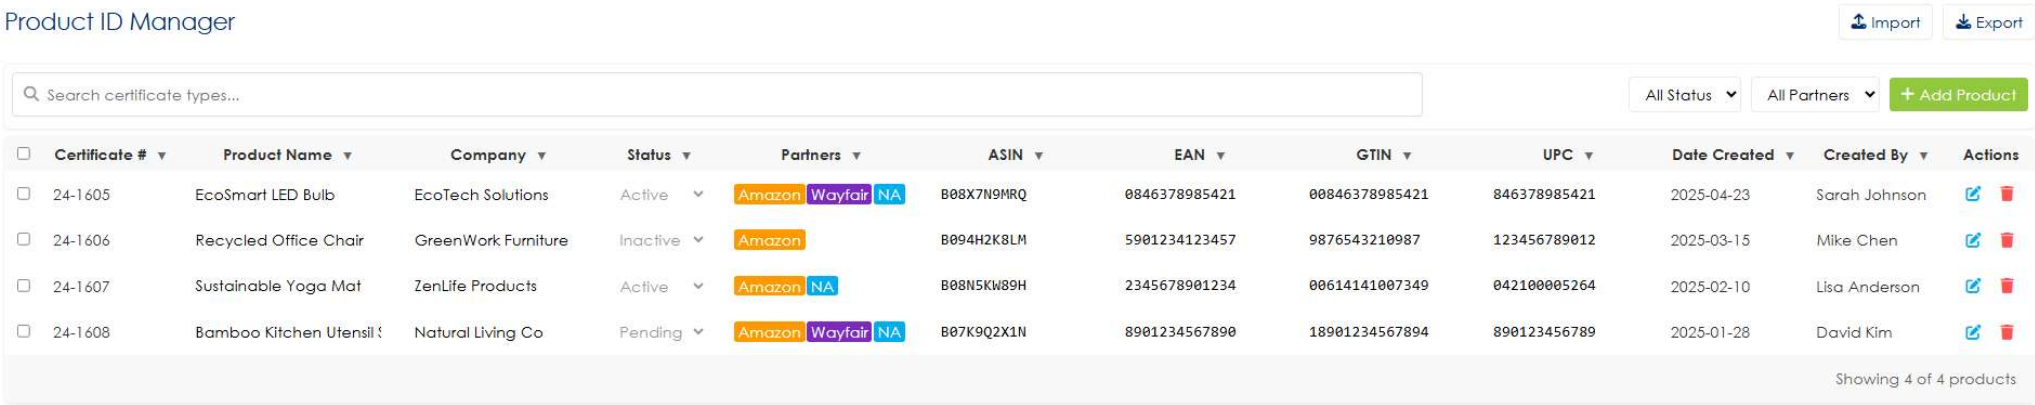

Import/Export Behavior

- Smart Import Logic: Import compares existing data and only uploads new records
- Update Handling: If existing Certificate # is uploaded, only changed fields are updated
- Data Integrity: Import will not override current data unless changes are detected
- Audit Trail: History table tracks all changes made through imports or manual updates

Key Decisions Made

- Phone Field Eliminated: Replaced with URL field for certificate contact information
- Two Contact Fields Only: Email and URL are the sole contact options
- Auto-Population Confirmed: Company data from management screen carries over to certificates
- Import Strategy: Compare-and-update approach prevents data loss

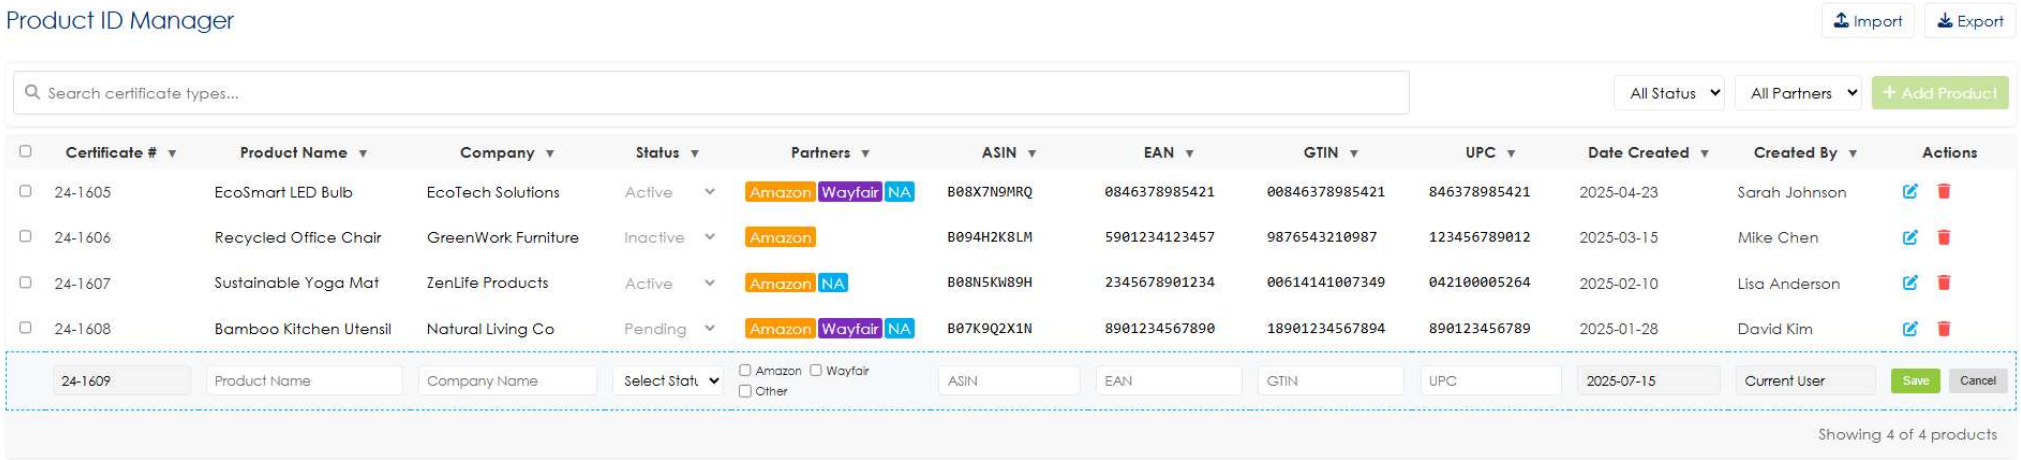

Wireframe Notes – 5.2 – Products

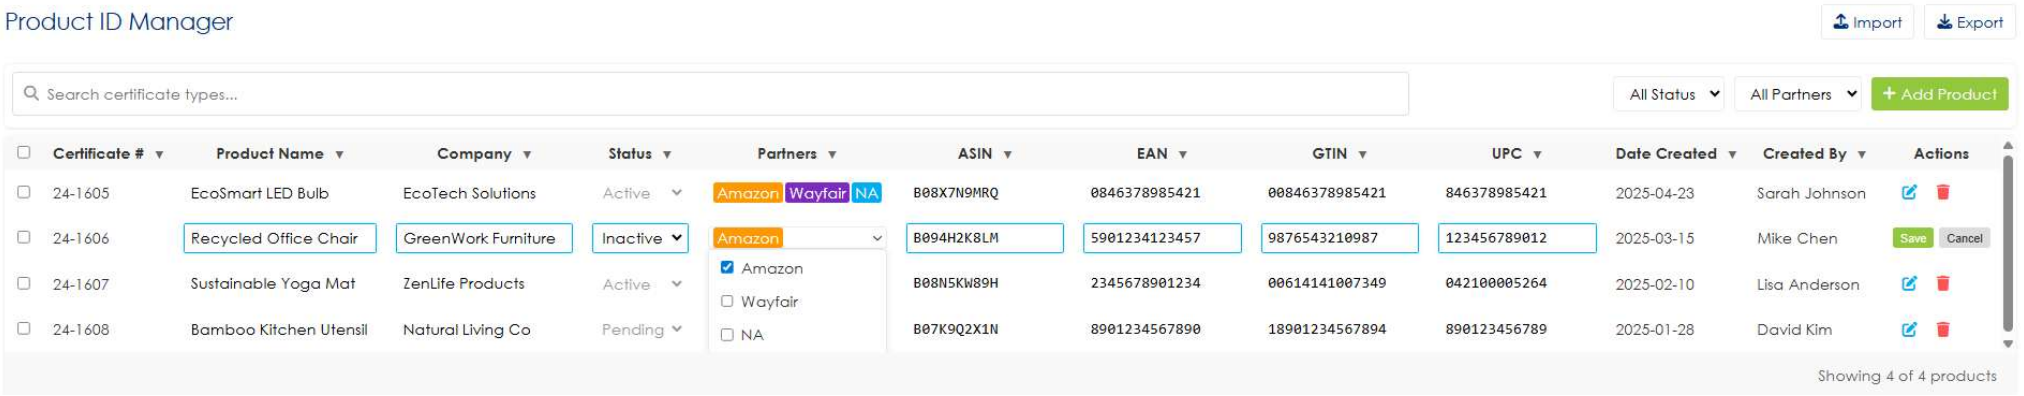

Notes:

- Admin users see: All buttons (Import, Export, Add Product), edit/delete actions, bulk operations
- Partner/Client users would see: Read-only view with no administrative functions
- Product identifier management for multiple types: ASIN, UPC, GTIN, and EAN
- Search functionality to quickly find products
- Filtering options by type, status, and partners
- Status tracking (Active/Inactive) for each product ID
- Partner association (currently showing Amazon)
- Creation date and creator tracking
- Import and export capabilities for bulk management
- Adding new identifiers with dedicated buttons for each type
- Linking multiple identifier types to the same product ID (as shown with PROD-1001 and PROD-1002)
- Table view with deletion options (x button) for each entry

Wireframe Notes – 5.2 – Products (Add)

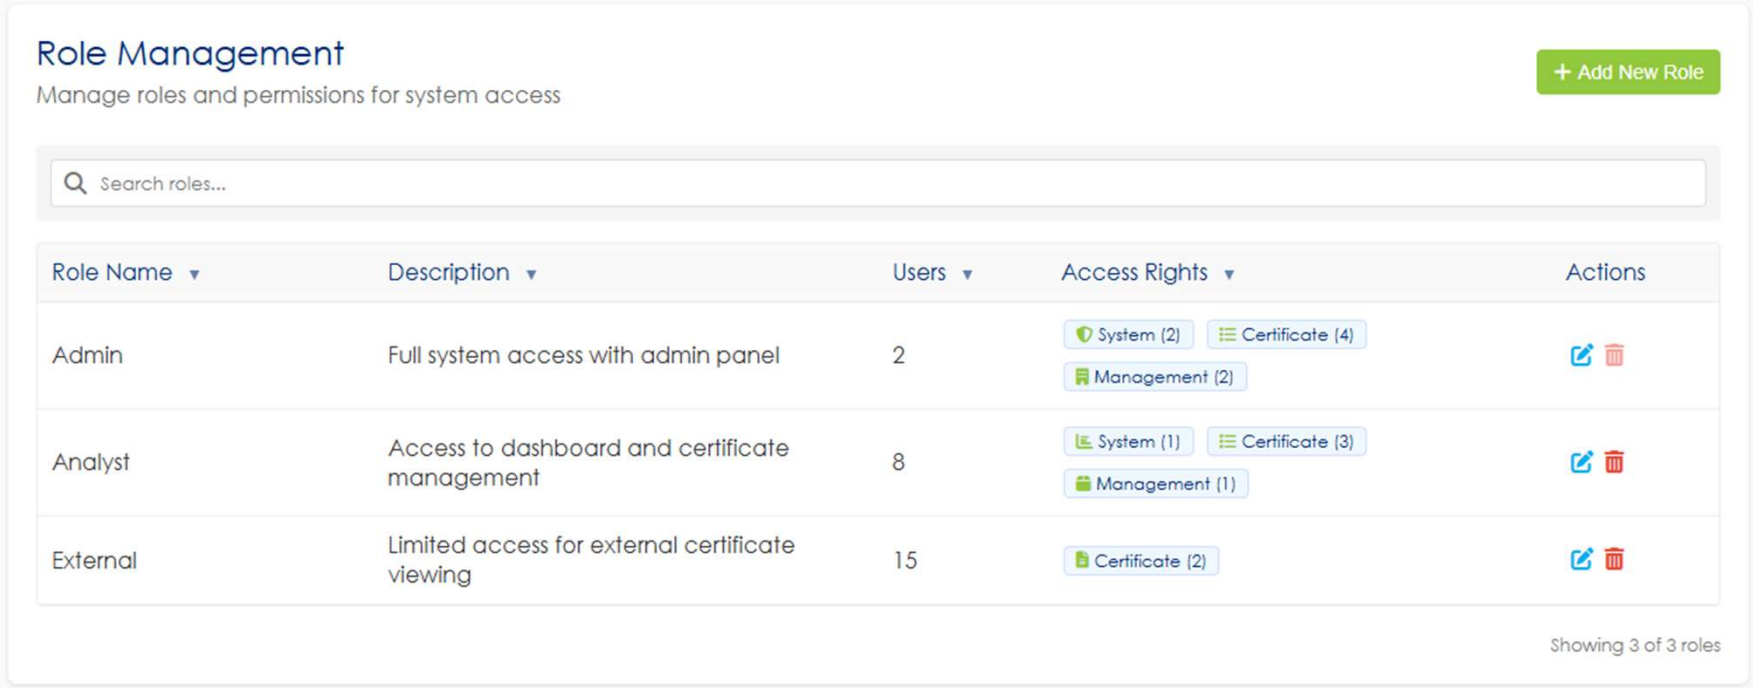

Wireframe Notes – 5.2 – Products (Edit)

Wireframe Notes – 7.0 – Administration

- Admin Section does not have a main landing page.

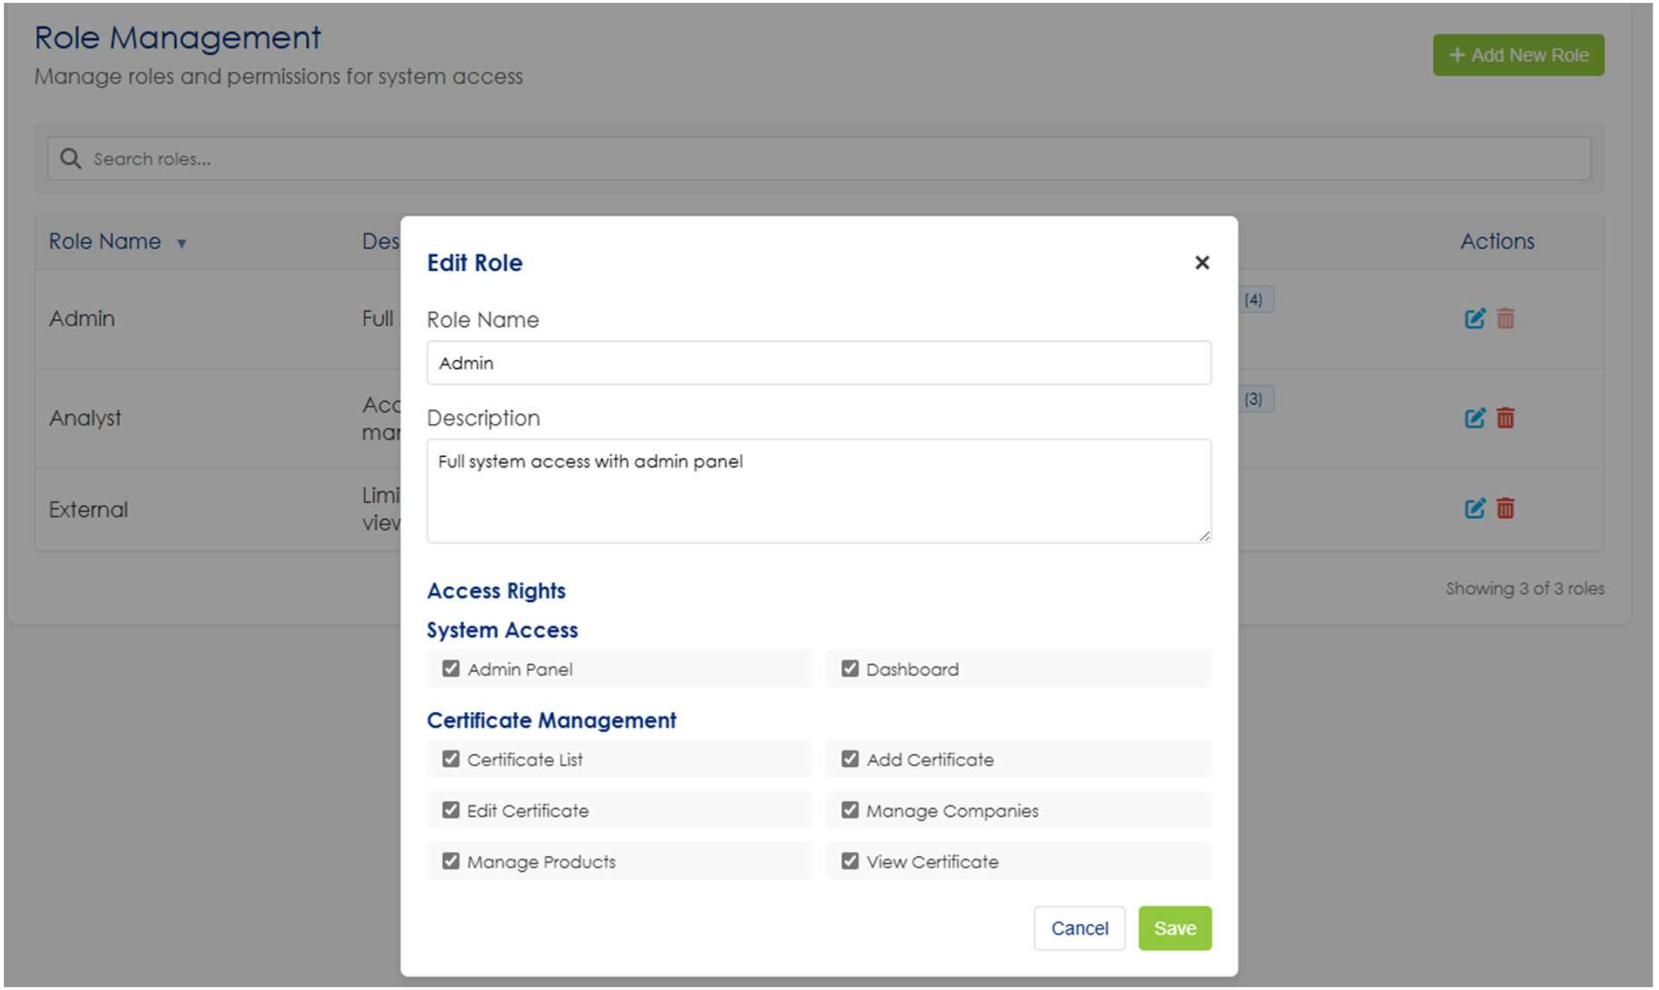

Wireframe Notes – 7.1 – Role Management

- This is the Role Management (Page Level) Admin View.
- Ability to Manage which roles have access to which pages of the site.
- Ability to cancel changes.
- Admin Users have access to all pages by default.
- Delete disabled for Admin, Admin Panel checkbox disabled for Admin.

Wireframe Notes – 7.1.1 – CRUD Role

Slide 60

SW1 Certificate Management:
- REVIEW: May need to extend this to view products vs manage based on giving access to products to clients and partners.
Shawn West, 2025-06-11T03:13:51.580

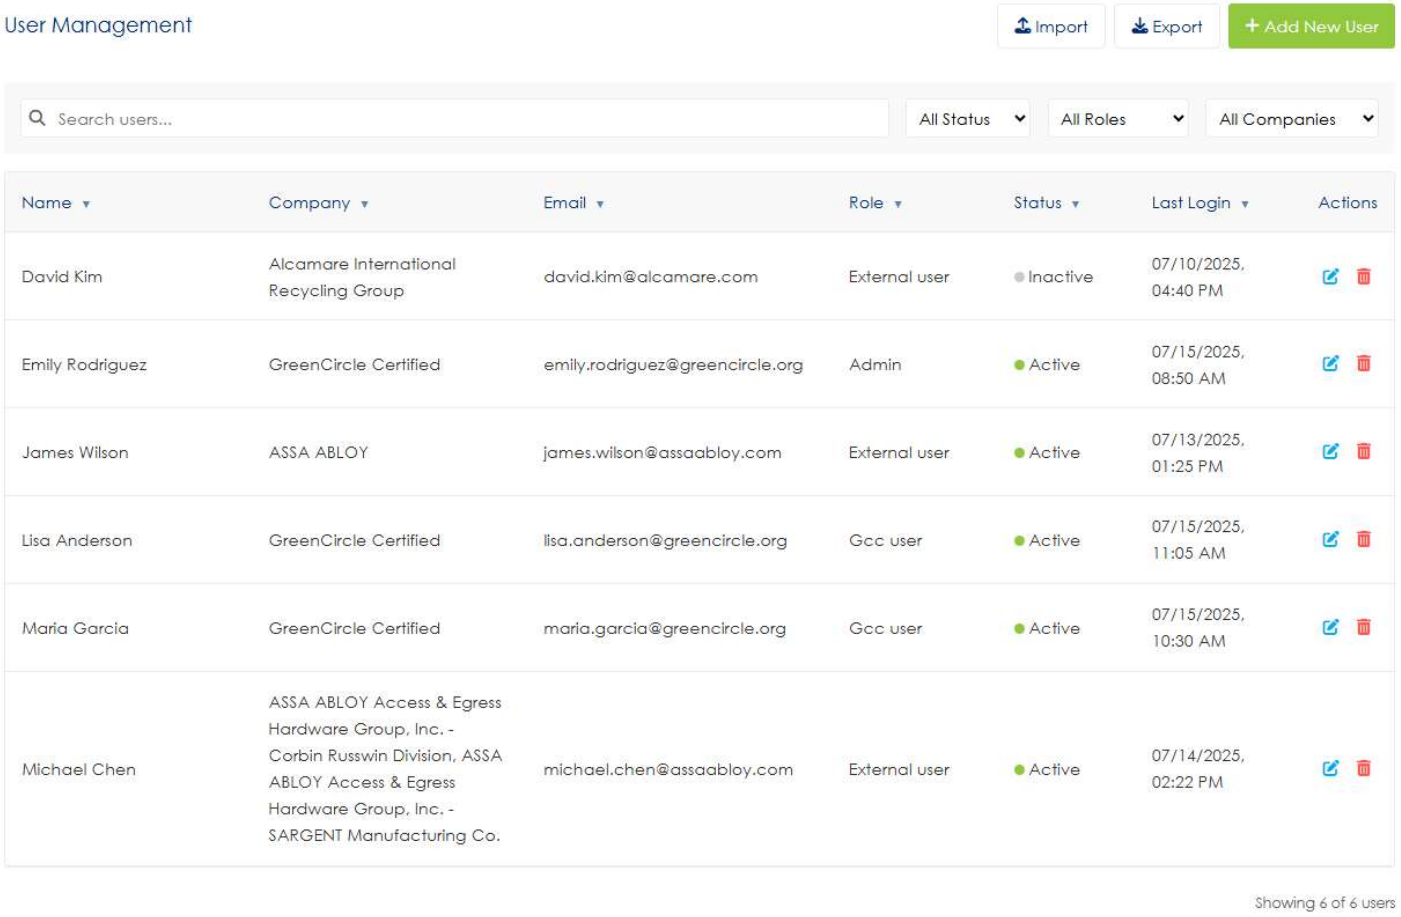

SW1 0 View Certificate - with it being public, do we really need it listed?
Shawn West, 2025-06-11T03:14:47.753

SW1 1 DISCUSS: Adding Status access (can they only see active certs, expired, confidential, etc.)
Shawn West, 2025-06-11T03:15:46.258

SW1 2 How is field access handled by role user?
Shawn West, 2025-06-11T03:18:49.218

SW1

Wireframe Notes – 7.2 – User Management

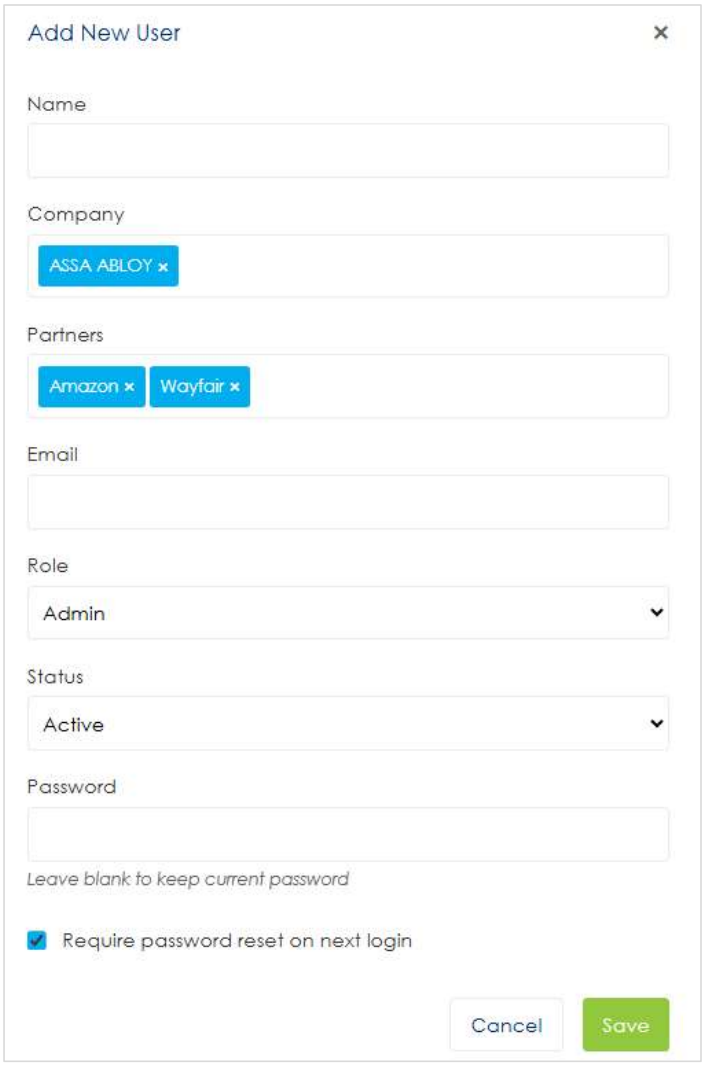

- This is the Users (Roles) Admin View.
- Ability to Add a new User.
- Ability to Edit a selected current User. an only Edit one user at a time. Ability to navigate between admin screens via navigation.

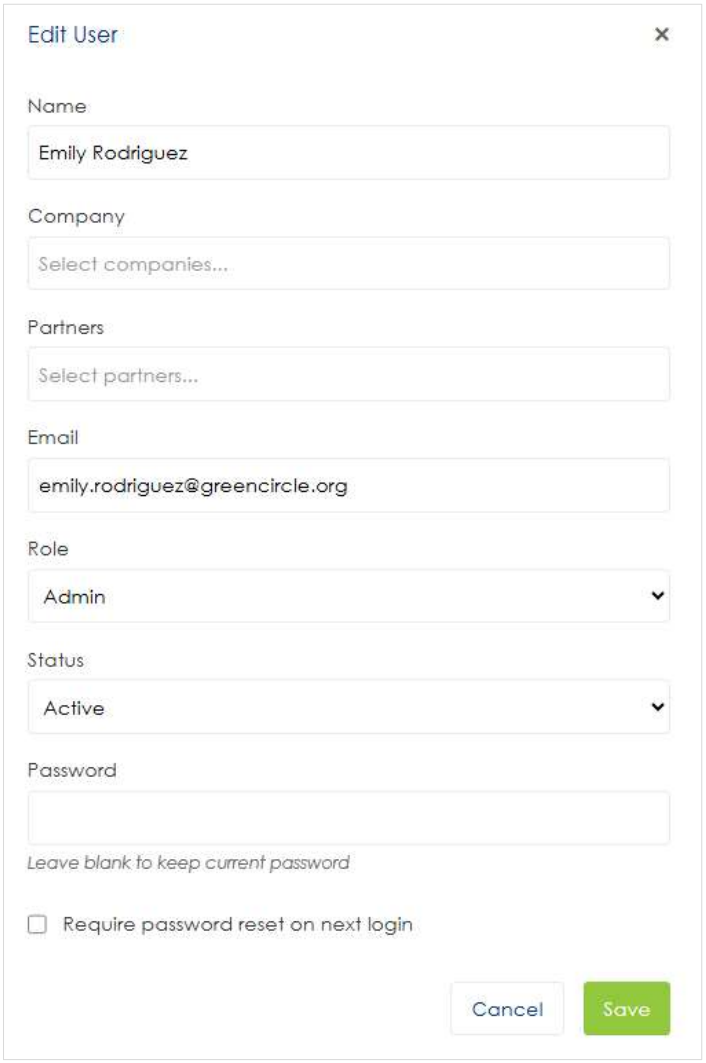

Slide 61

SW1 Add Column Company between Name and Email.
Shawn West, 2025-06-11T04:54:49.973

SW1

Wireframe Notes – 7.2.1 – CRUD User

Method	Description	Security Level	Recommended
TOTP Authenticator	Google Authenticator, Microsoft Authenticator, Authy (via QR code/secret)	High	Default
SMS OTP	One-time code sent via text message	Medium	Optional
Email OTP	One-time code sent to email	Medium	Optional
Backup Codes	Downloadable list of one-time recovery codes	High	Required upon setup

For Admin Role

- Enforce TOTP
- Disallow SMS-only
- Require periodic re-authentication for critical operations

Slide 63

Shawn West, 2025-06-11T04:54:49.973

SW1

Wireframe Notes – 7.2.1 – CRUD User

Data to Collect and Securely Store:

Field	**Use**
email	Login and recovery
phone_number (optional)	For SMS OTP
totp_secret (encrypted)	For TOTP verification (base32-encoded)
recovery_codes[]	One-time recovery (hashed or encrypted)
2fa_enabled	Boolean toggle
2fa_method	email, sms, totp
mfa_verified_at	Timestamp of last verification
is_admin	Flag for admin access (to enforce stricter MFA policies)
device_tokens[] (opt.)	For device trust or remembered sessions

ANUKI CONSULTING

Wireframe Notes – 7.5.2 – Product Types (Tree View)

- This is the Product Types Admin View.
- Ability to Add Product Categories, Product Types, and Product Type Subcategories.
- Ability to Edit/Delete Selected Line Item.
- One-to-Many relationship between Product Types, and Product Type Subcategories.

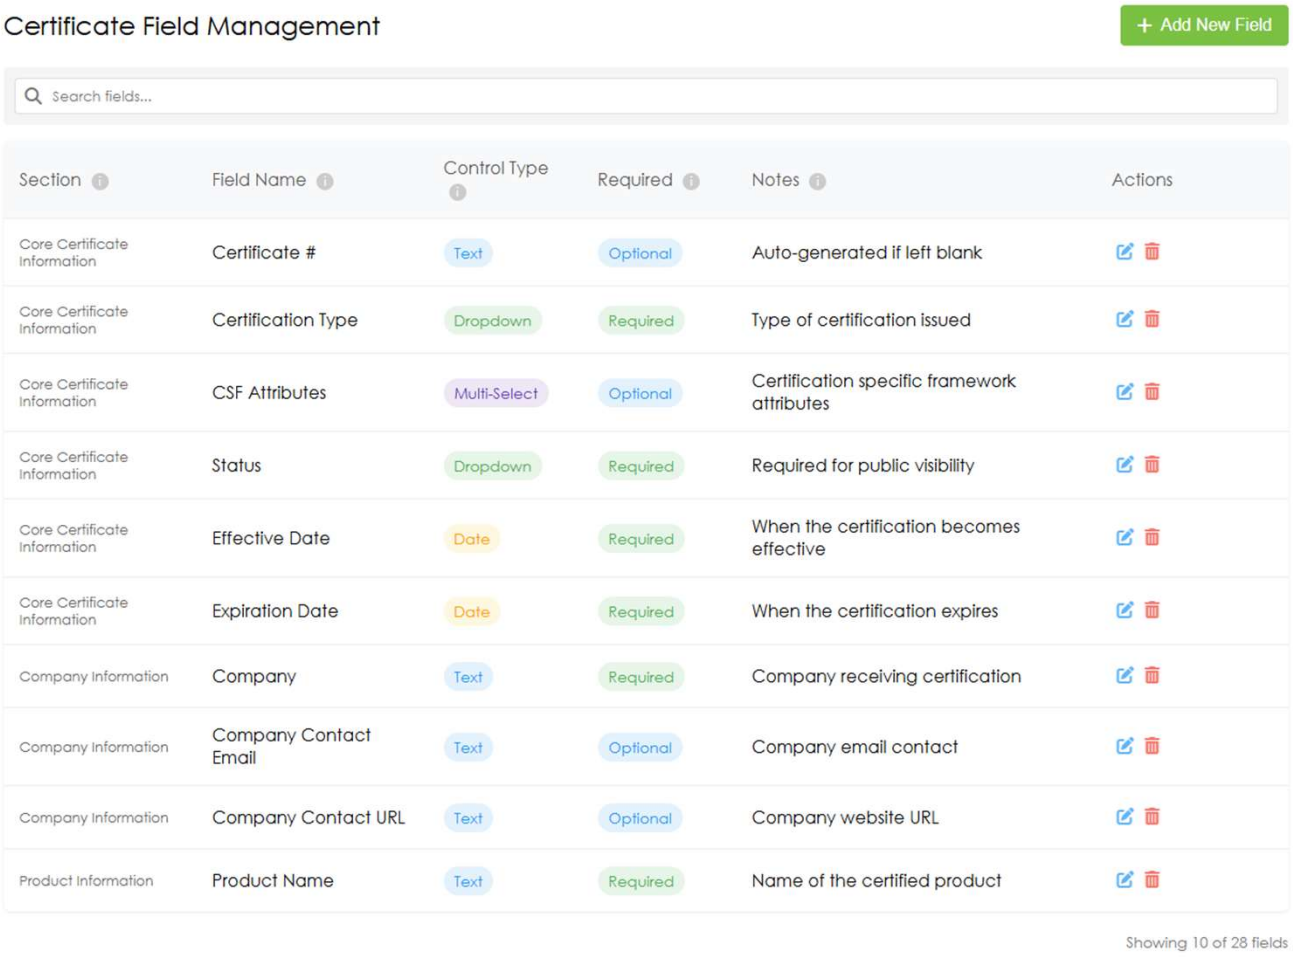

Wireframe Notes – 7.5.2 – Product Types (Tree View – Edit)

Wireframe Notes – 7.5.2 – Product Types (Table View)

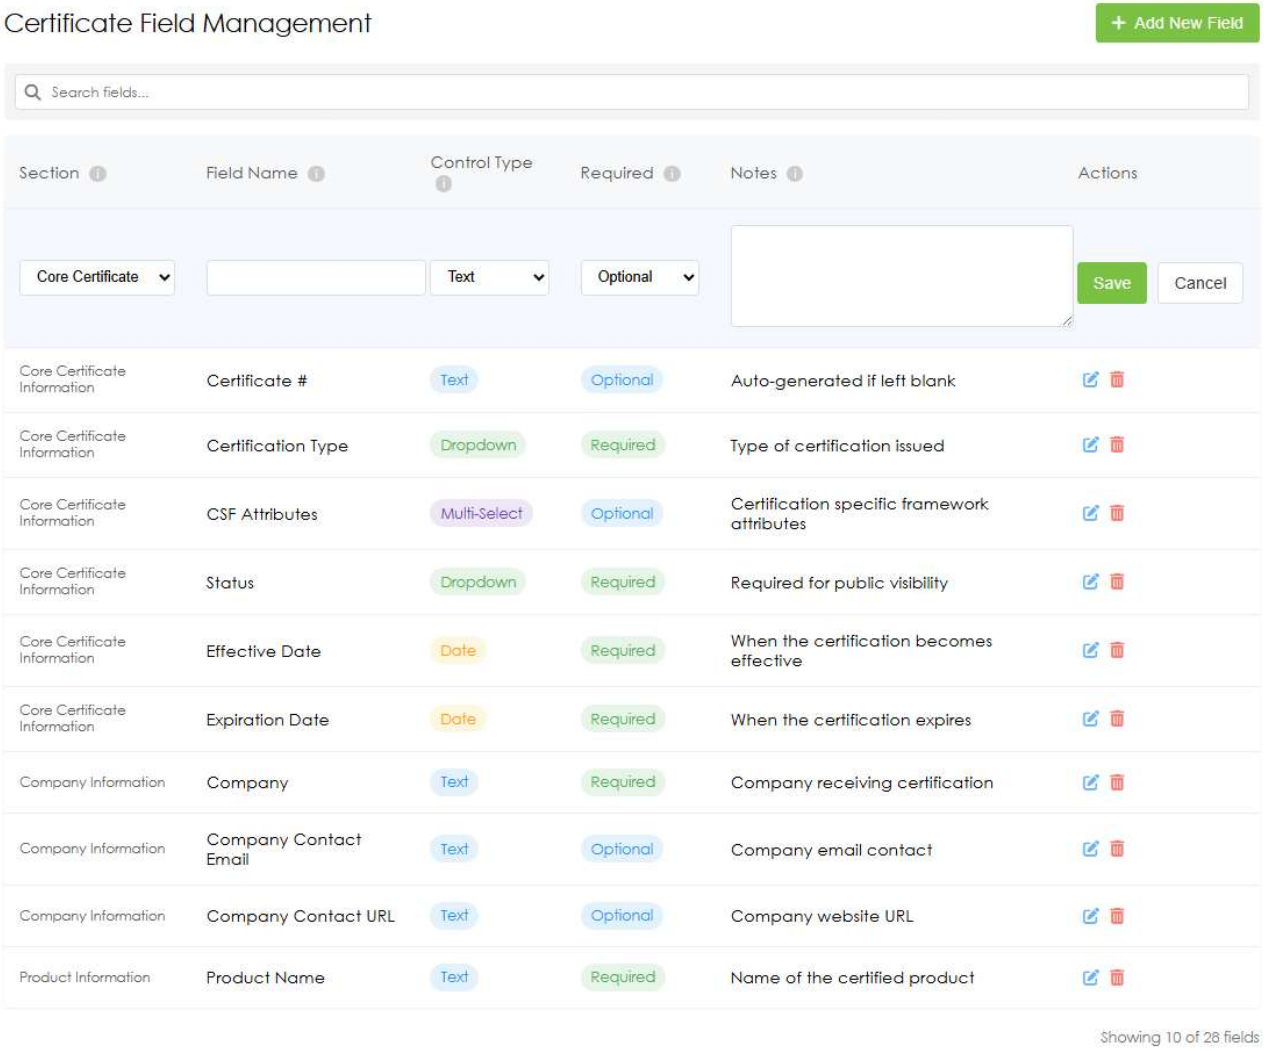

Wireframe Notes – 7.5.3 – Certification Field Management

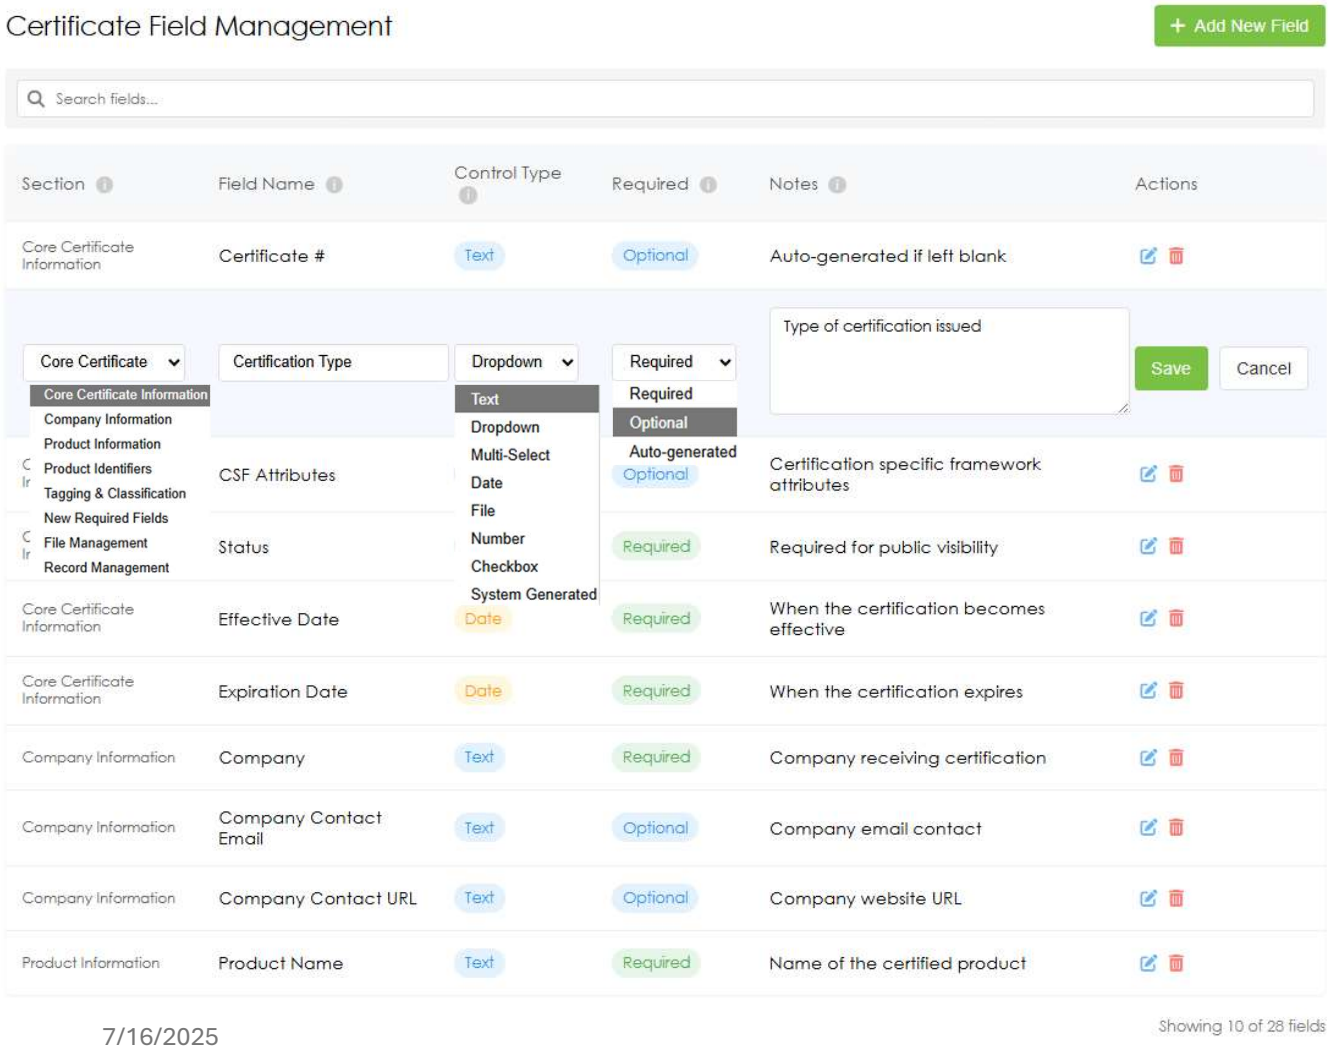

Fields:
Public Users: Certificate #, Certification Type, Effective Date, Expiration Date, Company, Company Contact Email/URL, Product Name, Product Category, Product Type, Product Type Subcategory, Location, Country, External Tag

- External/Client Users: All public fields plus CSF Attributes, Status, Internal Tag, ASIN, UPC, GTIN, EAN, Certificate Upload
- Analyst/Admin Users: All fields including Record Information (Created Date, Last Updated Date, Last Edited By)
- Fields auto-append to bottom of their assigned section for logical grouping

Wireframe Notes – 7.5.3 – Certification Field Management (Add)

Wireframe Notes – 7.5.3 – Certification Field Management

Field Visibility by User Role

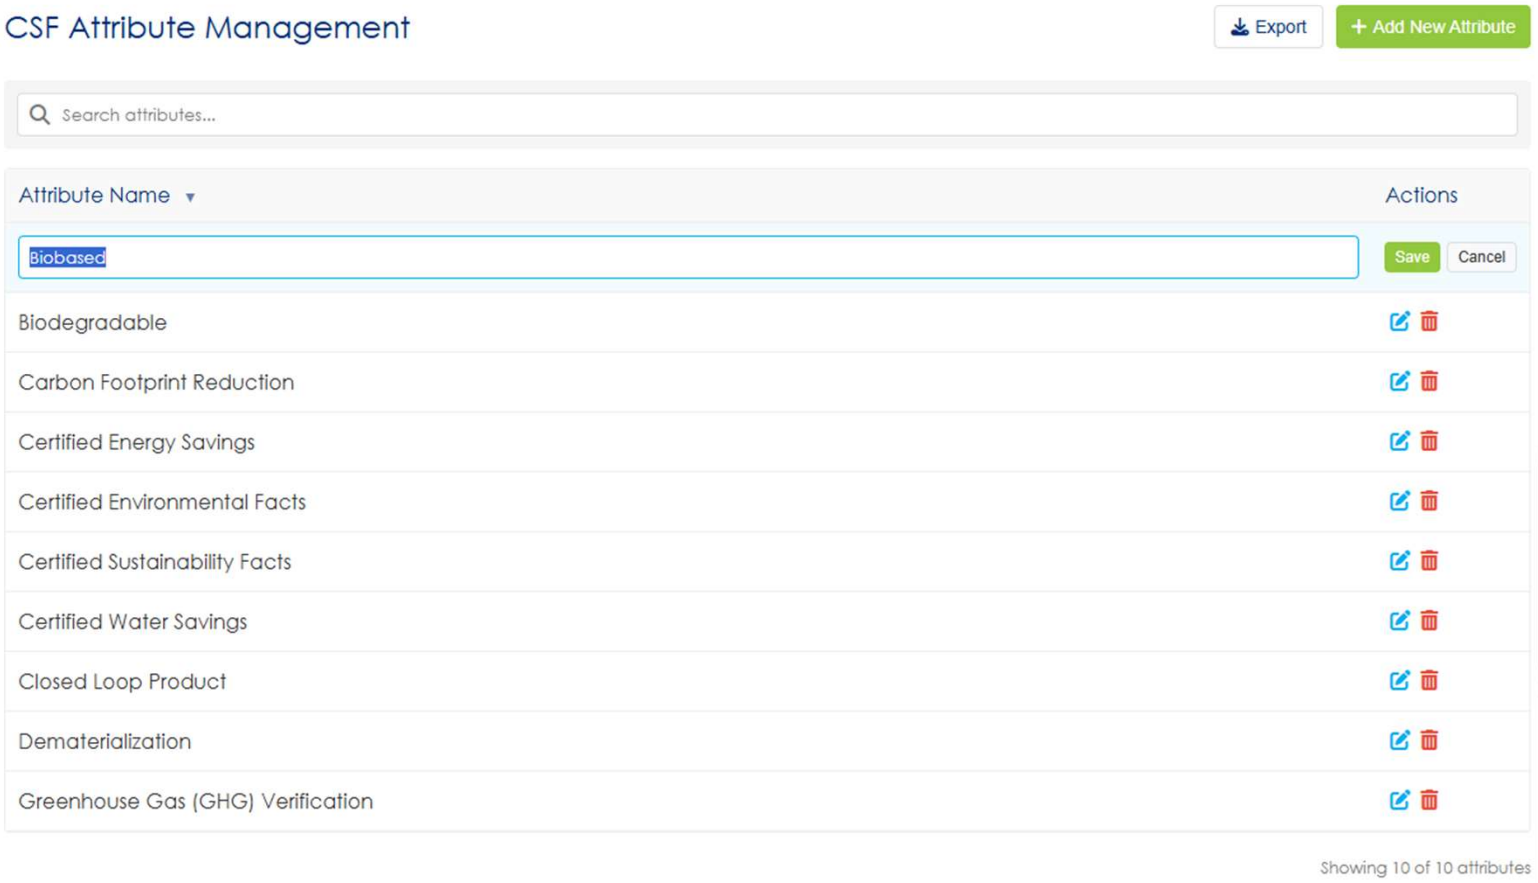

- Public Users: Certificate #, Certification Type, Effective Date, Expiration Date, Company, Company Contact Email/URL, Product Name, Product Category, Product Type, Product Type Subcategory, Location, Country, External Tag
- External/Client Users: All public fields plus CSF Attributes, Status, Internal Tag, ASIN, UPC, GTIN, EAN, Certificate Upload
- Analyst/Admin Users: All fields including Record Information (Created Date, Last Updated Date, Last Edited By)

- Fields auto-append to bottom of their assigned section for logical grouping

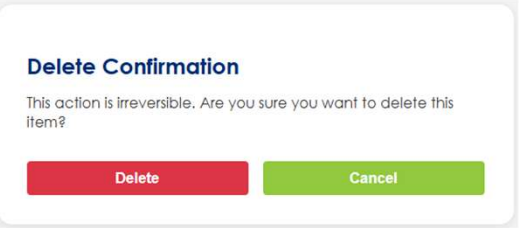

Wireframe Notes – 7.5.3 – Certification Field Management

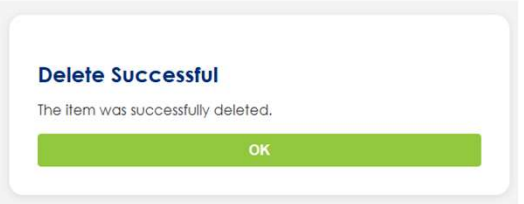

Section	Field Name	Control Type	Required	Notes
Core Certificate Information	Certificate #	Text	Optional	Auto-generated if left blank
Core Certificate Information	Certification Type	Dropdown	Required	Type of certification issued
Core Certificate Information	CSF Attributes	Multi-Select	Optional	Certification specific framework attributes
Core Certificate Information	Status	Dropdown	Required	Required for public visibility
Core Certificate Information	Effective Date	Date	Required	When the certification becomes effective
Core Certificate Information	Expiration Date	Date	Required	When the certification expires
Company Information	Company	Text	Required	Company receiving certification
Company Information	Company Contact Email	Text	Optional	Company email contact
Company Information	Company Contact URL	Text	Optional	Company website URL
Product Information	Product Name	Text	Required	Name of the certified product
Product Information	Product Category	Dropdown	Required	Main category of the product
Product Information	Product Type	Dropdown	Required	Specific type within category
Product Information	Product Type Subcategory	Dropdown	Required	Subcategory within product type
Product Information	Location	Text	Optional	Manufacturing or certification location
Product Information	Country	Dropdown	Required	Country of origin
Product Identifiers	ASIN	Text	Optional	Amazon Standard Identification Number
Product Identifiers	UPC	Text	Optional	Universal Product Code
Product Identifiers	GTIN	Text	Optional	Global Trade Item Number
Product Identifiers	EAN	Text	Optional	European Article Number
Tagging & Classification	External Tag	Multi-Select	Optional	External classification tags
Tagging & Classification	Internal Tag	Multi-Select	Optional	Internal classification tags
New Required Fields	Partner	Multi-Select	Required	Amazon/Wayfair/None/Other partners
New Required Fields	Status Type	Dropdown	Optional	To signify if client doesn't want to move forward
File Management	Certificate Upload	File	Optional	Upload certificate document
File Management	Preview	System Generated	Auto	Certificate preview/thumbnail
Record Management	Record Created Date	Date	Auto-generated	When record was created
Record Management	Record Last Updated Date	Date	Auto-generated	When record was last modified
Record Management	Last Edited By	System Generated	Auto	User who last edited the record

Wireframe Notes – 7.5.4 – CSF Attributes

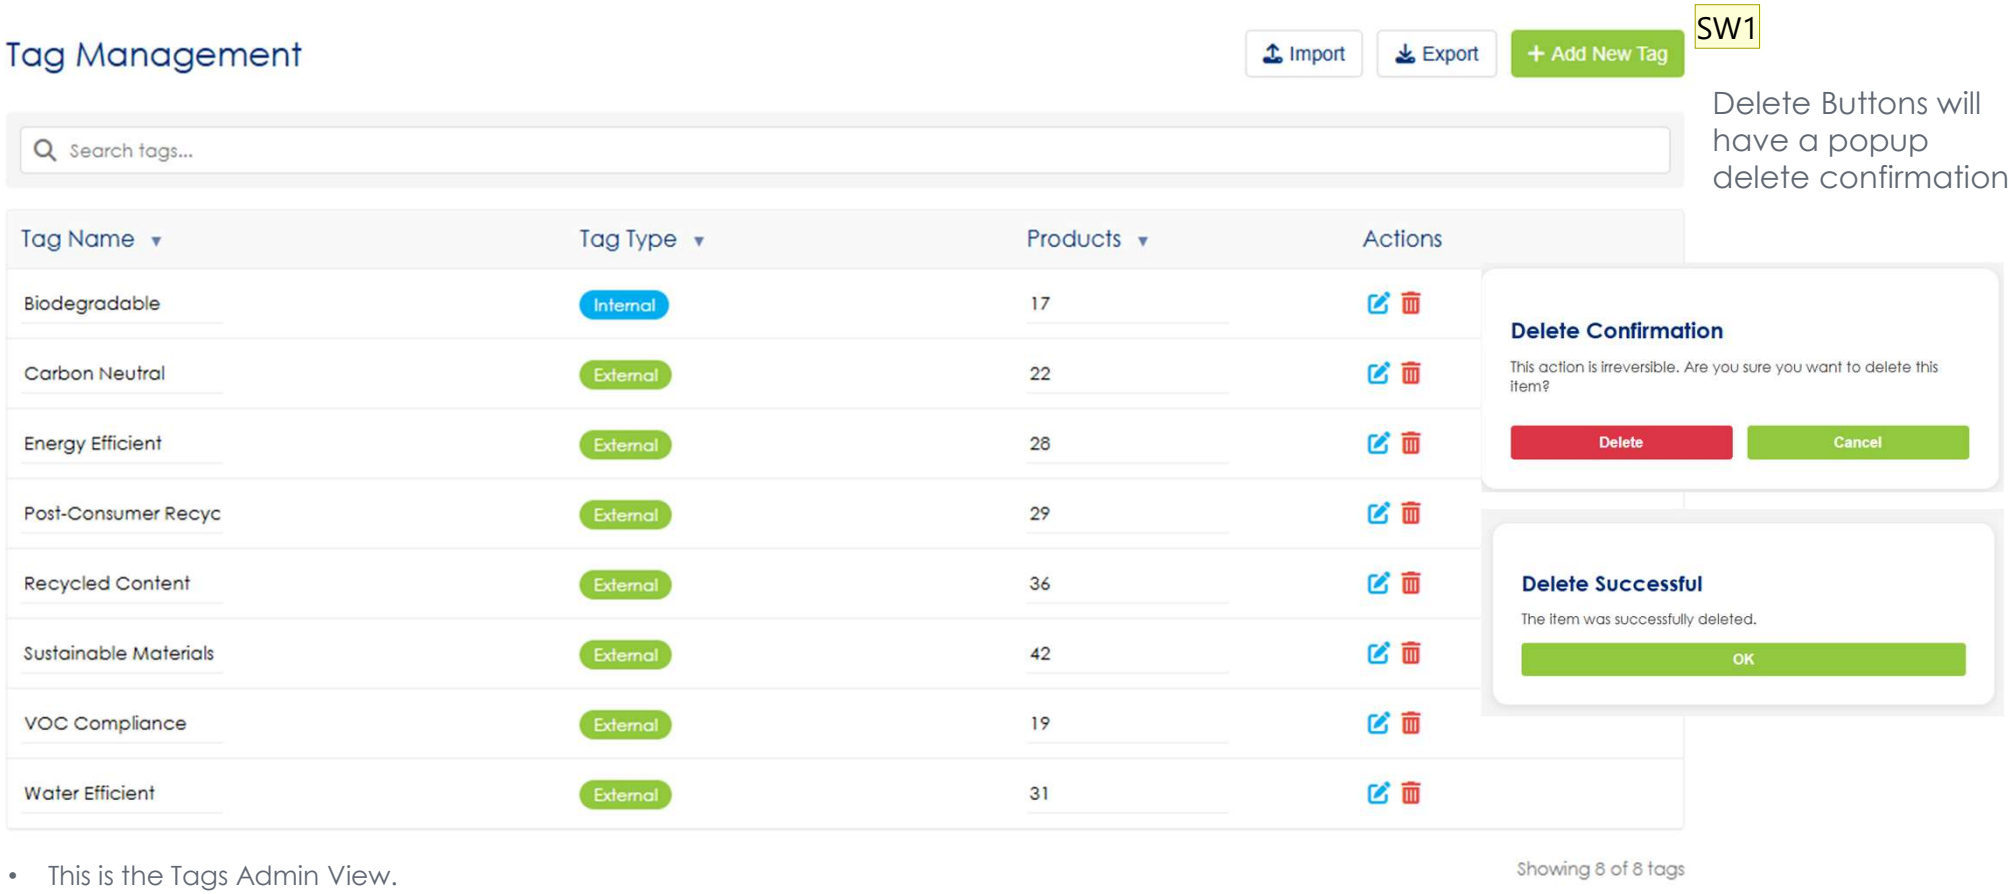

- This is the CSF Attributes View.
- Only Admins can edit this page.
- Ability to Add CSF Attributes
- Ability to Edit/Delete Selected CSF Attributes.
- All Grids have inline edit. The screenshot below shows example of the inline edit.
- Delete Buttons will have a popup delete confirmation

Wireframe Notes – 7.5.5 – Tags

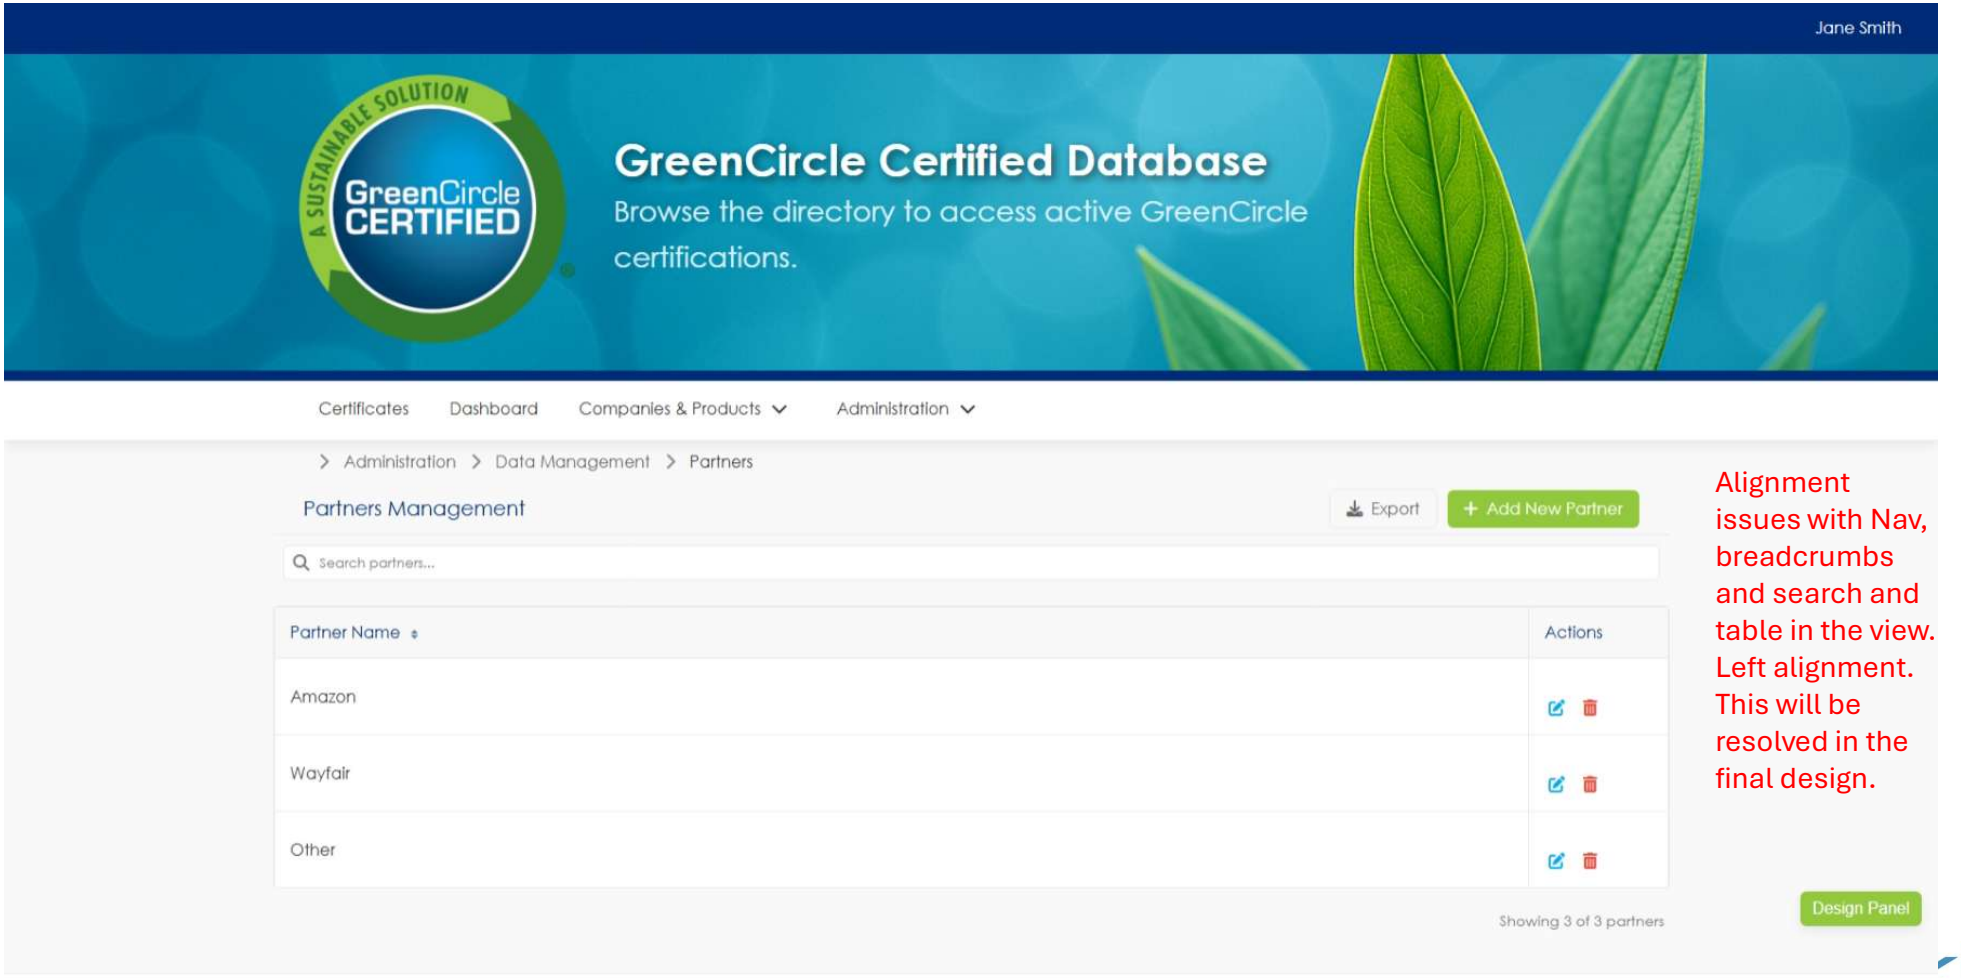

- This is the Tags Admin View.
- Ability to Add, Edit/Delete Selected Tags.
- Ability to sort tags.

Slide 82

SW1 Remove Import Button

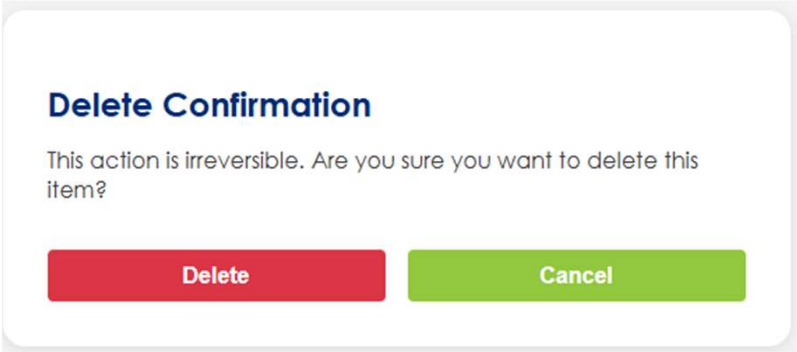

Shawn West, 2025-06-11T12:18:39.373

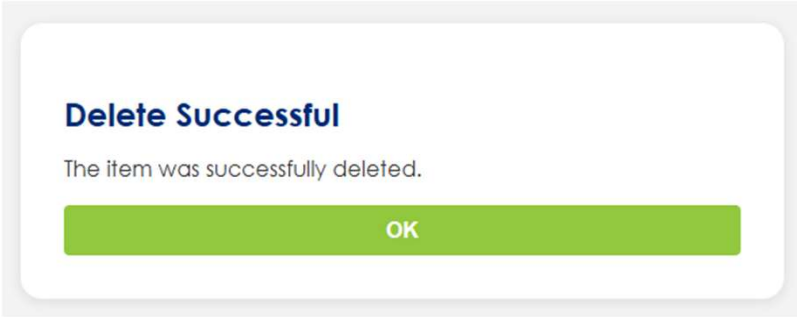

Wireframe Notes – 7.5.6 – Partners

Alignment issues with Nav, breadcrumbs and search and table in the view. Left alignment. This will be resolved in the final design.

Wireframe Notes – 7.5.6 – Partners

- This is the Partners Admin View.
- Ability to Add new Partners.
- Ability to Edit/Delete Selected Partners.
- Ability to sort alphabetical order, export tags.
