GreenCircle Certified
Database Project

ANUKI CONSULTING

Project Timeline Updates

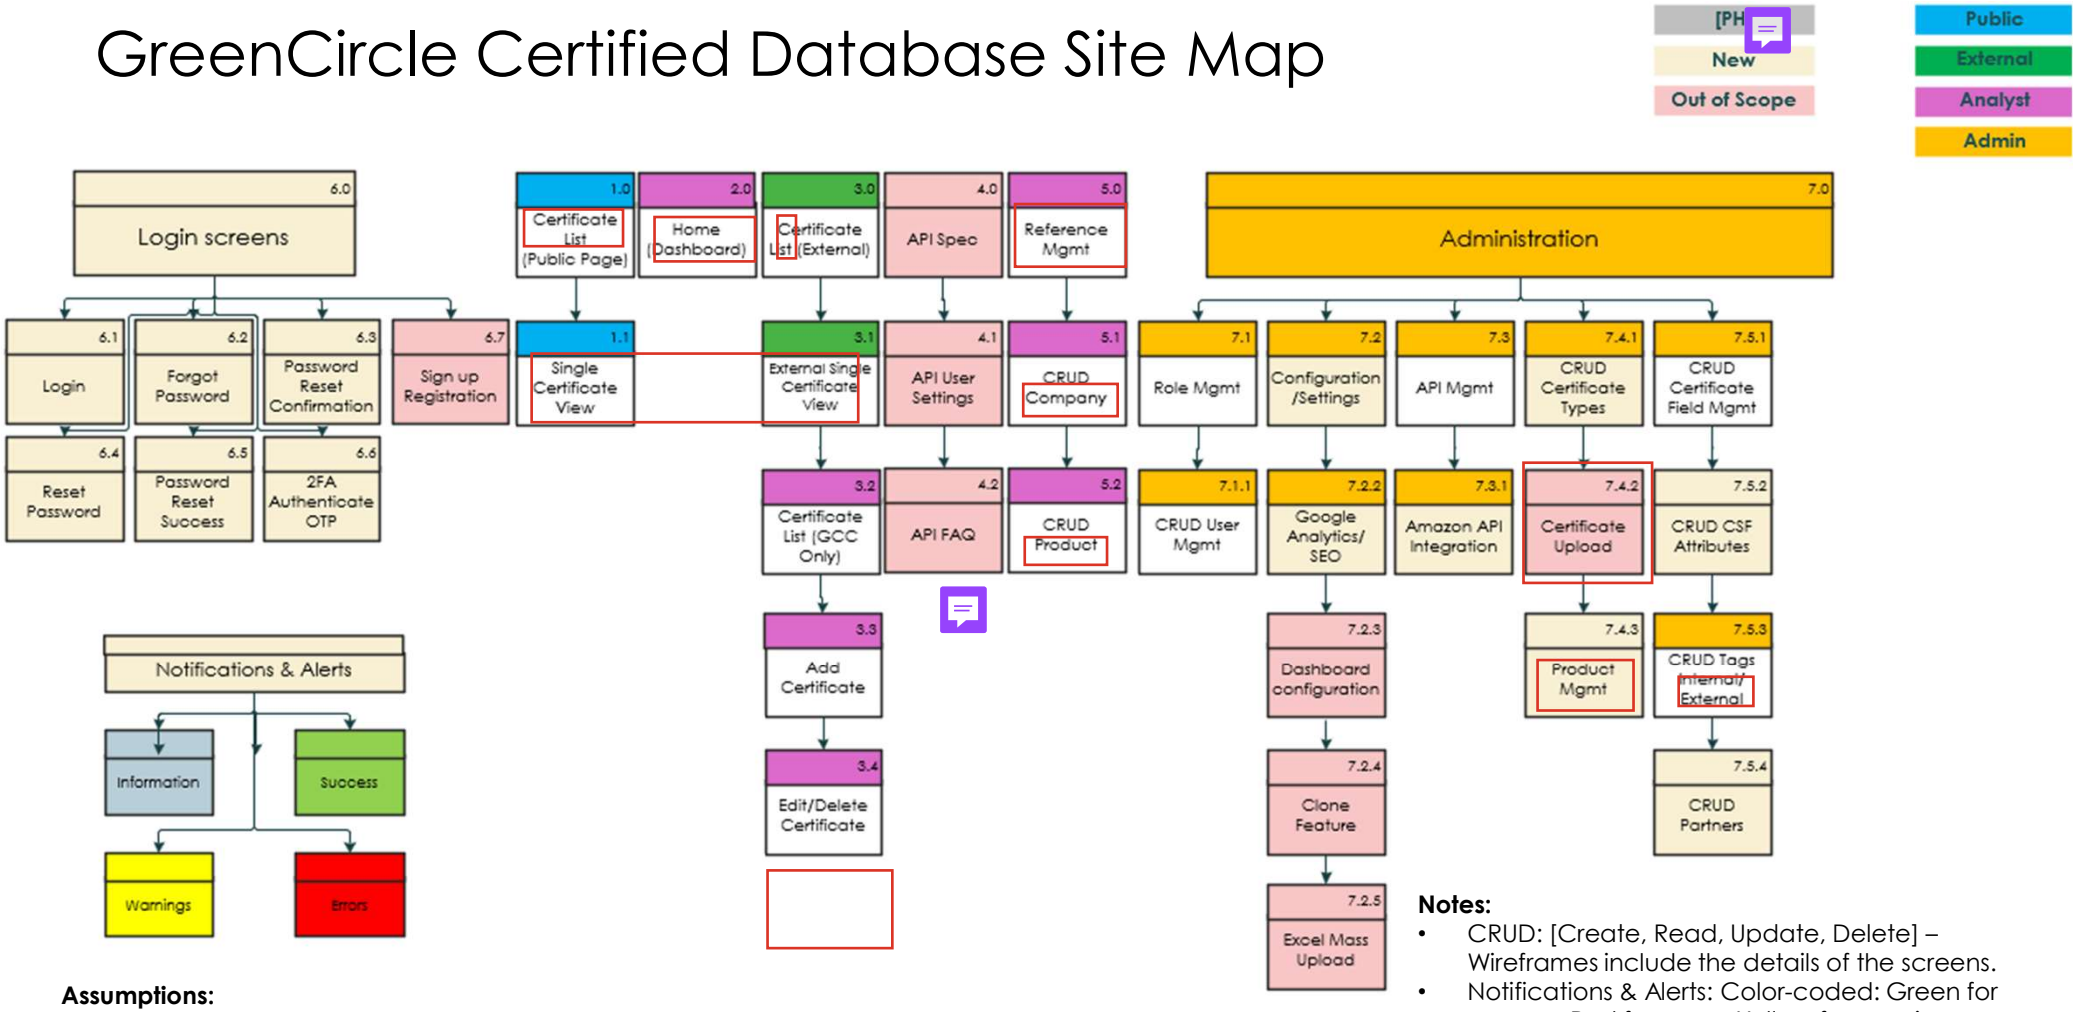

Milestones:
5/9 – Wireframes & Requirement complete
6/13 – Development Complete
6/27 – Testing Complete
7/11 – Go live

Coordination:
6/16 – 6/27 : Business Acceptance Testing, Defect Resolution
6/16 – 6/27 : API Testing with Amazon
6/30 – 7/11 : Deployment Activities

ANUKI CONSULTING

Discuss this page

GreenCircle Certified Database Site Map

Assumptions:

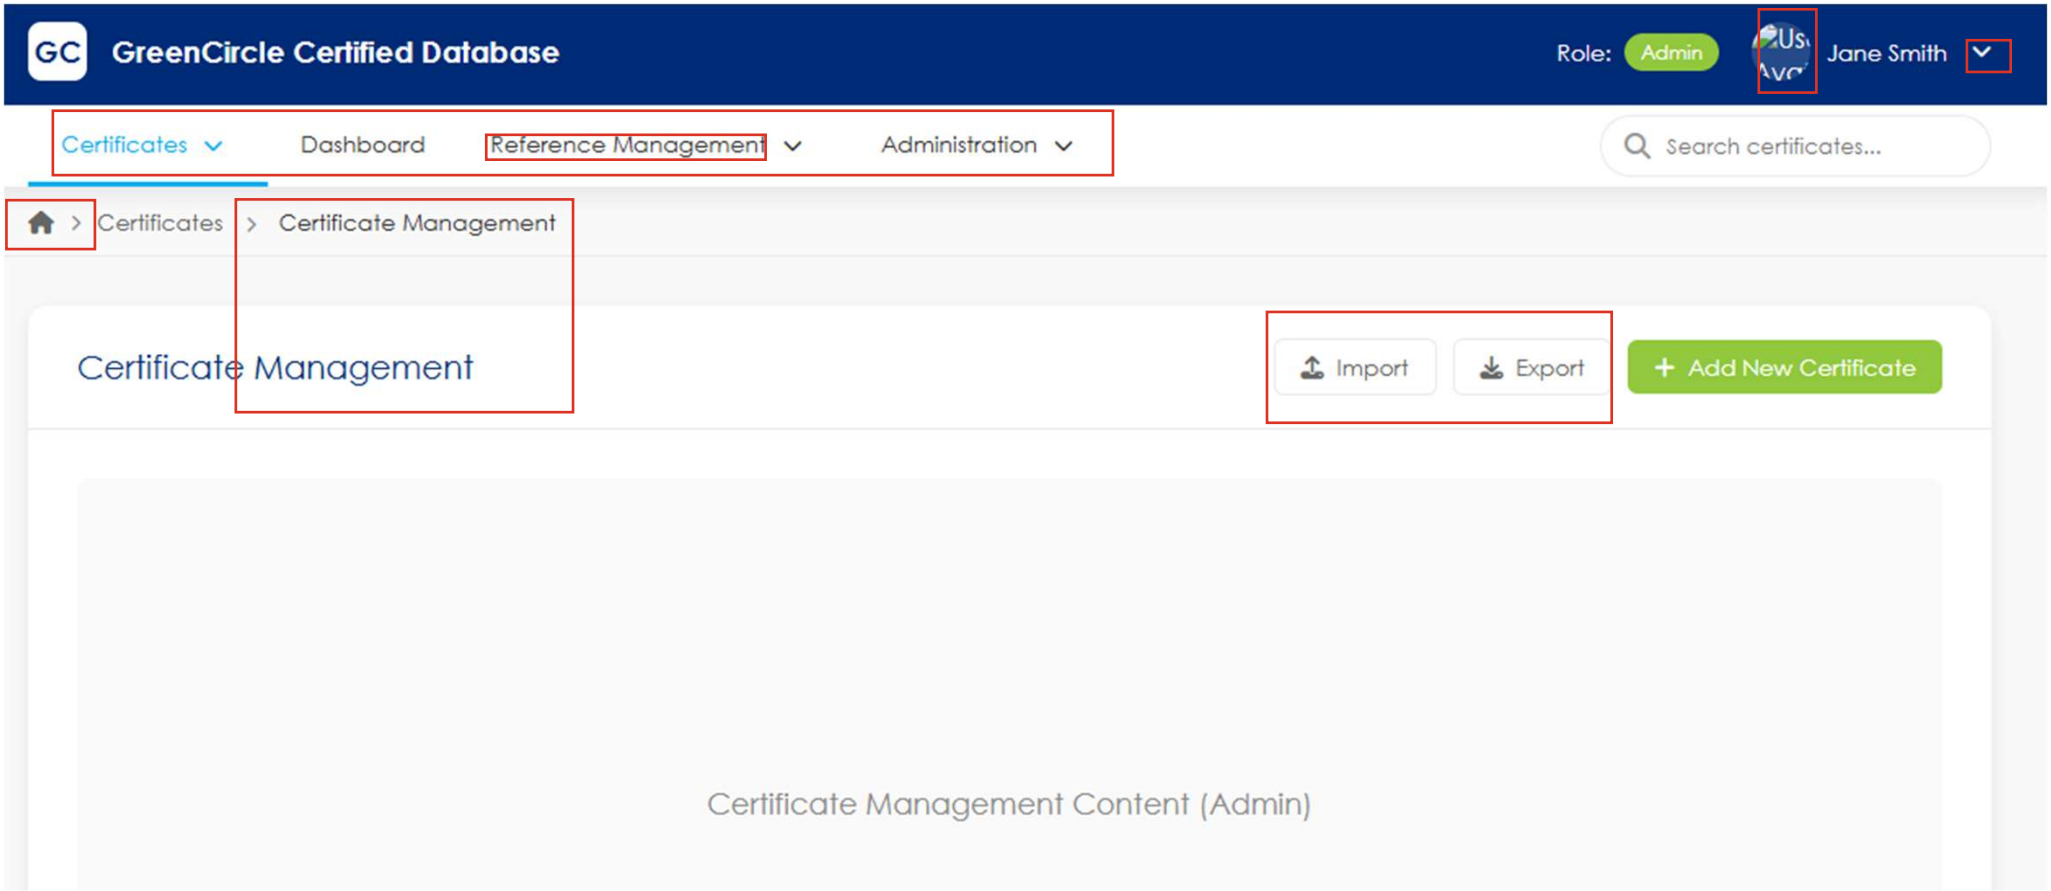

- Certificate List 1.0 is a different page than Certificates 3.0.
- Admin will have the ability to Add, Edit or Delete a Certificate, Company, Products, Users, Certificate Type, Product Types and Tags.

Notes:

- CRUD: [Create, Read, Update, Delete] – Wireframes include the details of the screens.
- Notifications & Alerts: Color-coded: Green for success, Red for errors, Yellow for warnings, Blue/gray for info.
- Sign-up Registration will be included but hidden and disabled for all users except the admin.

Discuss this page

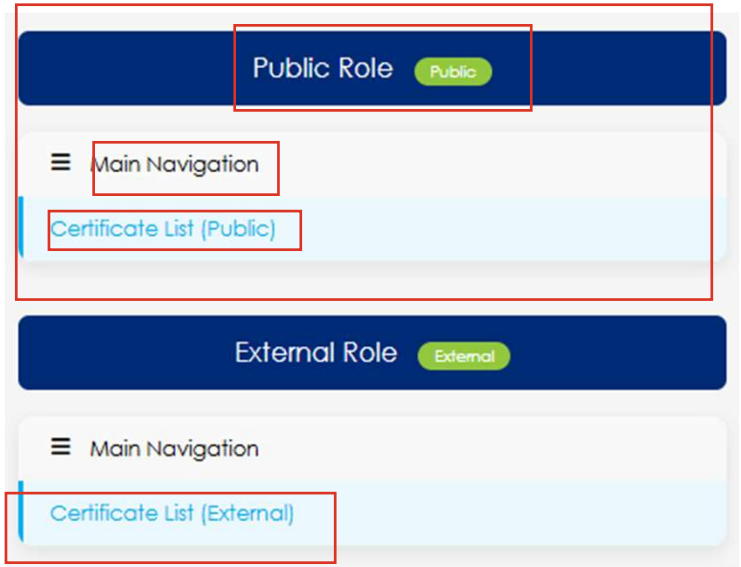

GreenCircle Certified Database Navigation

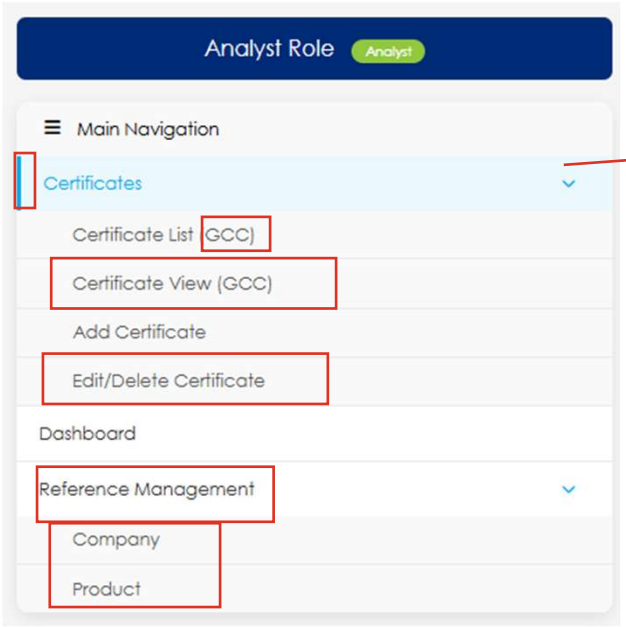

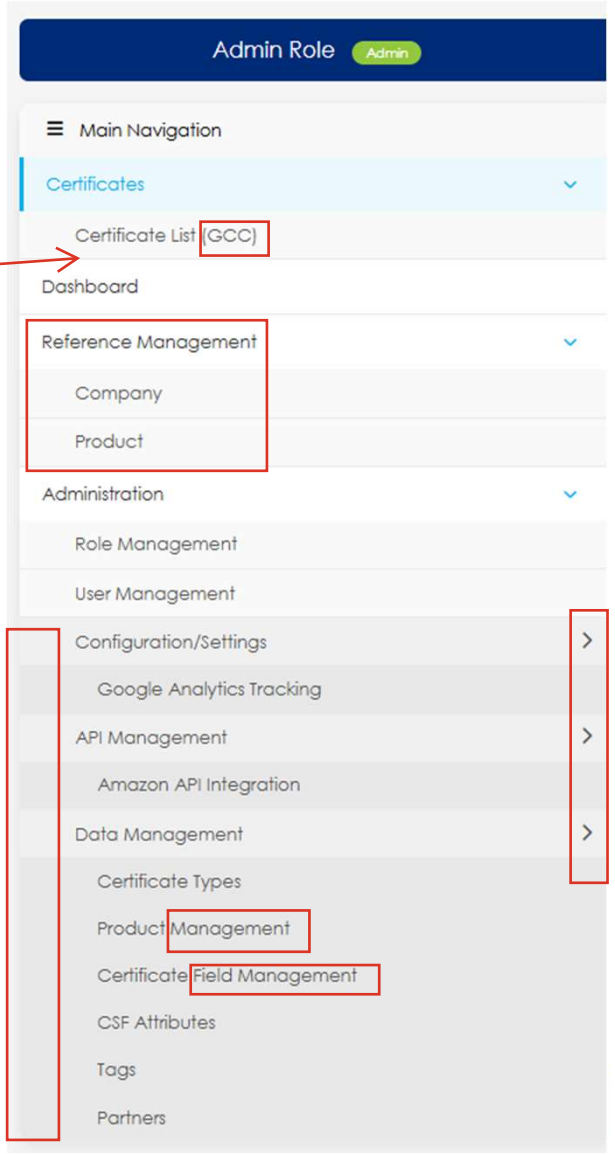

Notes: Proposed Navigation. This is not the final design, but to show how the page will be structured.

Discuss this page

GreenCircle Certified Database Navigation

User Stories

GCC: User Roles

Public

Consumers, partners, and organizations searching for product or company certification information.

Access:
View only, no editing, no list exporting

Permissions:
- Basic list filtering
- Download certificate PDF

List Field Access:
- Certificate #
- Company
- Product
- Product Category
- Product Type (+ Subcategory)
- Certification Type
- Effective
- Expiration
- Location
- Country
- Tags [external]
- [Certificate Download]

External User

Clients with large certificate count (as needed) or partners that need additional data access.

Access:
Login required, view only, no editing. Can export lists. Limited to only certain content based on selections (e.g., "Amazon" flagged clients for Amazon, only client's certs)

Permissions:
- Advanced list filtering
- Download certificate PDF (multiselect)
- Export full or filtered list

List Field Access:
Same as Public, plus:
- ASIN
- UPC
- GTIN
- EAN
- Status
- CSF Attributes
- Tags [external + internal - if given permission by Admin]

GCC User

Internal user with ability to upload client information/certificates and run reports/list exports.

Access:
Login required, editing access. Can export lists. Access to full list. Upload new certificates. Metrics dashboard

Permissions:
Same as External User, plus:
- Data/certificate upload

List Field Access:
Same as External User, plus:
See spreadsheet for all Cert fields
- Company Contact Email/URL
- User Last Modified
- Record Created Date
- Record Last Updated Date
- Tags [all internal and external]

NOTE: Developer needs to confirm through Amazon conversations other field and data passing requirements.

Admin

Internal user with highest level of access with database field editing capabilities.

Access:
Same as GCC User

Permissions:
Same as GCC User, plus:
- Add / delete / rename fields and tags
- Data/certificate upload, deletion + mass data upload
- User access management
- Report dashboard creation

List Field Access:
Same as GCC User

ANUKI CONSULTING

User Stories – Public User

Access & Visibility

- As a public user, I want to browse publicly available active certifications so that I can verify product compliance.
- As a public user, I want to access certifications without needing to log in so that I can quickly find information.
- As a public user, I want to view only non-confidential certifications so that I do not access restricted data.

Search & Filtering

- As a public user, I want to search for certifications by certificate number, certificate type, company, country or product so that I can verify compliance.
- As a public user, I want to filter certifications by product, product type, and product subcategory so that I can narrow my search.
- As a public user, I want to see the most recently issued certifications and those with upcoming expiration dates.

Viewing & Downloading Certifications

- As a public user, I want to view details of a certification so that I can verify product compliance.
- As a public user, I want to view and download single certifications so that I can reference them offline.

User Stories – Public User

Tagging & Classification

- As a public user, I want to see tags assigned to certifications so that I can understand certificates.
- As a public user, I want to search for certifications by tag so that I can find related certificates.

Data Access & Security

- As a public user, I want to access only publicly available information so that confidential data remains protected.

User Stories – External User (Client)

Access & Visibility

- As an external user, I want to log in securely so that I can access my company's certification data.
- As an external user, I want to see all certifications related to my company so that I can track compliance.
- As an external user, I want to ensure that I cannot see certifications from other companies so that my access is restricted to my organization.
- As an external user, I want my permissions to be pre-defined by an admin so that I only access the relevant data.
- As an external user, I want to be able to filter my certifications based on status (active, expired, pending) so that I can quickly find relevant information.

Search & Filtering

- As an external user, I want to search for certifications within my company so that I can locate specific records.
- As an external user, I want to filter certifications by type, category, and subcategory so that I can narrow down the results.
- As an external user, I want to sort certifications by expiration date so that I can prioritize renewals.
- As an external user, I want to search certifications by product name so that I can verify specific items.
- As an external user, I want to filter by location, tags, and other available filter options based on their intended search purpose.
- As an external user, I want to export my company's certification data into Excel so that I can use it for reporting and documentation purposes.

User Stories – External User (Client)

Viewing & Downloading Certifications

- As an external user, I want to view details of each certification so that I can verify product compliance.
- As an external user, I want to download certificates in multi-select format so that I can share them with my stakeholders.
- As an external user, I want to check the expiration date of a certification so that I can ensure timely renewals.
- As an external user, I want to download a certification summary report so that I can review compliance status at a glance.

Tagging & Classification

- As an external user, I want to see assigned tags on certifications so that I can categorize data effectively.
- As an external user, I want to filter certifications based on assigned tags so that I can group relevant products together.
- As an external user, I want to view which products are associated with a specific certification so that I can understand product compliance.

Data Access & Security

- As an external user, I want my access restricted to only my company's data so that I do not see competitors' certifications.
- As an external user, I want to log out securely so that I can prevent unauthorized access to my account.
- As an external user, I want my account to be managed by an admin so that permissions are properly controlled.

User Stories – External User (Partner)

Access & Visibility

- As an external user, I want to log in securely so that I can access my program's certification data.
- As an external user, I want to see all certifications related to my program so that I can track compliance.
- As an external user, I want to ensure that I cannot see certifications from other companies or programs so that my access is restricted to my program.
- As an external user, I want my permissions to be pre-defined by an admin so that I only access the relevant data.
- As an external user, I want to be able to filter my certifications based on status (active, expired, pending) so that I can quickly find relevant information.

Search & Filtering

- As an external user, I want to search for certifications within my program so that I can locate specific records.
- As an external user, I want to filter certifications by type, category, and subcategory so that I can narrow down the results.
- As an external user, I want to sort certifications by expiration date so that I can prioritize renewals.
- As an external user, I want to search certifications by product name so that I can verify specific items.
- As an external user, I want to filter by location, tags, and other available filter options based on their intended search purpose.
- As an external user, I want to export my program certification data into Excel so that I can use it for reporting and documentation purposes.

User Stories – External User (Partner)

Viewing & Downloading Certifications

- As an external user, I want to view details of each certification so that I can verify product compliance.
- As an external user, I want to download certificates in multi-select format so that I can share them with my stakeholders.
- As an external user, I want to check the expiration date of a certification so that I can ensure timely renewals.
- As an external user, I want to download a certification summary report so that I can review compliance status at a glance.

Tagging & Classification

- As an external user, I want to see assigned tags on certifications so that I can categorize data effectively.
- As an external user, I want to filter certifications based on assigned tags so that I can group relevant products together.
- As an external user, I want to view which products are associated with a specific certification so that I can understand product compliance.

Data Access & Security

- As an external user, I want my access restricted to only my company's data so that I do not see competitors' certifications.
- As an external user, I want to log out securely so that I can prevent unauthorized access to my account.
- As an external user, I want my account to be managed by an admin so that permissions are properly controlled.
- As an external user, I want to request additional access from an admin if needed so that I can view more relevant certifications and/or API configuration.

User Stories – GCC Analyst

Access & Visibility

- As an analyst, I want to log in securely so that I can access certification data.
- As an analyst, I want to see all certifications so that I can manage records effectively.
- As an analyst, I want my access restricted to only my assigned role so that I do not see unauthorized data.
- As an analyst, I want to view dashboard reports so that I can track data and trends.

Search & Filtering

- As an analyst, I want to filter certifications by all fields so that I can generate reports and narrow by results based on my search needs.
- As an analyst, I want to sort certifications by modification date so that I can easily find a recent certificate that may need additional edits.

Viewing & Downloading Certifications

- As an analyst, I want to view detailed certification records so that I can ensure compliance accuracy.
- As an analyst, I want to download certification data in bulk so that I can conduct offline analysis.
- As an analyst, , I want to see the history of modifications for a certification so that I can track changes.
- As an analyst, I want to download multiple certifications based on search criteria to view or save in bulk.

User Stories – GCC Analyst

Tagging & Classification

- As an analyst, I want to create and assign tags to certifications so that I can classify them effectively.
- As an analyst, I want to edit or remove tags so that I can keep records up to date.

Data Access & Security

- As an analyst, I want my access to be restricted based on admin settings so that I only see relevant data and don't make unintended changes.
- As an analyst, I want to track user activity logs so that I can review who made modifications to records.

User Stories - Admin

Access & Visibility

- As an admin, I want to manage user roles and permissions so that I can control access levels.
- As an admin, I want to view all certifications across all companies so that I can oversee compliance.
- As an admin, I want to create, edit, and delete user accounts so that I can manage system access.

Search & Filtering

- As an admin, I want to search certifications across all companies so that I can manage records efficiently.
- As an admin, I want to filter any of the certificate fields so that I can oversee compliance trends.
- As an admin, I want to sort certifications by the last modified date so that I can track updates.
- As an admin, I want to be able to set the certificate status (active, expired, pending).

Viewing & Downloading Certifications

- As an admin, I want to view detailed certification records across the entire platform so that I can manage data integrity.
- As an admin, I want to export all certification data so that I can generate system-wide reports.
- As an admin, I want to track certification history and changes so that I can audit modifications.

User Stories - Admin

Tagging & Classification

- As an admin, I want to create, edit, and remove tags so that I can organize certifications effectively.
- As an admin, I want to standardize tags across the platform so that users have consistent classification options.

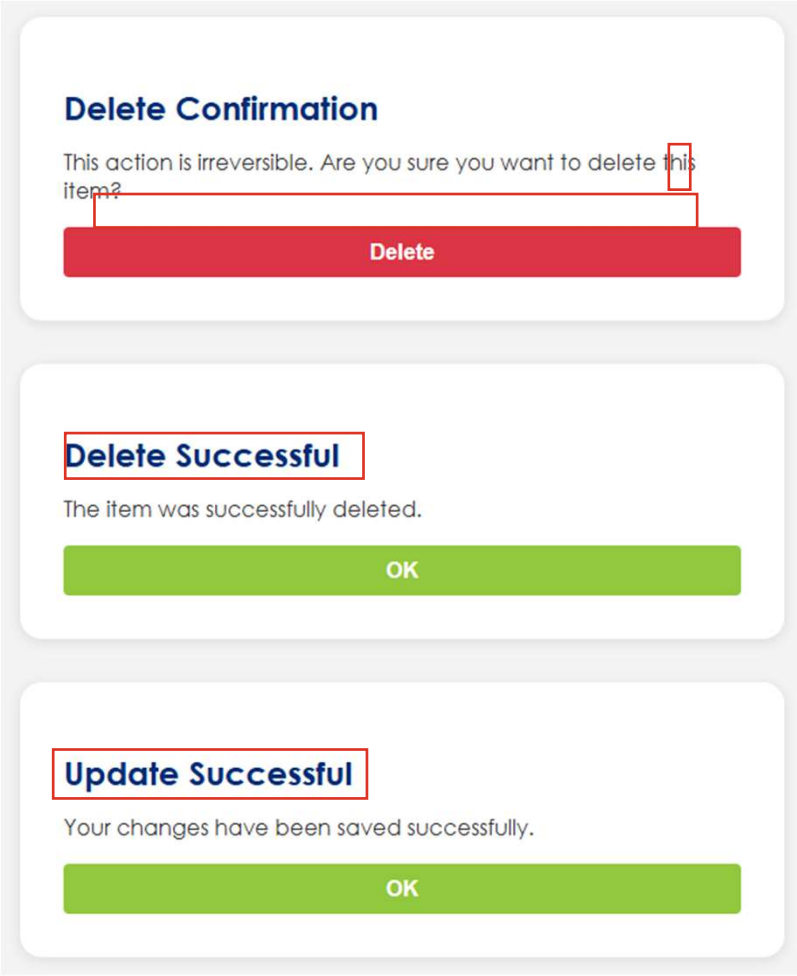

Data Access & Security

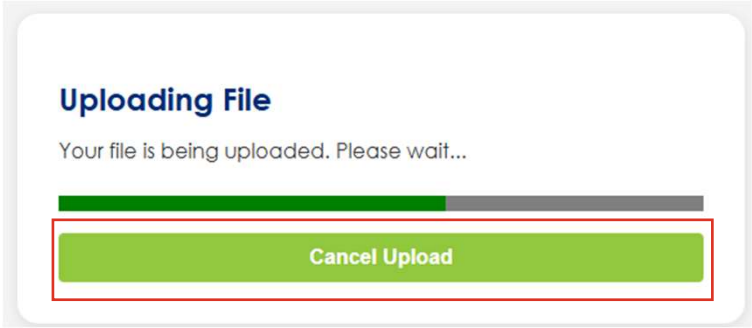

- As an admin, I want to enforce multi-factor authentication so that system security is enhanced.
- As an admin, I want to track user activity logs so that I can monitor system usage.
- As an admin, I want the ability to add a new field to certificates.
- As an admin, I want to restrict access to certain certifications so that only authorized users can view them.
- As an admin, I want to integrate API connections with third-party platforms so that external vendors can securely access data.
- As an admin, I want the ability to add, update or delete data for Product Types

Login & Notification Screens

Notifications & Alerts

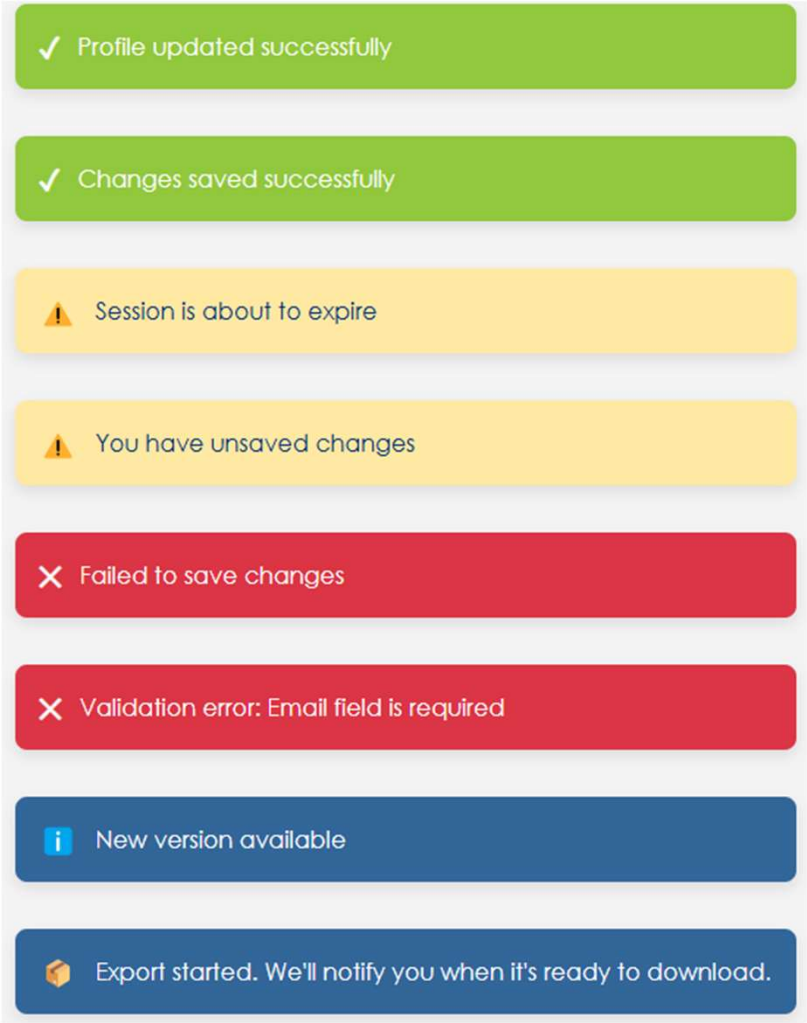

Notes:

- Examples of notification and alerts.
- We will need to identify all instances of where notifications and alerts need to occur.
- Color-coded:
  - Green for success
  - Red for errors
  - Yellow for warnings
  - Blue/gray for info(navy blue)

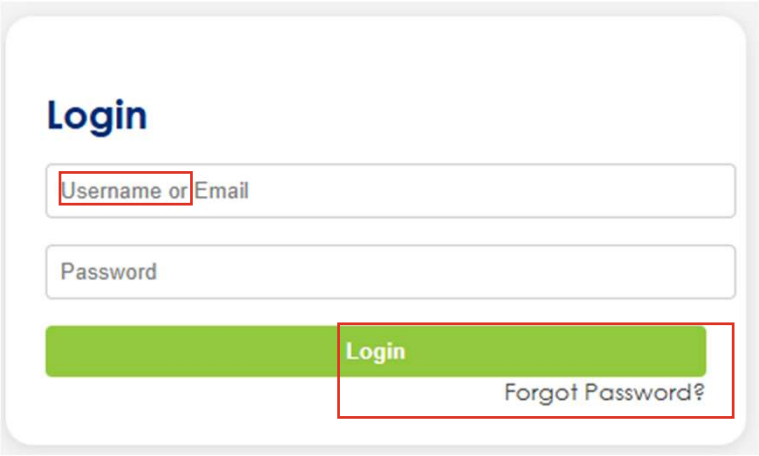

Notifications & Alerts

Notes:

- Examples of notification and alerts.
- We will need to identify all instances of where notifications and alerts need to occur.
- Color-coded:
  - Green for success
  - Red for errors
  - Yellow for warnings
  - Blue/gray for info(navy blue)

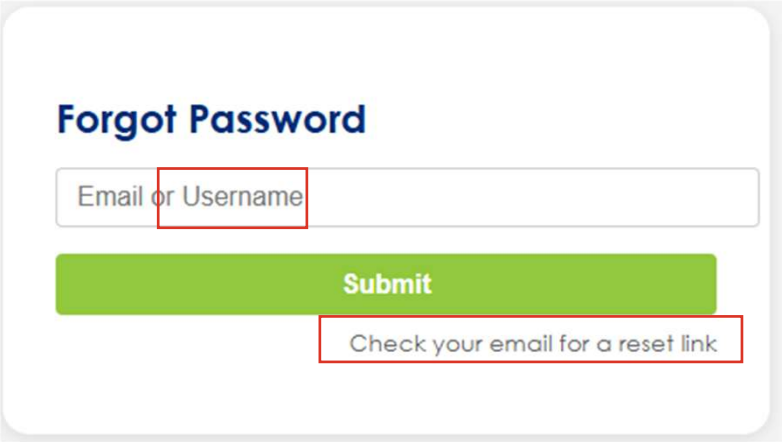

Wireframe Notes – 6.1 – Login

Login Screen
•Username/Email and Password fields
•Login button
•"Forgot Password?" link

•Remove icons from the buttons. Forgot password, grey, use lighter green for login.

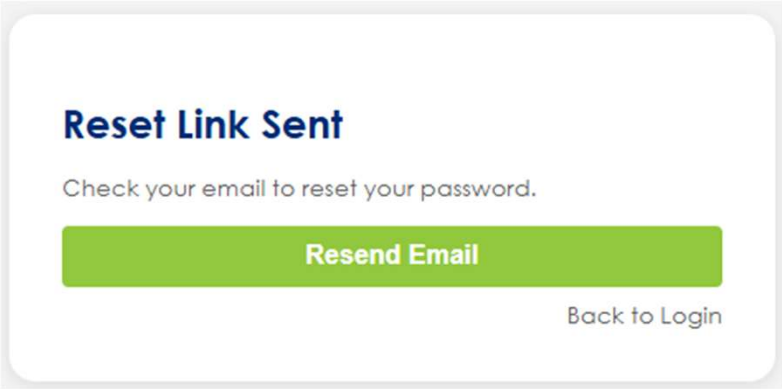

Wireframe Notes – 6.2 – Forgot Password

Forgot Password Screen

- Input: Email or Username
- Submit button
- Feedback message: "Check your email for a reset link"

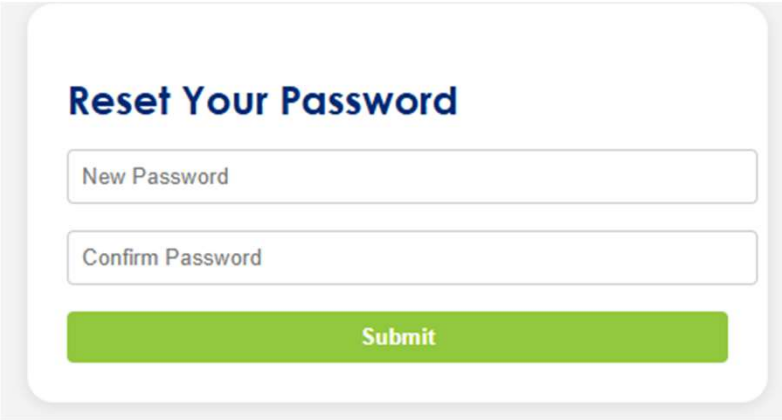

Wireframe Notes – 6.3 – Password Reset Confirmation

Password Reset Confirmation Screen (Email Sent)

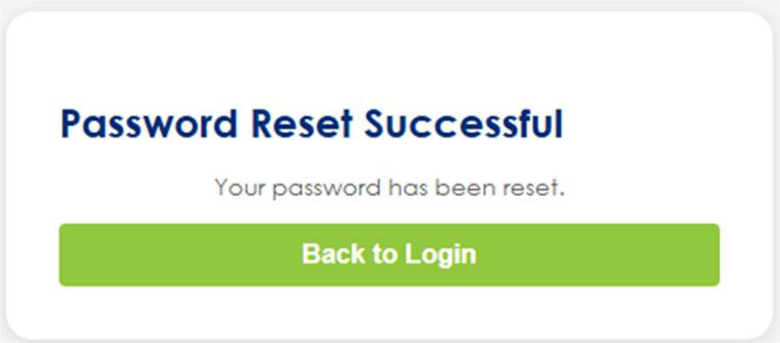

- Confirmation that an email was sent
- Option to resend
- Option to go back to Login

Wireframe Notes – 6.4 – Reset Password

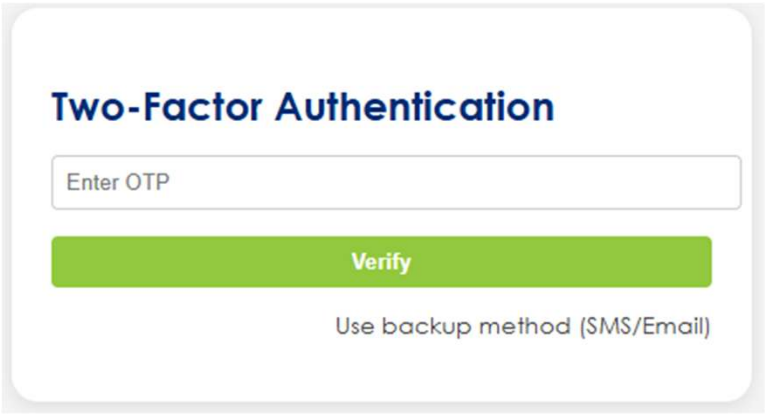

Reset Password Screen
•Accessed via email link (usually with token)
•New Password + Confirm Password
•Submit button

Wireframe Notes – 6.5 – Password Reset Successful

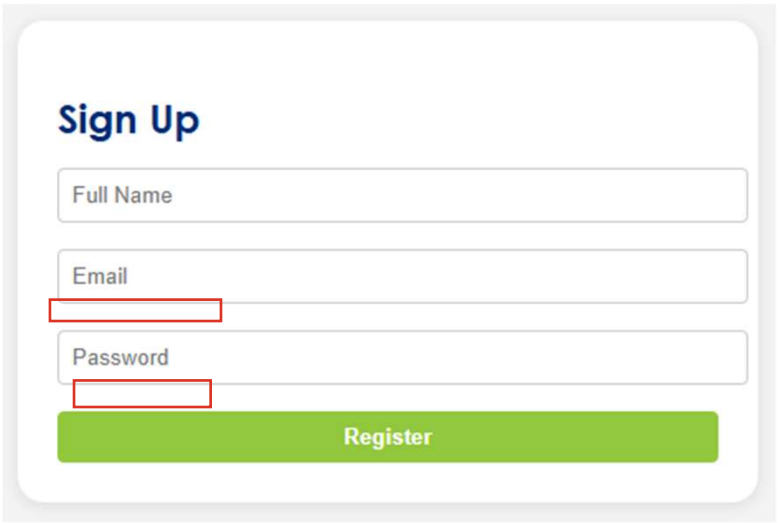

Password Reset Success Screen
•Message: "Your password has been reset"
•Button to go back to Login

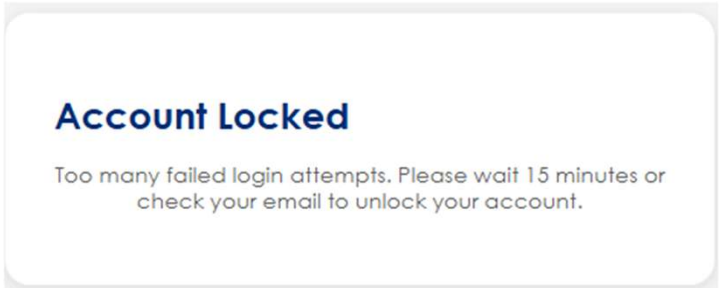

Wireframe Notes – 6.6 – 2FA Authenticate OTP

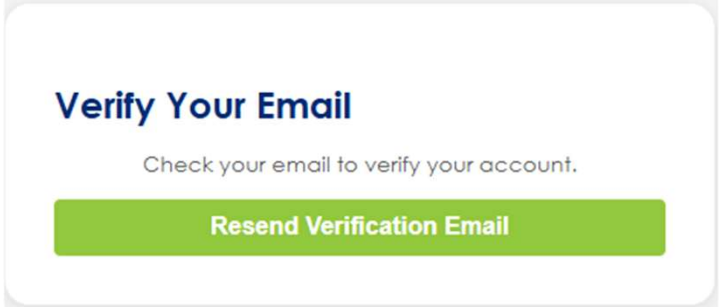

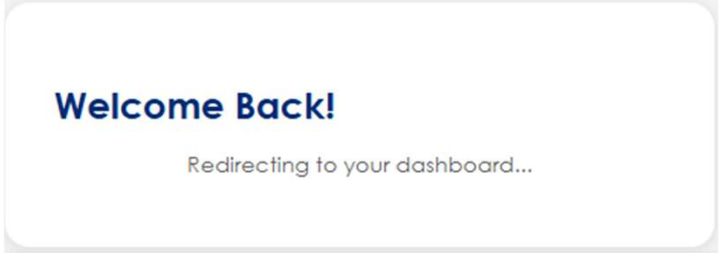

Two-Factor Authentication (2FA) Screen
•Prompt for OTP or code from authenticator app
•Backup methods (e.g., SMS, email)

Wireframe Notes – 6.7 – Sign-up Registration (out of Scope)

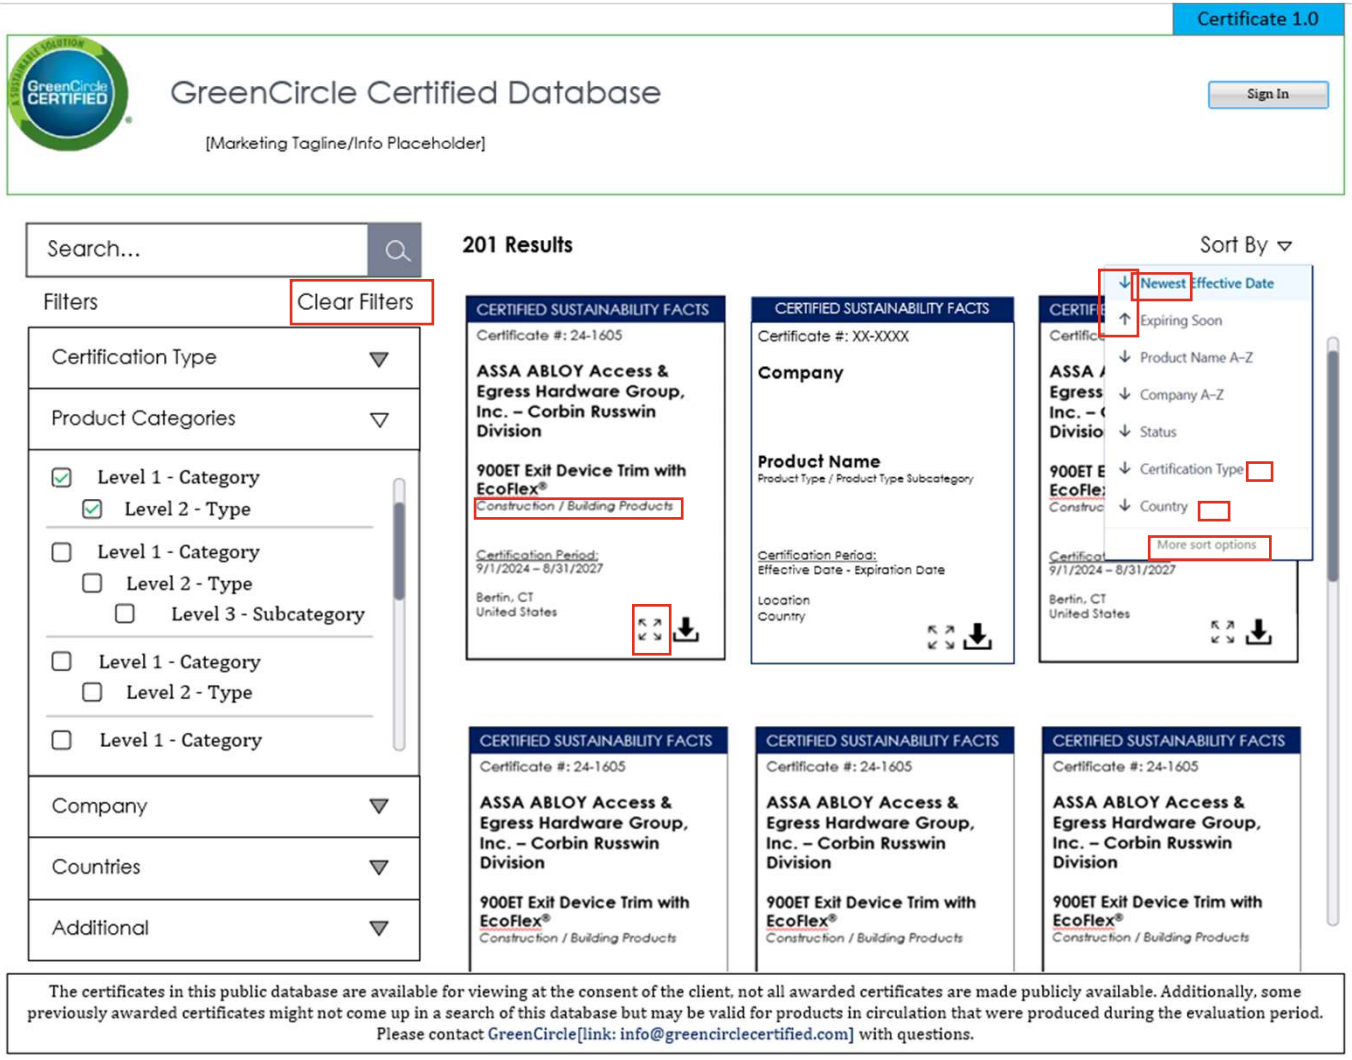

Sign Up / Registration Screen (Disabled/Hidden)
•If account creation is allowed in the future

•Additional Screens:
Account Lock/Too Many Attempts Screen
•Inform user of lockout
•Time remaining or action to unlock (e.g., via email)
Email Verification Screen (Post Sign-up)
•"Check your email to verify your account"
Resend Verification Email Screen
•In case the user didn't receive the initial verification
Login Success Redirect / Dashboard Screen
•After login, redirect to home, dashboard, or intended page

Wireframes

Wireframe Notes – 1.0 - Certificate List (Public Page)

Fields not included on Tile:

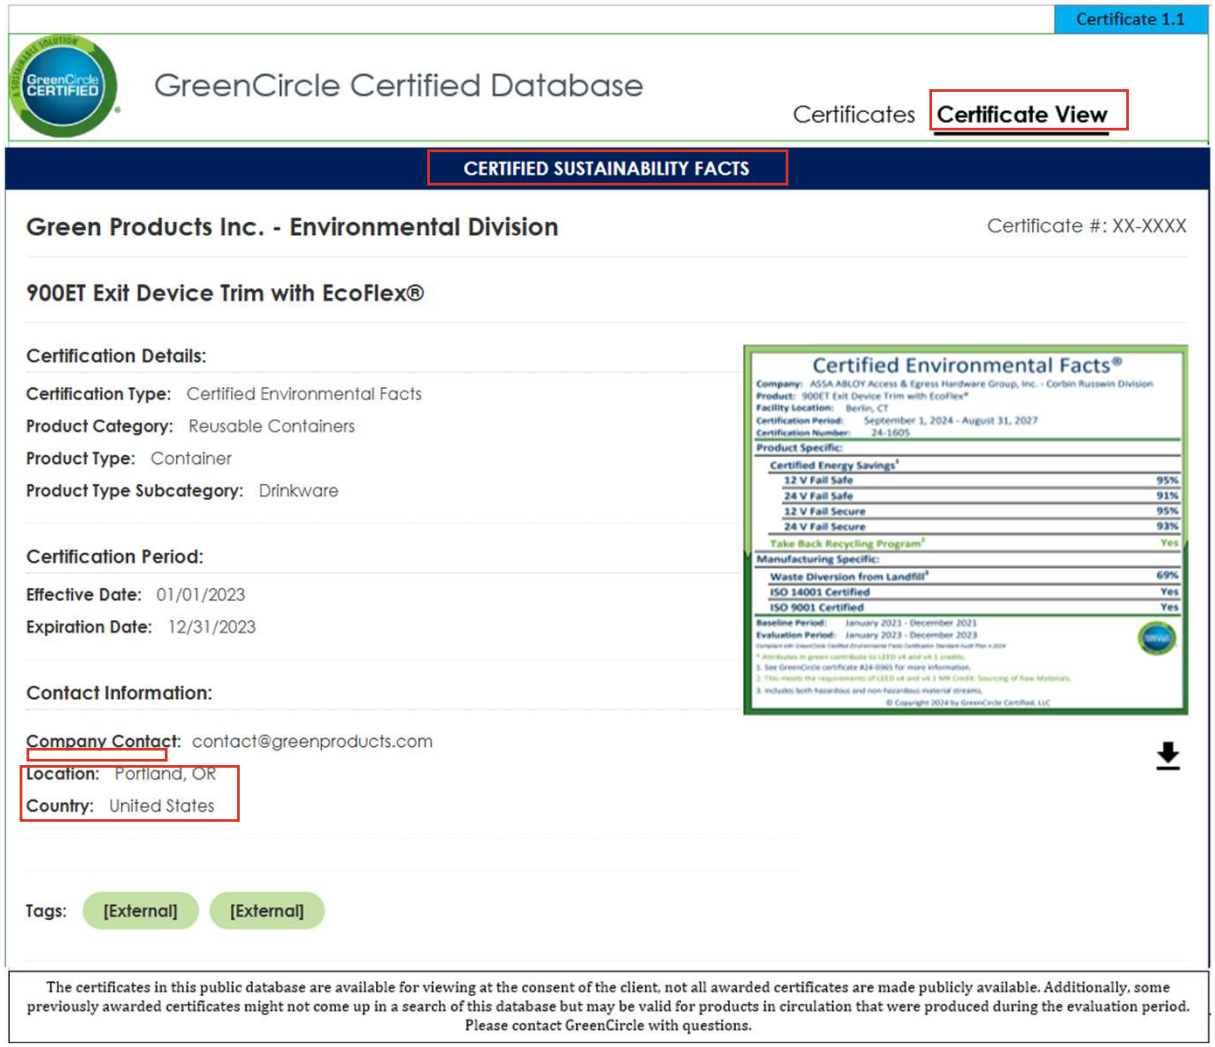

- Certification Type
- Company Contact Email/URL
- Product Category

ANUKI CONSULTING

Wireframe Notes – 1.0 - Certificate List (Public Page)

- This is the landing page (https://db.greencirclecertified.com/certificate) on the current website.
- Clicking anywhere on the tile of a certificate will take the user to the Certificate View that shows details about the selected certificate.
- Search bar, autocomplete suggestions, filters on search terms within results, mobile compatibility, and the ability to narrow down search results based on specific criteria within categories, allowing users to easily find specific content on a site.
- Ability to sort tiles on all Public database columns (Certificate #, Certification Type, Effective Date, Expiration Date, Company, Company Contact Email/URL, Product Name, Product Category, Product Type, Product Type Subcategory, Location, Country, External Tag)
- Ability to filter by search categories
- All Public data fields to be displayed: Certificate #, Certification Type, Effective Date, Expiration Date, Company, Company Contact Email/URL, Product Name, Product Category, Product Type, Product Type Subcategory, Location, Country, External Tag
- Need to make sure a unique URL can be created based on search criteria so clients can directly link to DB with just listing of their certifications (SCS does this as you add search criteria)
- Ability to view # Results
- Ability to Clear filters
- Mention certification download capability
- *Wishlist: The ability to load the table as a user scrolls Lazy loading, rather than have the page control.

Wireframe Notes – 1.1 – Single Certificate View

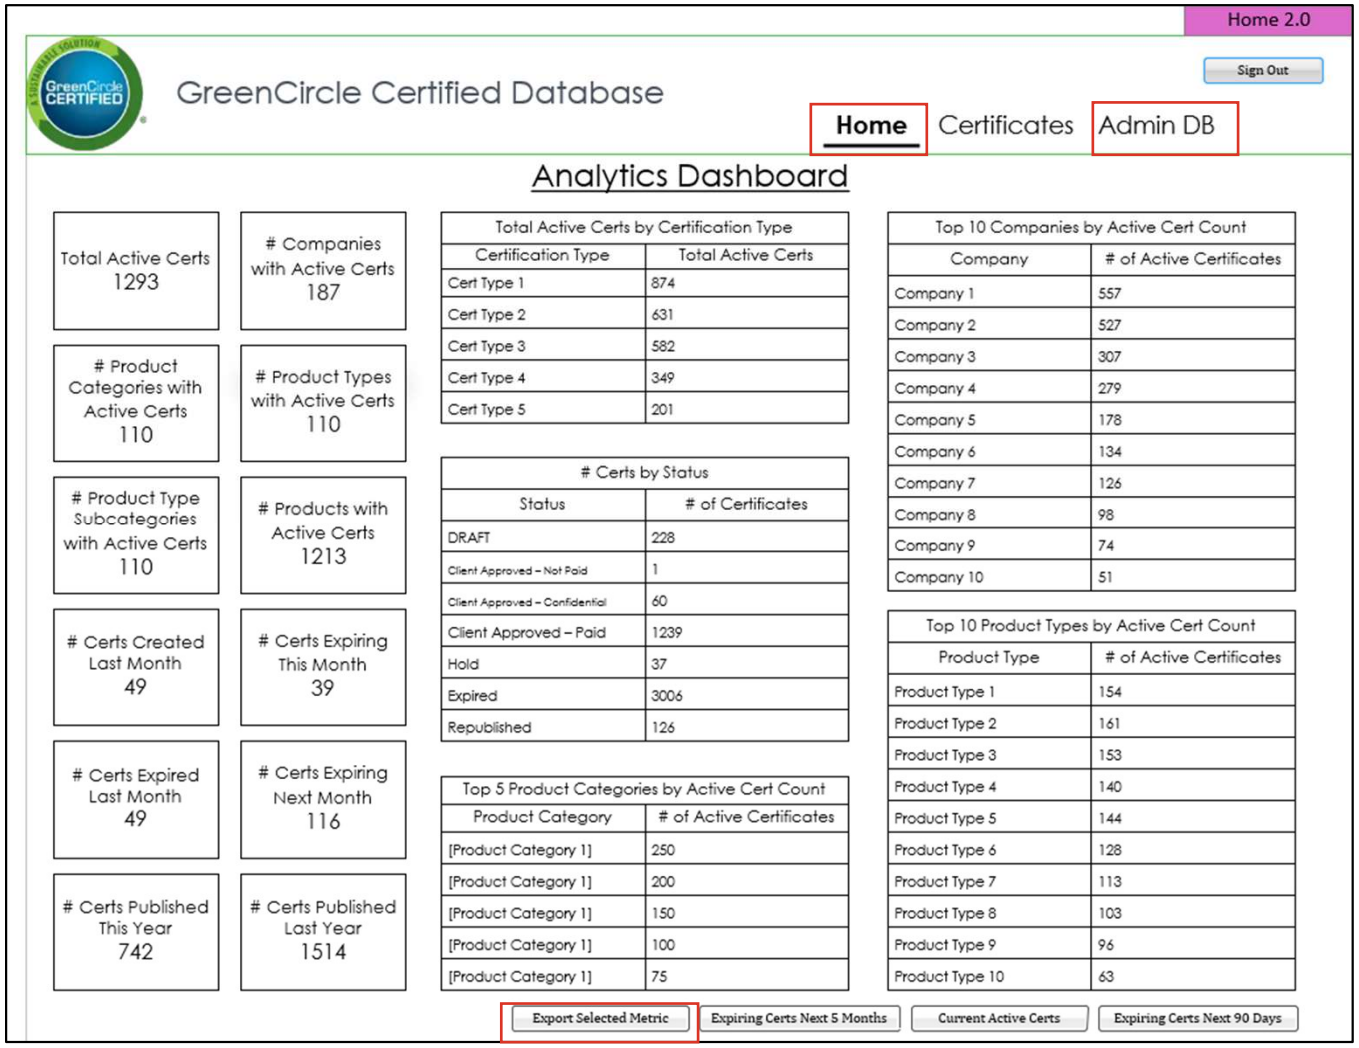

Notes:

- This is the Single Cert View for Public Users.
- Ability to view all Public data fields for the selected Single Certificate.
- Ability to Close the Certificate information.
- Ability to Download the Certificate.
- Certificate view will load into a new tab.

ANUKI CONSULTING

Wireframe Notes – 2.0 – Home (Dashboard)

Notes:

- This is the dashboard reporting page for logged in GCC users (Analyst and Admins).
- Containers represent the required metrics.
- Ability to view designated metrics.
- Ability to export Prebuilt Lists to Excel.
- Ability to export the selected metric to Excel.

Questions:

- Confirm navigation and layout

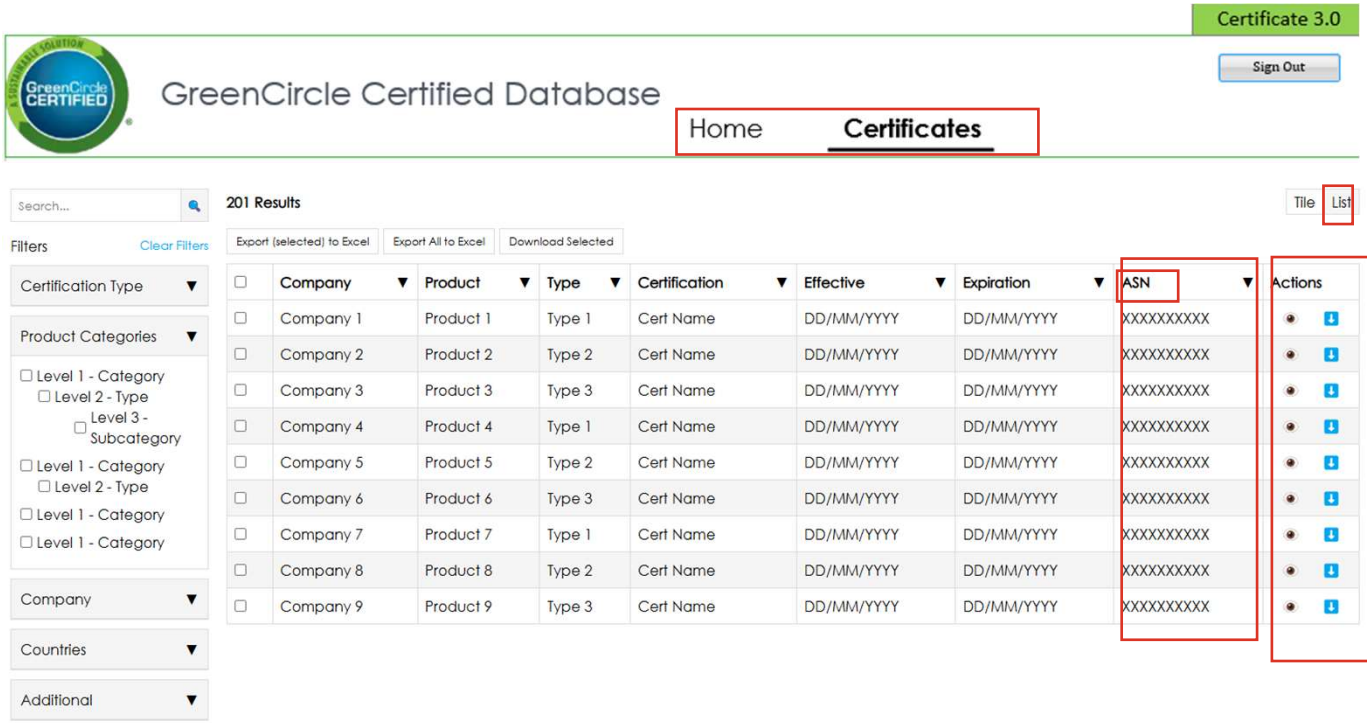

Other

- Nice to have, not part of scope, would be to have the dashboard available for external users with there specific data.

ANUKI CONSULTING

DISCUSS: Need to give Partners and clients the Products view too?

Wireframe Notes – 3.0 – Certificate List (External)

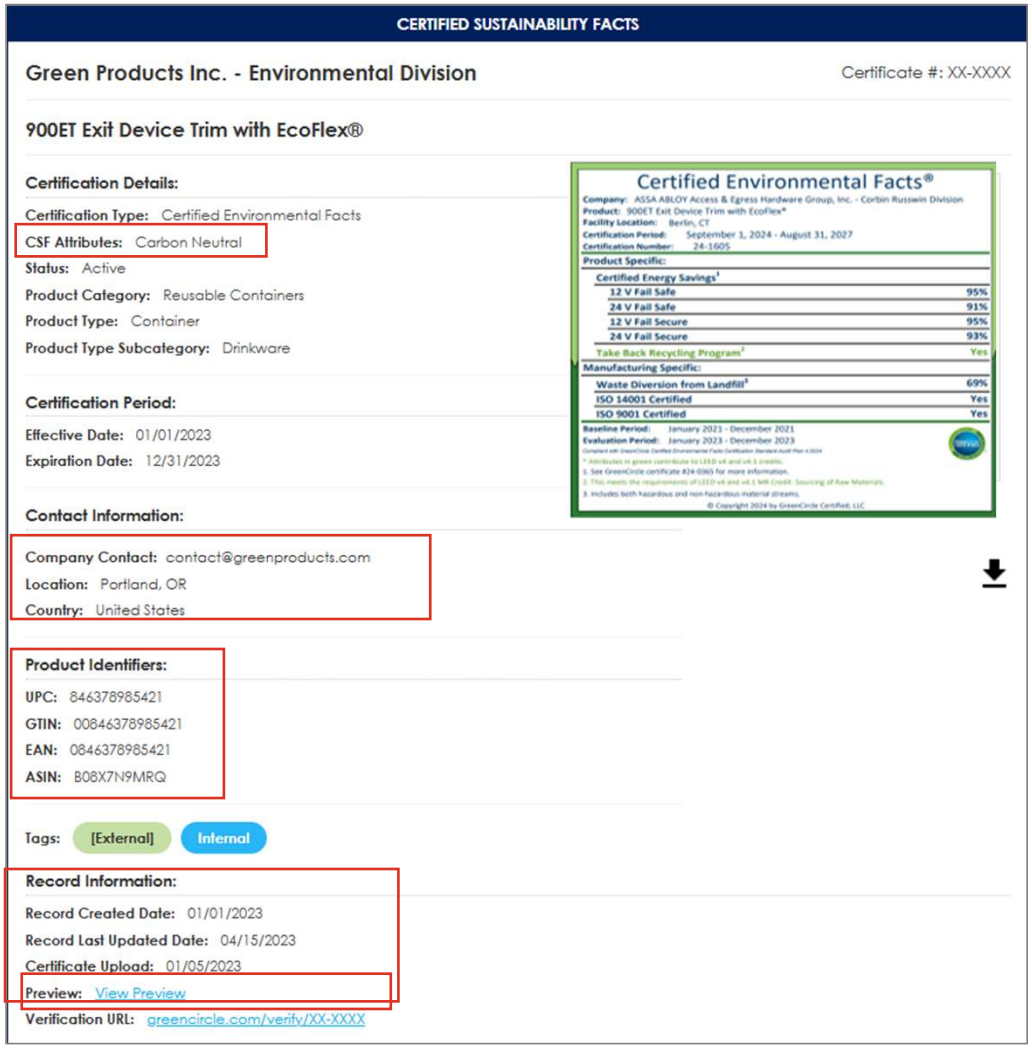

Notes:

- Wireframe updated for infinite scrolling instead of pagination.
- Add Certificates will only be available for Analyst and Admin users.
- Edit/Delete Certificate will only be available for Analyst and Admin users.
- Ability to toggle between List and Tile views.
- The Tile view will display the same as 1.0 Certificate view.
- List Sort by will allows users to sort on any column.
- All data fields to be displayed based on user's permissions: Certificate #, Certification Type, CSF Attributes, Status, Effective Date, Expiration Date, Company, Company Contact Email/URL, Product Name, Product Category, Product Type, Product Type Subcategory, Location, Country, External Tag, Internal Tag, ASIN, UPC, GTIN, EAN, Certificate Upload, Record Created Date, Record Last Updated Date, Preview
- 2 types of External Users
  - Customers (accounted for here)
  - **Partners (where they will have access across companies for products that are part of their program only – for example Amazon CPF clients/certs) (Need Clarification)**

Wireframe Notes – 3.0 – Certificates List (External)

- This is the List View for Logged In Users.
- All data fields to be displayed based on user's permissions: Certificate #, Certification Type, CSF Attributes, Status, Effective Date, Expiration Date, Company, Company Contact Email/URL, Product Name, Product Category, Product Type, Product Type Subcategory, Location, Country, External Tag, Internal Tag, ASIN, UPC, GTIN, EAN, Certificate Upload, Record Created Date, Record Last Updated Date, Preview
- Clicking anywhere on the row of a certificate will take the user to the Certificate List that shows details about the selected Certificate.
- Ability to Sort on all columns.
- Ability to Filter by designated Search Categories.
- Ability to scroll horizontally and vertically to see additional data fields.
- Ability to multiselect for Certificate Download.
- Add list Excel download - based on filters can export full or filtered list
- Wishlist: The ability to load the table as a user scrolls Lazy loading, rather than have the page control.

Wireframe Notes – 3.1 – External Single Certificate View

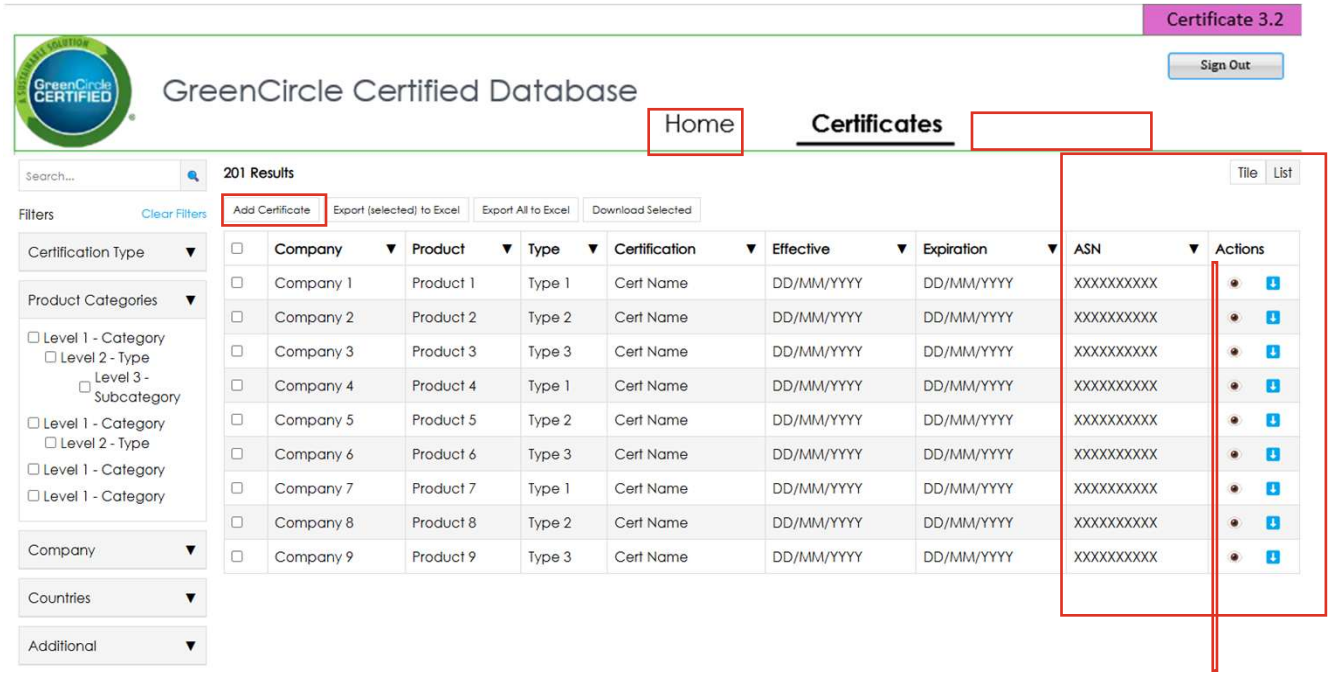

- All data fields to be displayed based on user's permissions: Certificate #, Certification Type, CSF Attributes, Status, Effective Date, Expiration Date, Company, Company Contact Email/URL, Product Name, Product Category, Product Type, Product Type Subcategory, Location, Country, External Tag, Internal Tag, ASIN, UPC, GTIN, EAN, Certificate Upload, Record Created Date, Record Last Updated Date, Preview.
- Verification URL: displayed at bottom of page to enable
- Certificate View will load in a new tab.

Wireframe Notes – 3.1 – External Single Certificate View

- This is the List View for Logged In Clients.
- All data fields to be displayed based on permissions: Certificate #, Certification Type, CSF Attributes, Status, Effective Date, Expiration Date, Company, Company Contact Email/URL, Product Name, Product Category, Product Type, ~~Product Type Subcategory, Location, Country, External Tag, Internal Tag, ASIN, UPC, GTIN, EAN.~~
- Ability to Sort on all columns.
- Ability to Filter by designated Search Categories.
- Ability to scroll horizontally and vertically to see additional data fields.
- Ability to multiselect for Download.
- Will Clients fall under the 'Company' data field or is there another way to associate them to a Product/Certificate?
    - When we grant permissions to clients it would be through Company - and there could be multiple companies associated with 1 client (ASSA ABLOY for example). However, on the partner side they would not be by Company but by new partner field.

Wireframe Notes – 3.2 – Certificate List (GCC Only)

Notes:

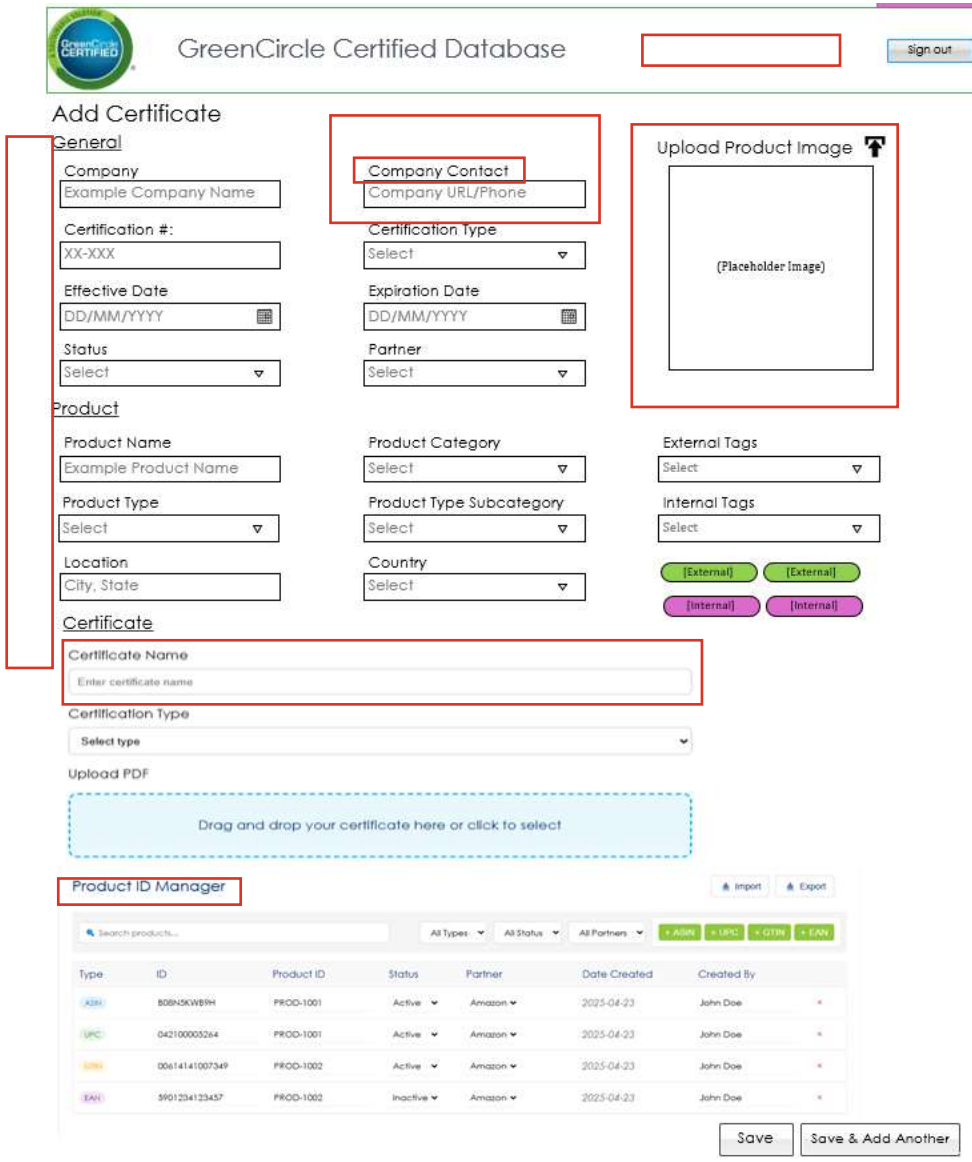

- Wireframe updated for infinite scrolling instead of pagination.
- Add Certificates will only be available for Analyst and Admin users.
- Edit/Delete Certificate will only be available for Analyst and Admin users.
- Ability to toggle between List and Tile views.
- The Tile view will display the same as 1.0 Certificate view.
- List Sort by will allows users to sort on any column.
- All data fields to be displayed based on user's permissions: Certificate #, Certification Type, CSF Attributes, Status, Effective Date, Expiration Date, Company, Company Contact Email/URL, Product Name, Product Category, Product Type, Product Type Subcategory, Location, Country, External Tag, Internal Tag, ASIN, UPC, GTIN, EAN, Certificate Upload, Record Created Date, Record Last Updated Date, Preview

Wireframe Notes – 3.2 – Certificate List (GCC Only)

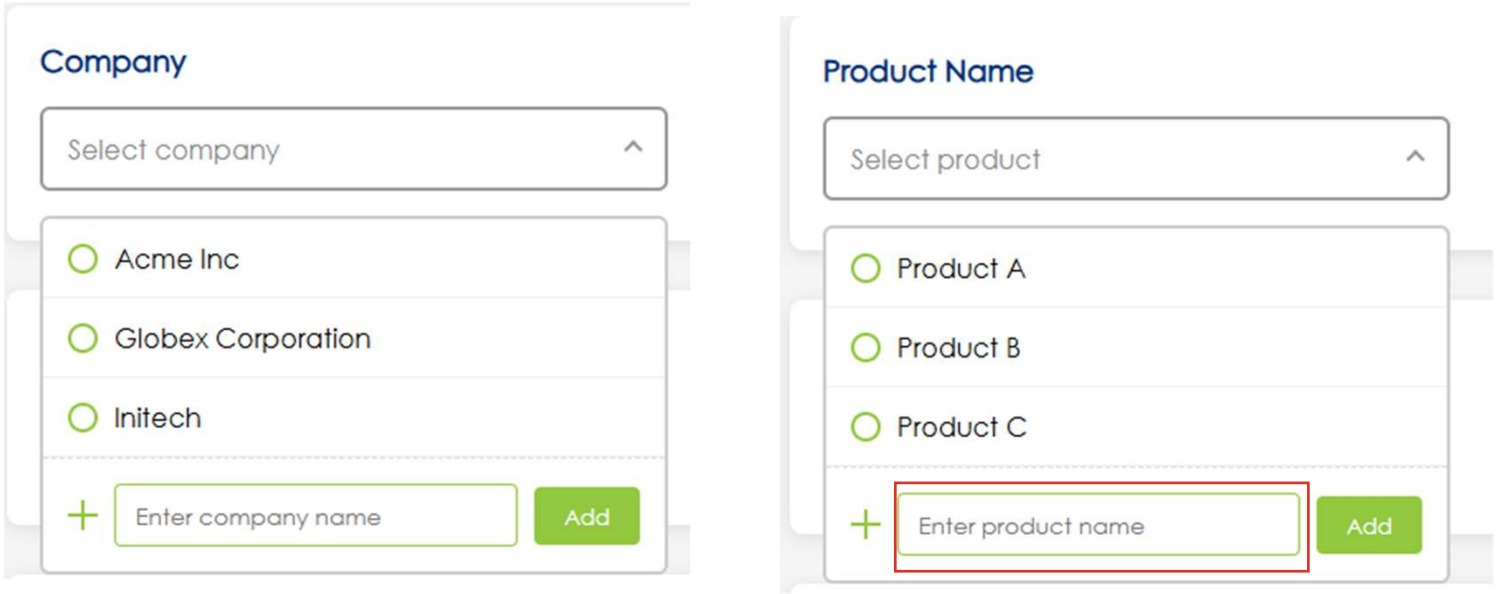

- This is the List View for Logged In Users.
- All data fields to be displayed based on user's permissions: Certificate #, Certification Type, CSF Attributes, Status, Effective Date, Expiration Date, Company, Company Contact Email/URL, Product Name, Product Category, Product Type, Product Type Subcategory, Location, Country, External Tag, Internal Tag, ASIN, UPC, GTIN, EAN, Certificate Upload, Record Created Date, Record Last Updated Date, Preview
- Clicking anywhere on the row of a certificate will take the user to the Certificate List that shows details about the selected Certificate.
- Ability to Sort on all columns.
- Ability to Filter by designated Search Categories.
- Ability to scroll horizontally and vertically to see additional data fields.
- Ability to multiselect for Certificate Download.
- Ability to Add a Certificate.
- Ability to Edit/Delete a selected Certificate.
- Note: Edit/Delete will be one at a time, no multiselect.
- Add list Excel download - based on filters can export full or filtered list
- *Wishlist: The ability to load the table as a user scrolls Lazy loading, rather than have the page control.

Wireframe Notes – 3.3 – Add Certificate (GCC Only)

- Notes:
- Admin can add new product categories.
- Certification # will be auto generated by the database and created on the save
- **New Field:** Partner: Amazon/Wayfair - required
- **New Field:** Status Type: to signify if a client doesn't want to move forward.

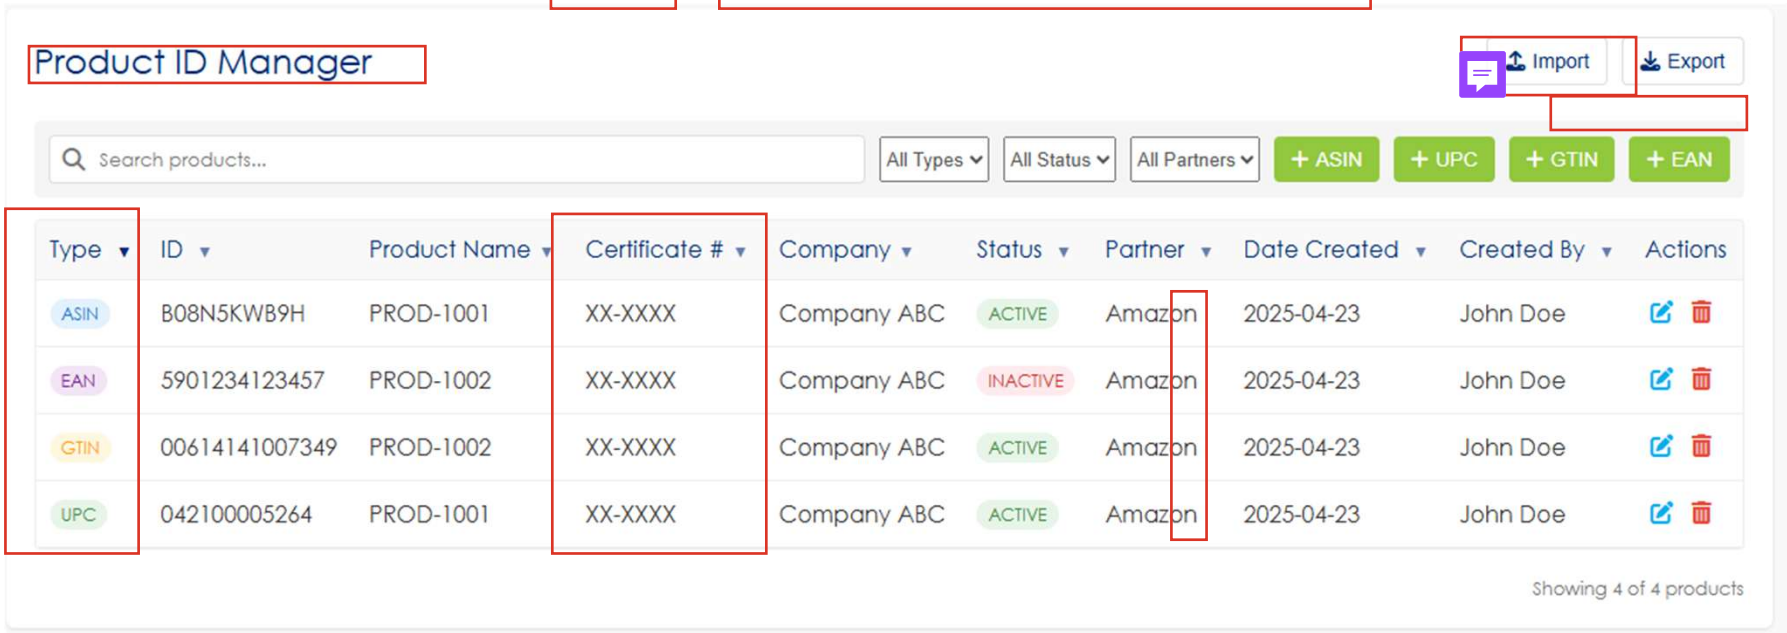

Wireframe Notes – 3.3 – Add Certificate (GCC Only)

Notes: Examples of the multiselect dropdown controls with the ability to add new item.

DISCUSS: I think Partners and Clients should have access to this without the add, edit, delete and import items
They would also see based on their permissions

Wireframe Notes – .3 – Product ID Manager

Notes:

- Product identifier management for multiple types: ASIN, UPC, GTIN, and EAN
- Search functionality to quickly find products
- Filtering options by type, status, and partners
- Status tracking (Active/Inactive) for each product ID
- Partner association (currently showing Amazon)
- Creation date and creator tracking
- Import and export capabilities for bulk management
- Adding new identifiers with dedicated buttons for each type
- Linking multiple identifier types to the same product ID (as shown with PROD-1001 and PROD-1002)
- Table view with deletion options (x button) for each entry

What about multi-select for deletion and status change

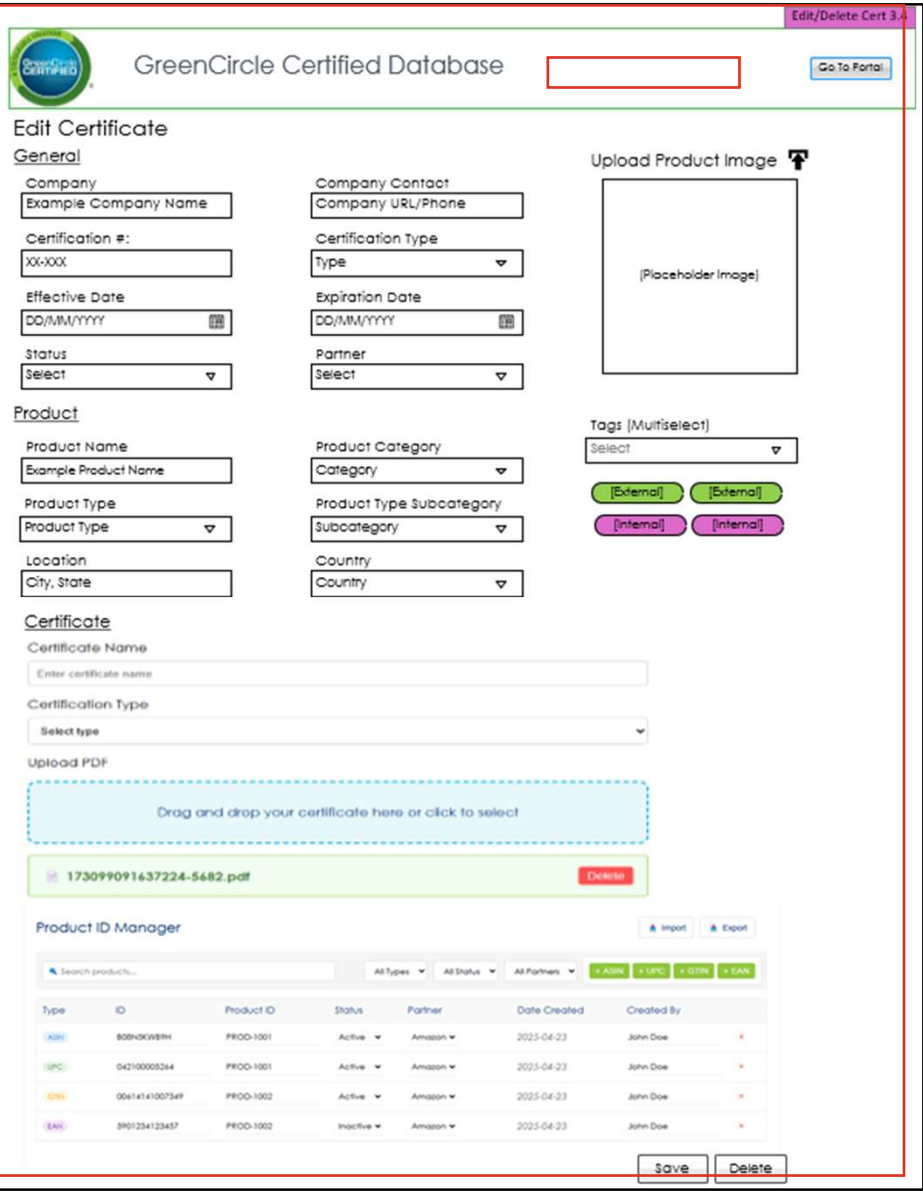

Isn't this same as page 59? See those comments too, is this

Wireframe Notes – 3.3 – Add Certificate (GCC Only)

- This is the Add Certificate View.
- All Internal View Data:: Certificate #, Certification Type, CSF Attributes, Status, Effective Date, Expiration Date, Company, Company Contact Email/URL, Product Name, Product Category, Product Type, Product Type Subcategory, Location, Country, External Tag, Internal Tag, ASIN, UPC, GTIN, EAN, Certificate Upload, Record Created Date, **Last Edited By,** Record Last Updated Date, Preview
- Ability to Add a Certificate with all Required Data Fields.
- **Which data fields are required to Add a Cert? Which data fields will be generated by the system after adding?
- Ability to upload an image to use for the Product.
- **Should we incorporate Product Image?

Wireframe Notes – 3.4 – Edit/Delete Certificate (GCC Only)

- Admin can add new product categories.
- Certification # will be auto generated by the database and created on the save
- **New Field:** Partner: Amazon/Wayfair - required.
- **New Field:** Status Type: to signify if a client doesn't want to move forward.
- This is the Edit/Delete Certificate View.
- All Internal View Data: Certificate #, Certification Type, CSF Attributes, Status, Effective Date, Expiration Date, Company, Company Contact Email/URL, Product Name, Product Category, Product Type, Product Type Subcategory, Location, Country, External Tag, Internal Tag, ASIN, UPC, GTIN, EAN, Certificate Upload, Record Created Date, Last Edited By, Record Last Updated Date, Preview
- Ability to Edit/Delete the selected Certificate information and file.

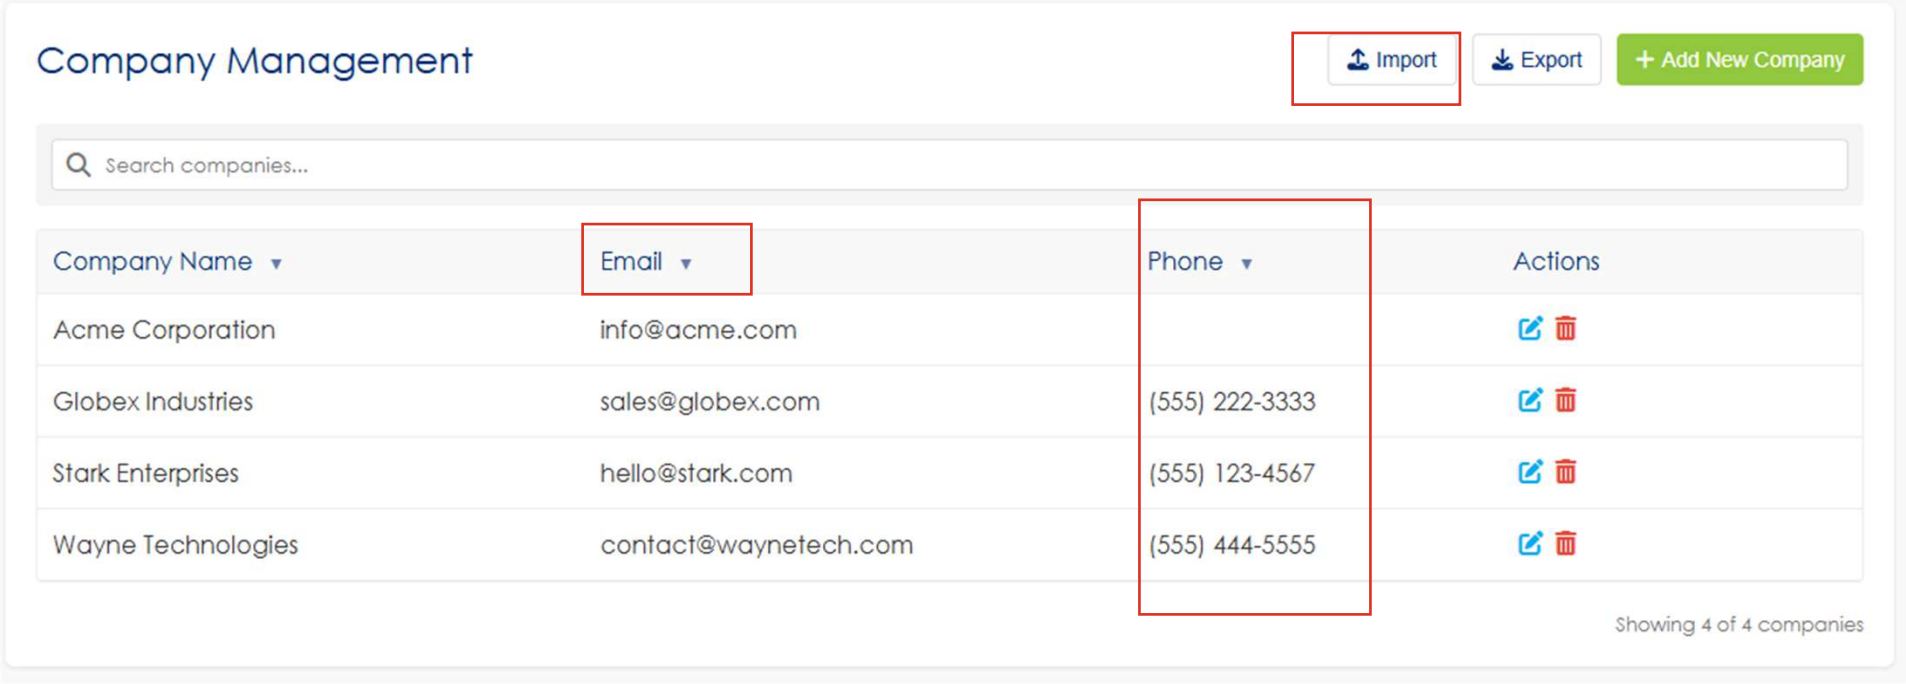

Wireframe Notes – 5.0 – Reference Management

- Navigation only, not a page.

DISCUSS: Does this information populate under the cert if it's listed here? If we aren't using this to autopopulate that then we don't need anything but Company Name here

Wireframe Notes – 5.1 – Company

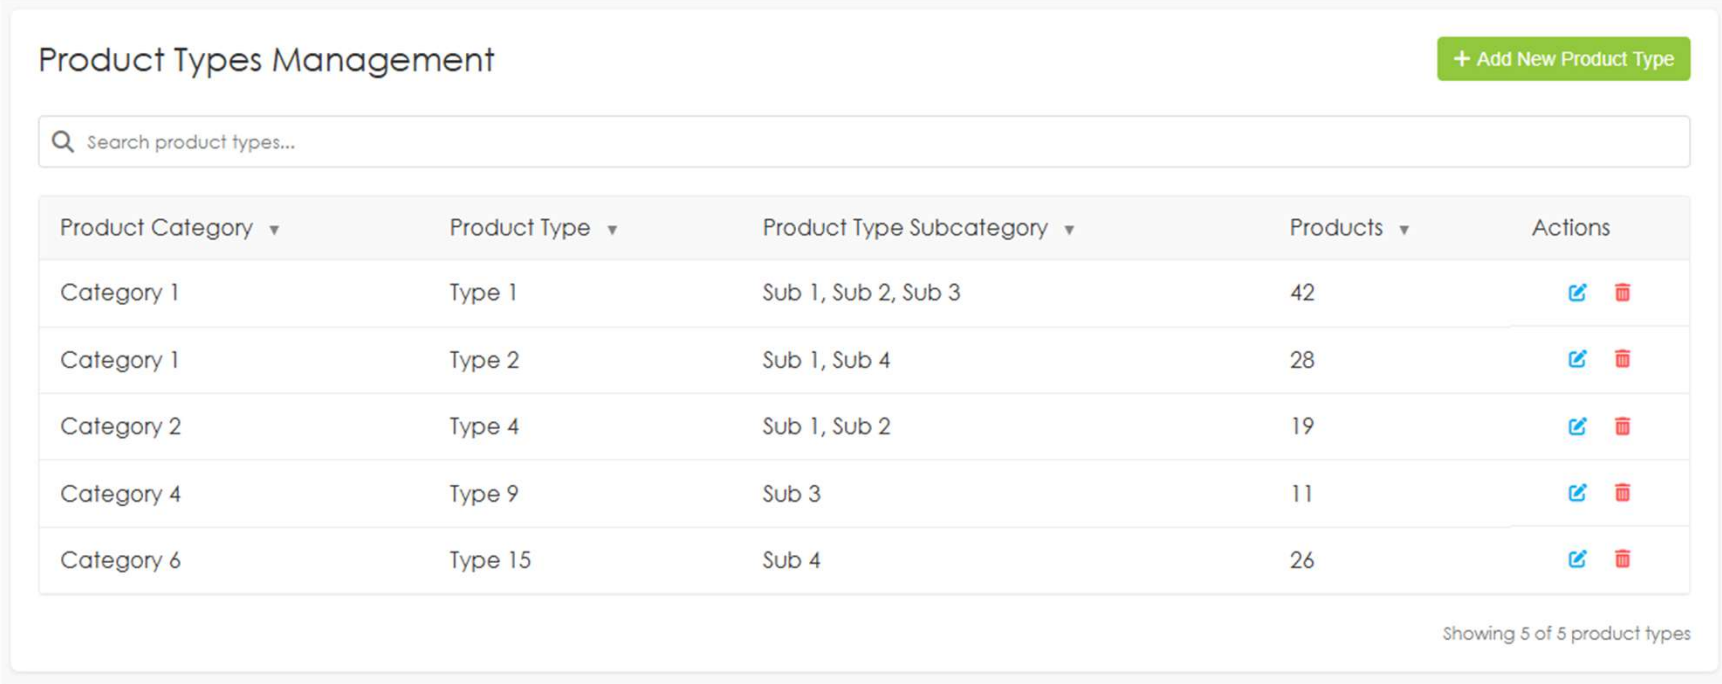

- Company Management screen:
  - Includes: Company Name, Company Contact
  - Separate out Contact Email and Phone into two separate fields.

REVIEW: This should not be for Product Types. 5.2 is supposed to be to manage full list of Products (page 59)

Product Type editing is only available to Admin and should be under 7.4

Wireframe Notes – 5.2 – Product Types

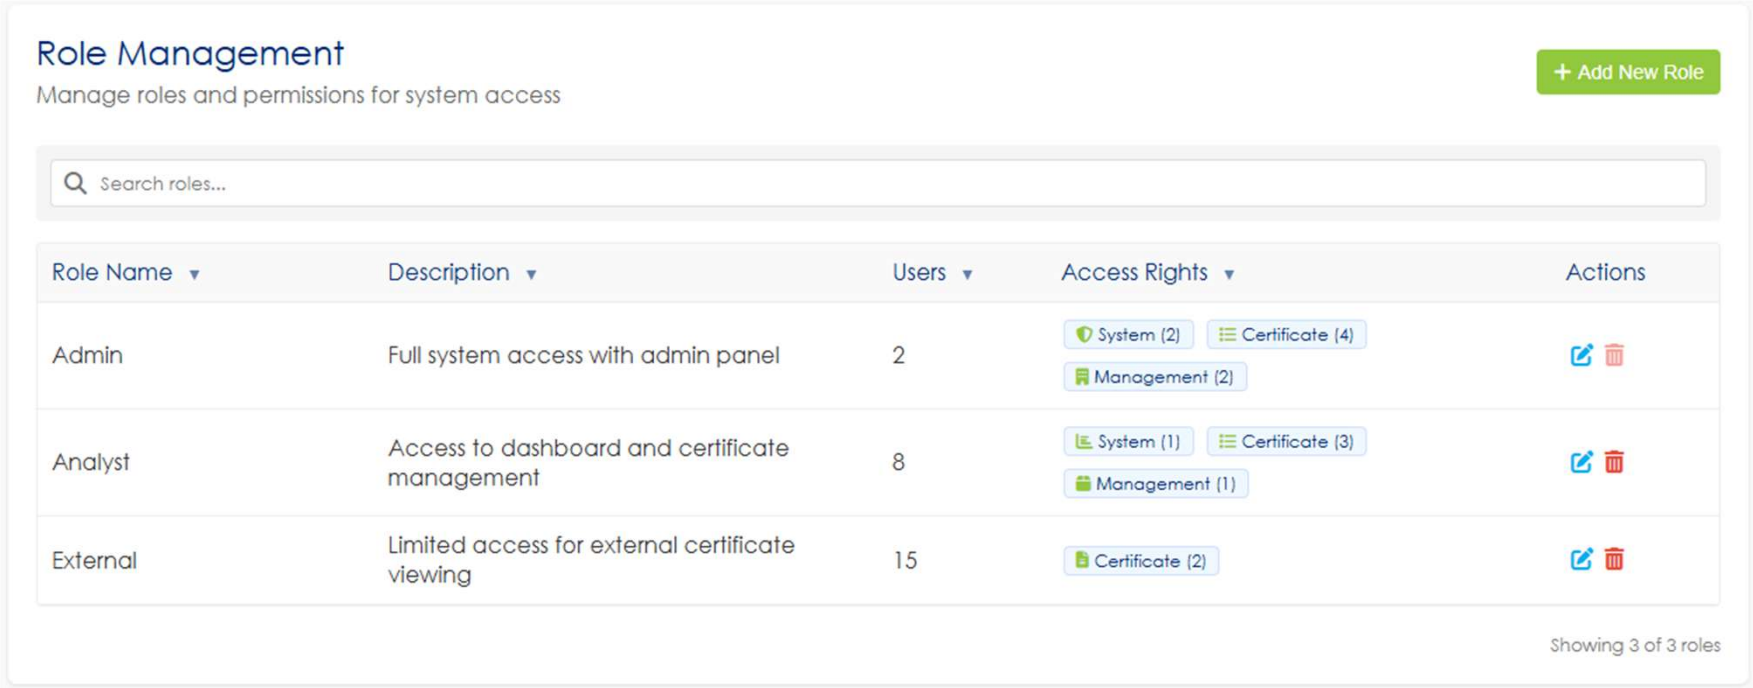

- This is the Product Types Admin View.
- Ability to Add Product Categories, Types, and Type Subcategories.
- Ability to Edit/Delete Selected Line Item.
- One-to-Many relationship between Product Categories, Types, and Type Subcategories.

Wireframe Notes – 7.0 – Administration

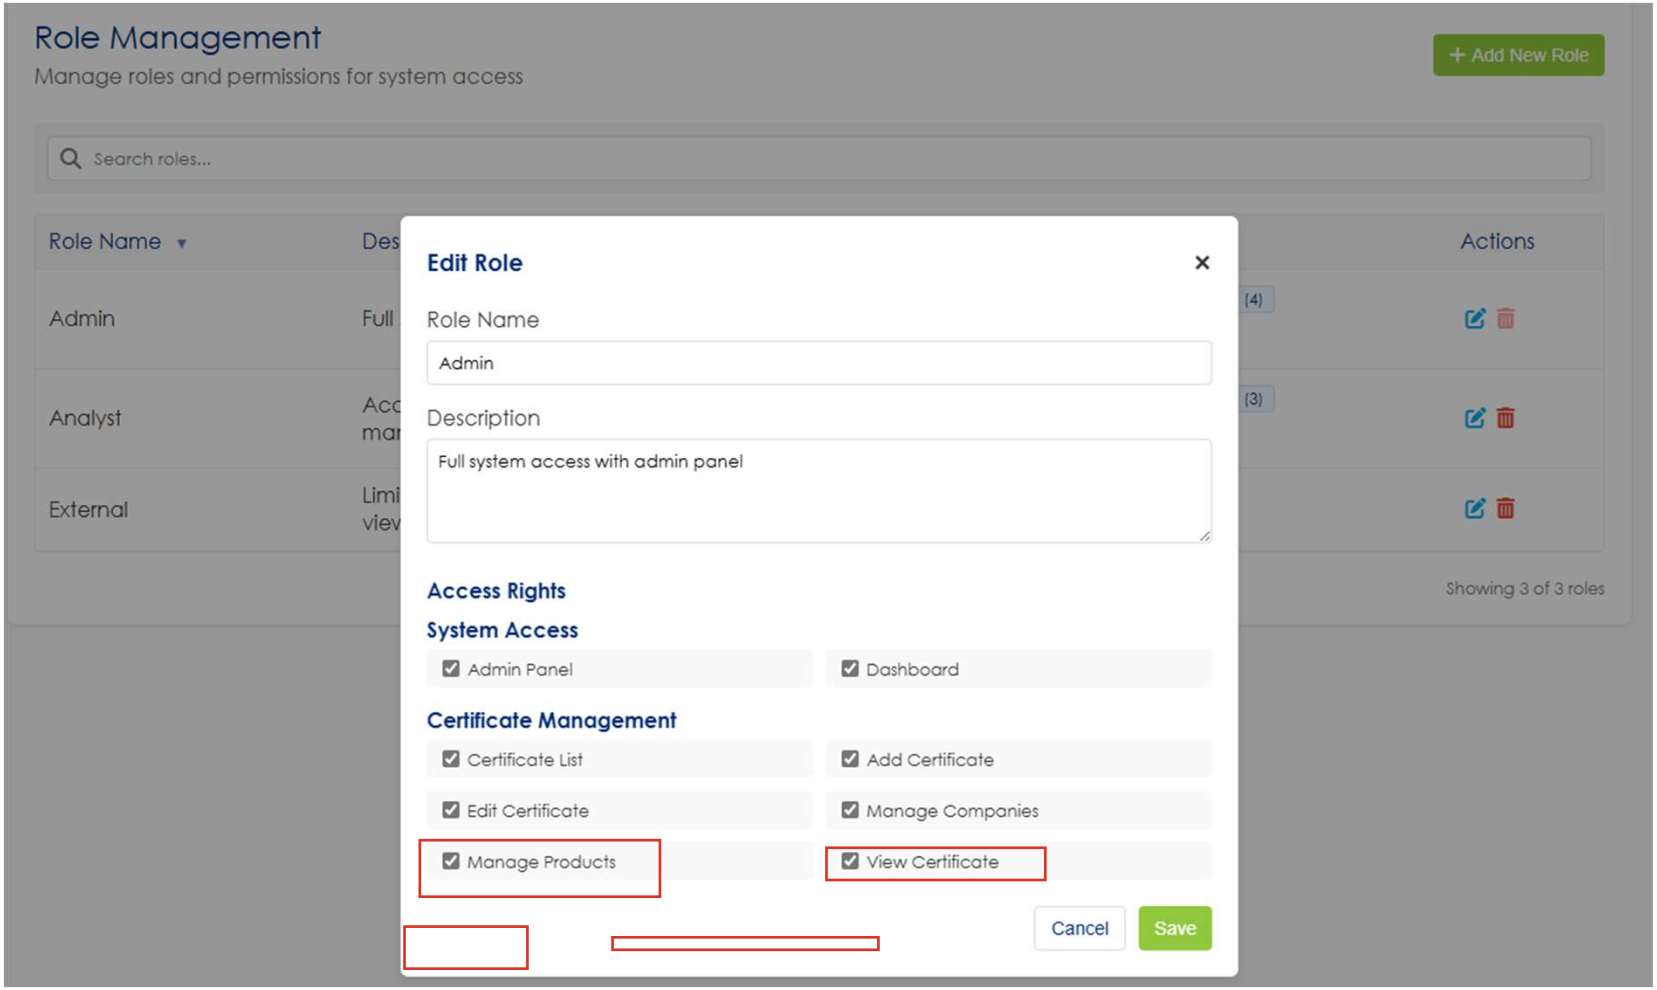

- Admin Section does not have a main landing page.

Wireframe Notes – 7.1 – Role Management

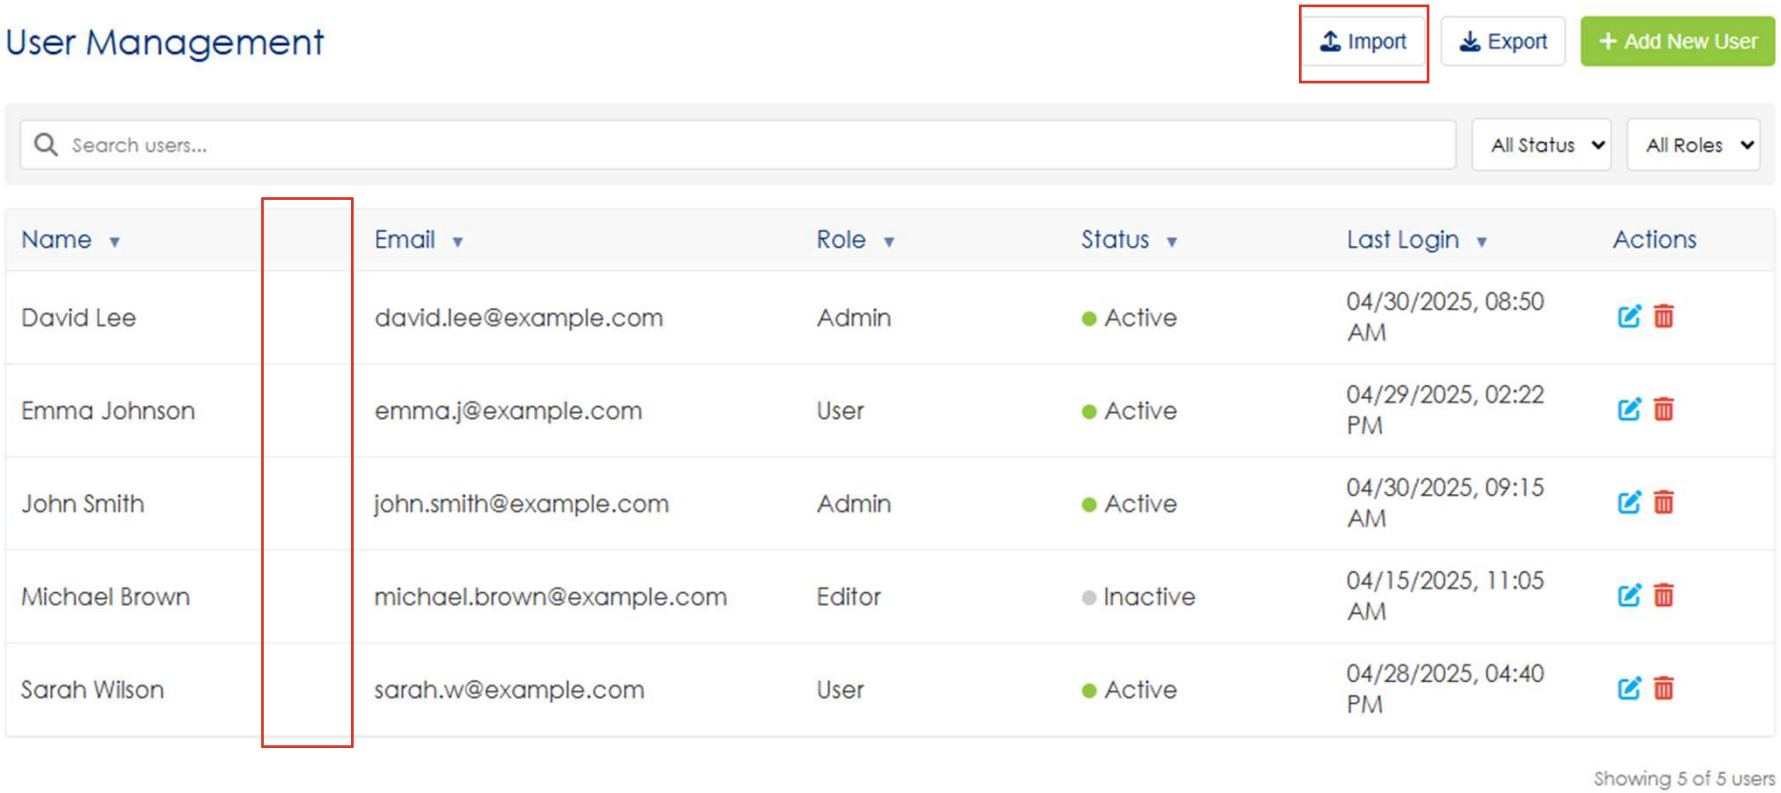

- This is the Role Management (Page Level) Admin View.
- Ability to Manage which roles have access to which pages of the site.
- Ability to cancel changes.
- Admin Users have access to all pages by default.
- Delete disabled for Admin, Admin Panel checkbox disabled for Admin.

Wireframe Notes – 7.1 – Role Management

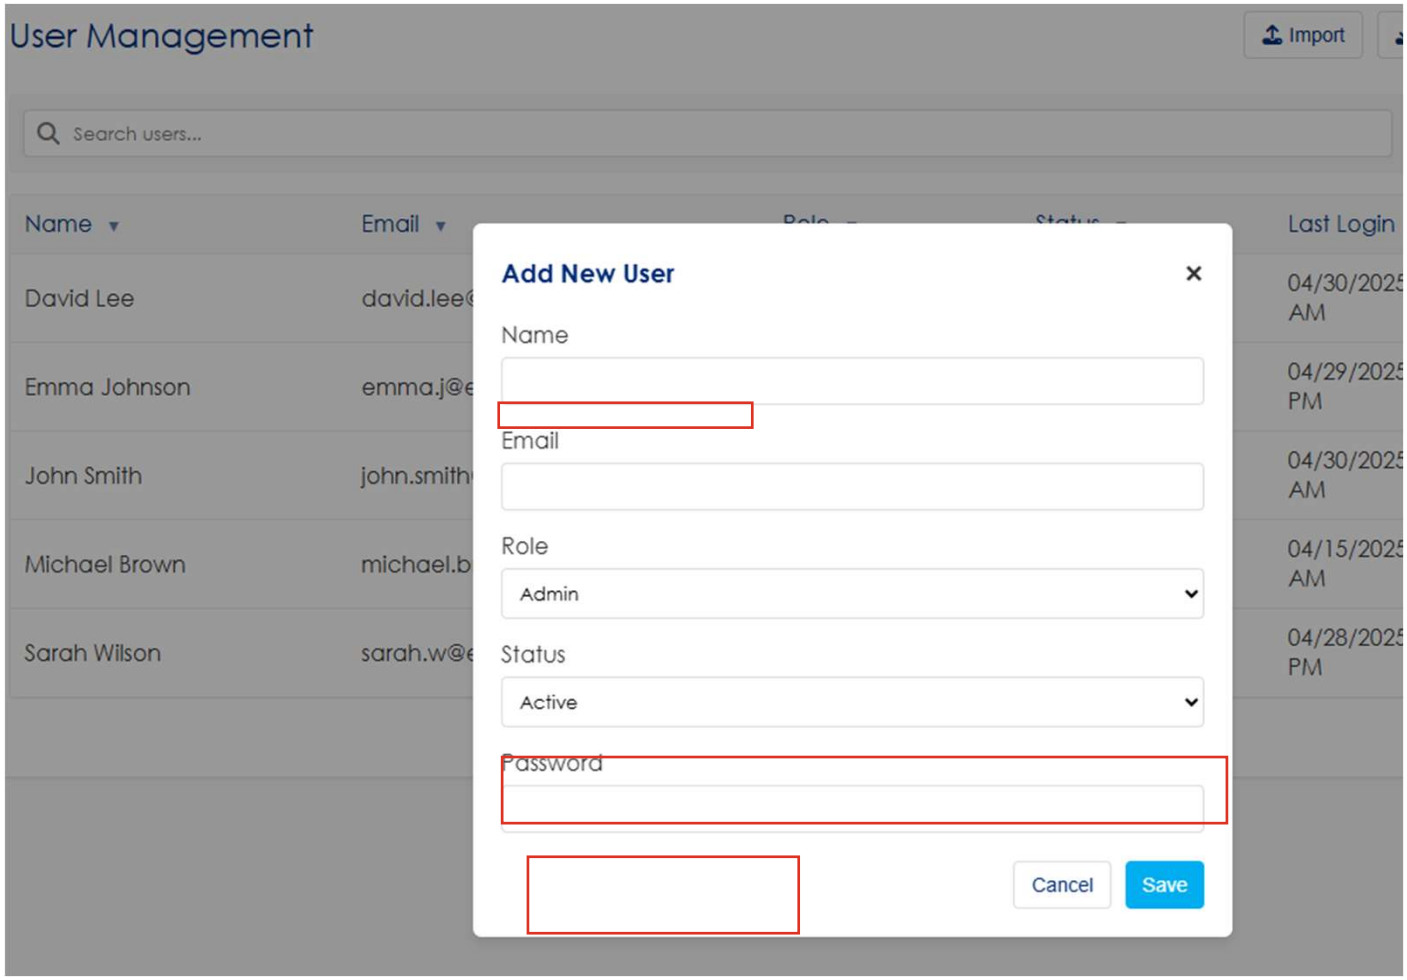

Wireframe Notes – 7.1 – Users

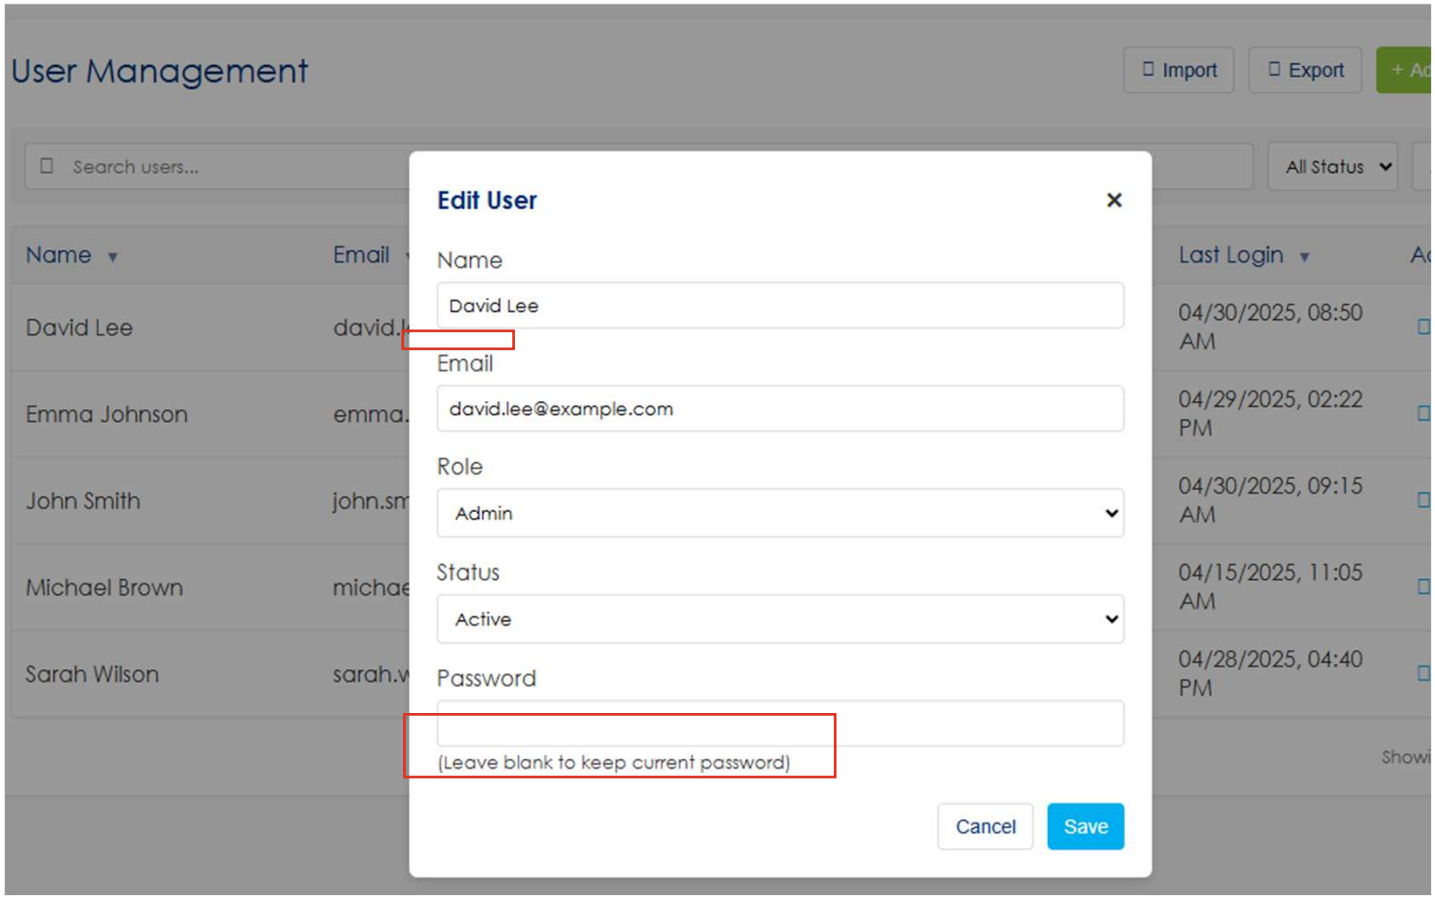

- This is the Users (Roles) Admin View.
- Ability to Add a new User.
- Ability to Edit a selected current User.**
- **Can only Edit one user at a time.
- Ability to navigate between admin screens via left-hand navigation.

Wireframe Notes – 7.1.1 – Add User

- This is the Add User Admin View.
- Ability to Add a new User.
- Ability to Add another User after adding one.
- Ability to Cancel Adding a User.
- Ability to assign user roles

Wireframe Notes – 7.1.2 – Edit/Delete User

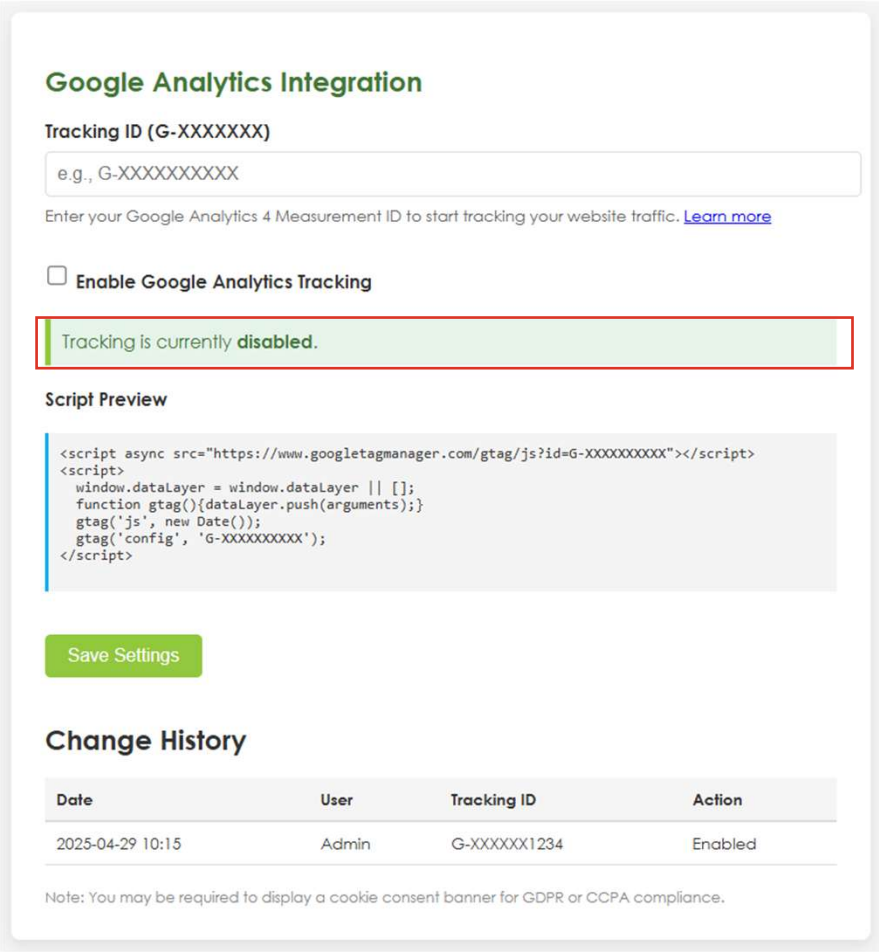

- This is the Edit User Admin View.
- Ability to Edit/Delete a new User.
- Ability to Cancel Edit/Delete a User.
- Ability to assign user roles

Wireframe Notes – 7.2 – Configuration Settings

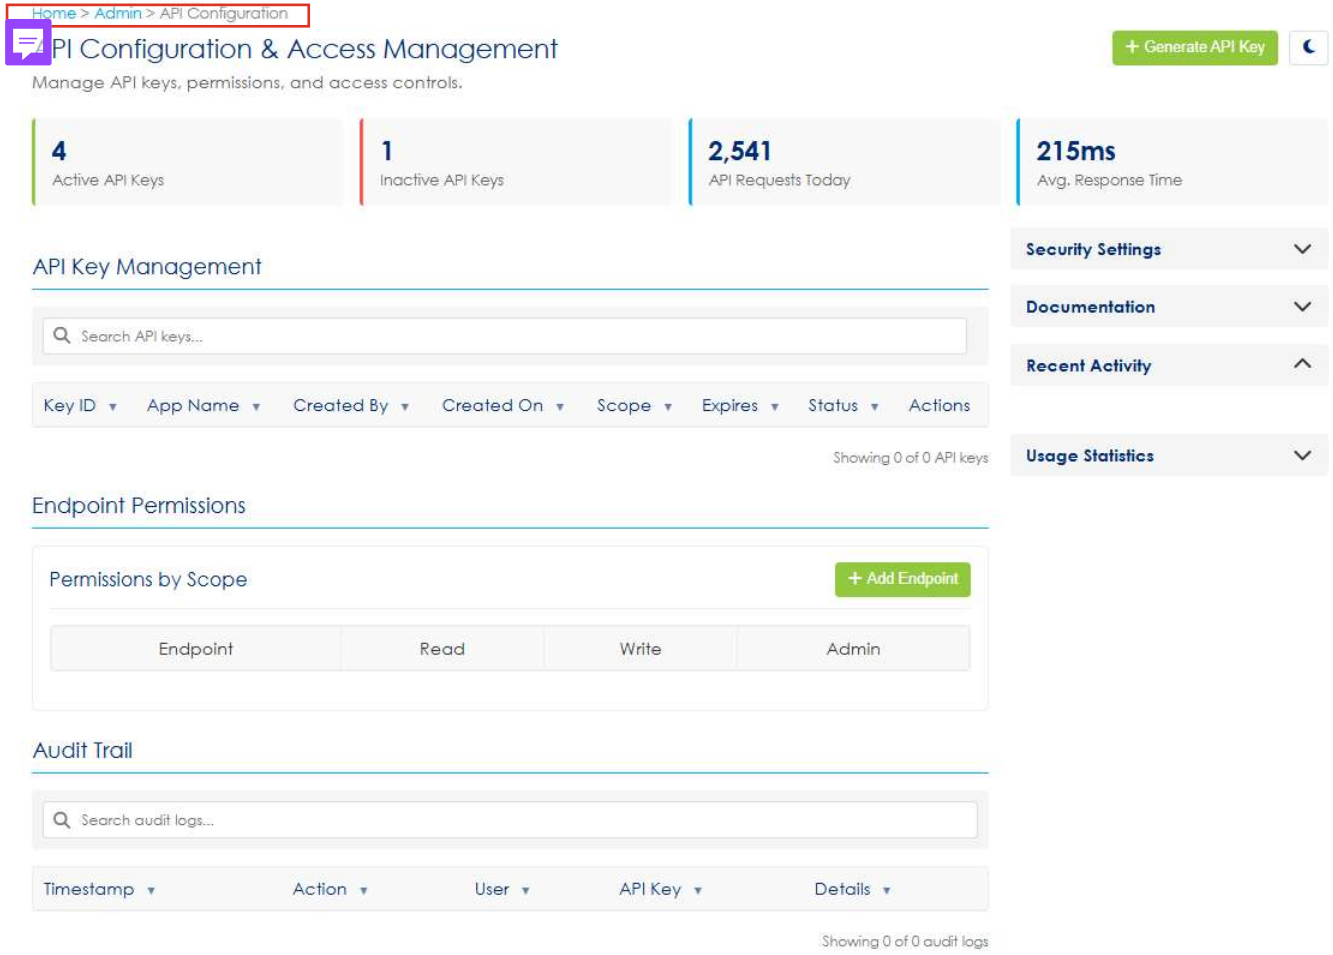

- Navigation only.

Wireframe Notes – 7.2.2 – Google Analytics

- Tracking page. Ability to update Tracking number.
- Ability to view change history.

Wireframe Notes – 7.3 – API Management (Draft)

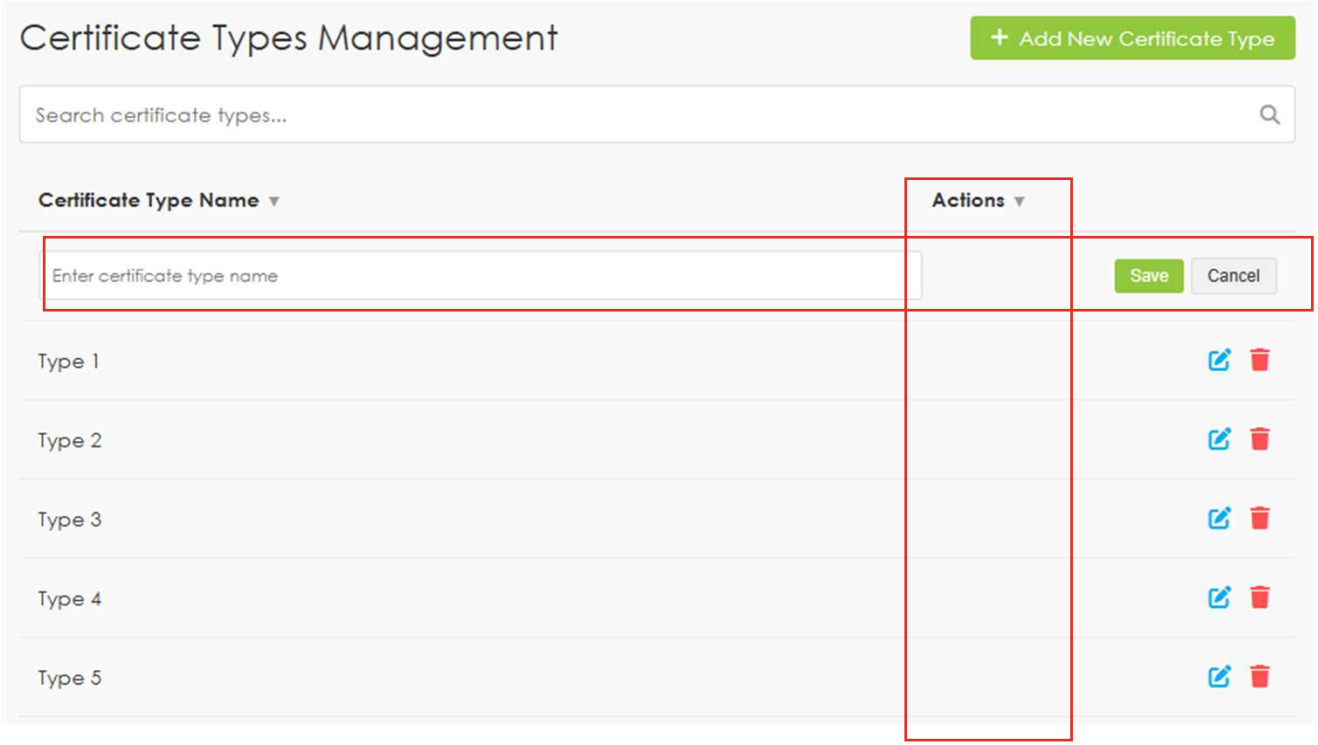

Wireframe Notes – 7.3 – Amazon API Integration

- Sample JSON to send to Amazon

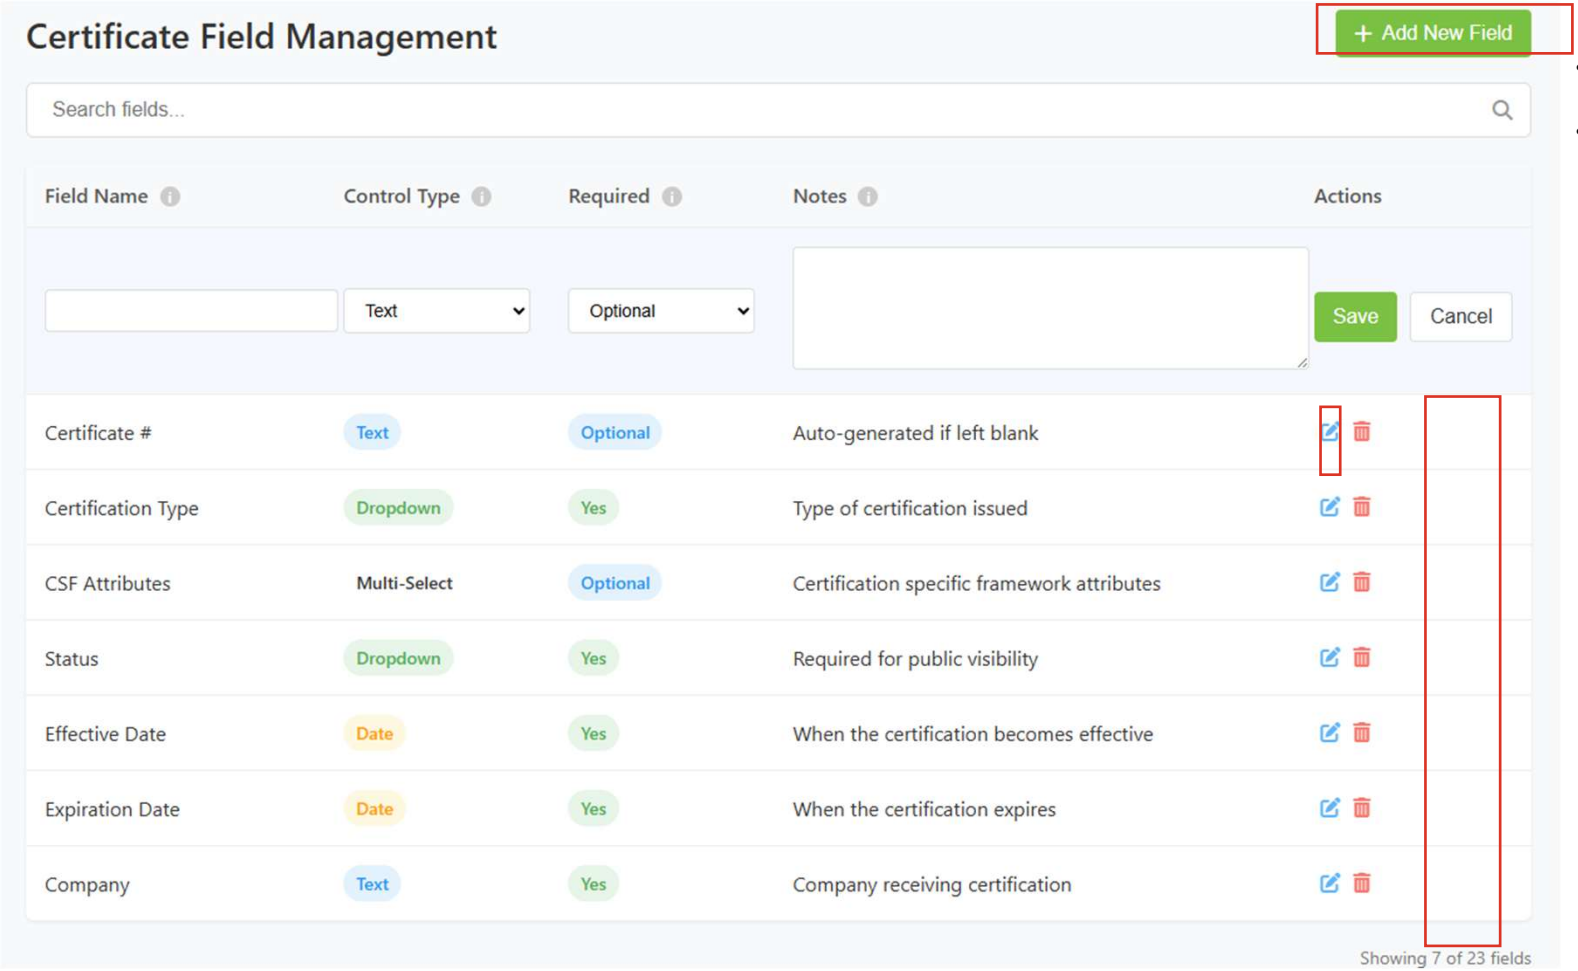

```

Wireframe Notes – 7.4.1 – Add Certificate Types

- This is the Certificate Types Admin View.
- Ability to Add or Edit Certificate Types.

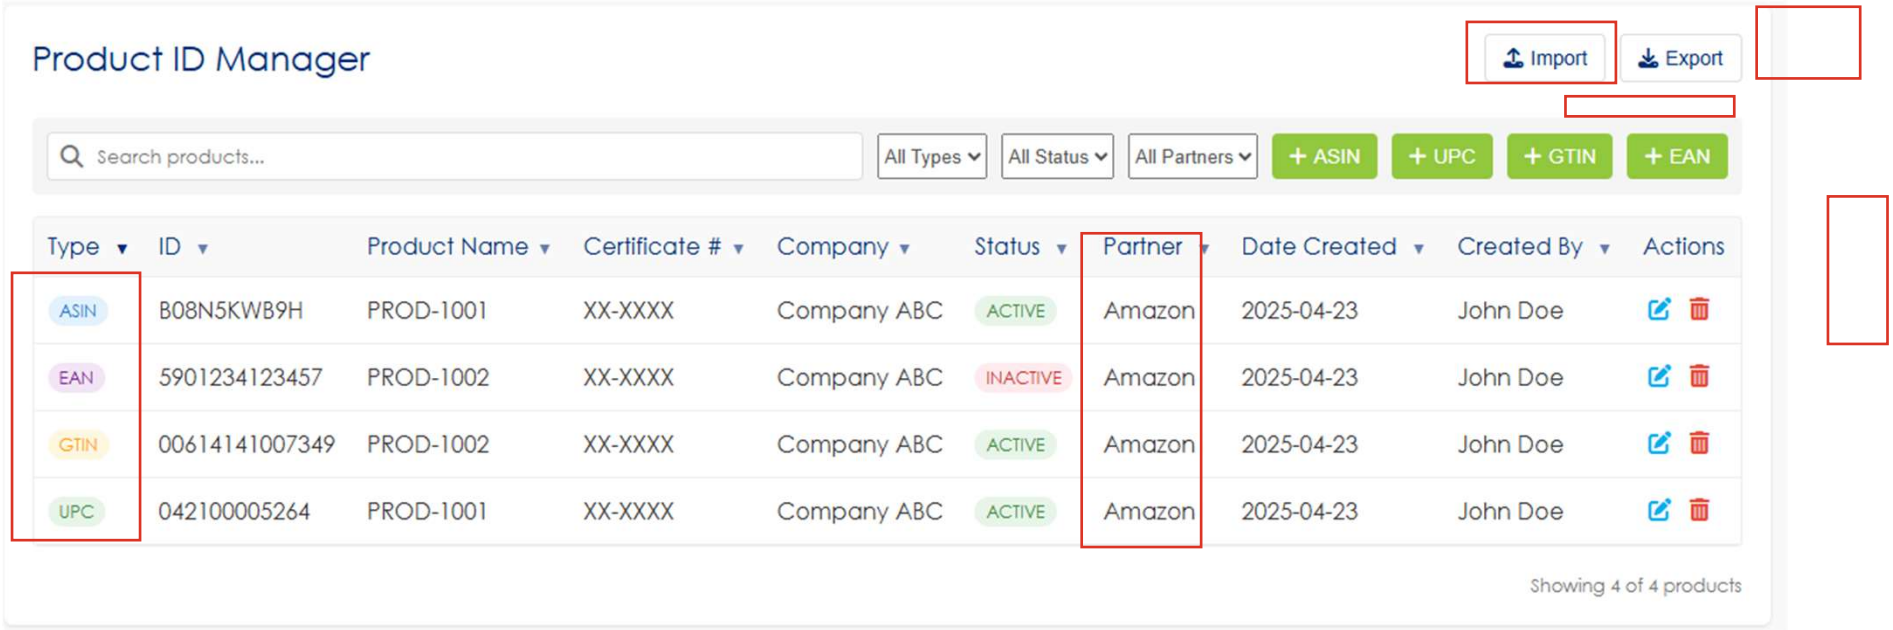

Wireframe Notes – 7.5.1 – Certification Field Management

- This is the Certificate Field Management View.
- Ability to Add or Edit Certificate Fields.

This should be 5.2

Wireframe Notes – 7.4.3 – Product ID Manager

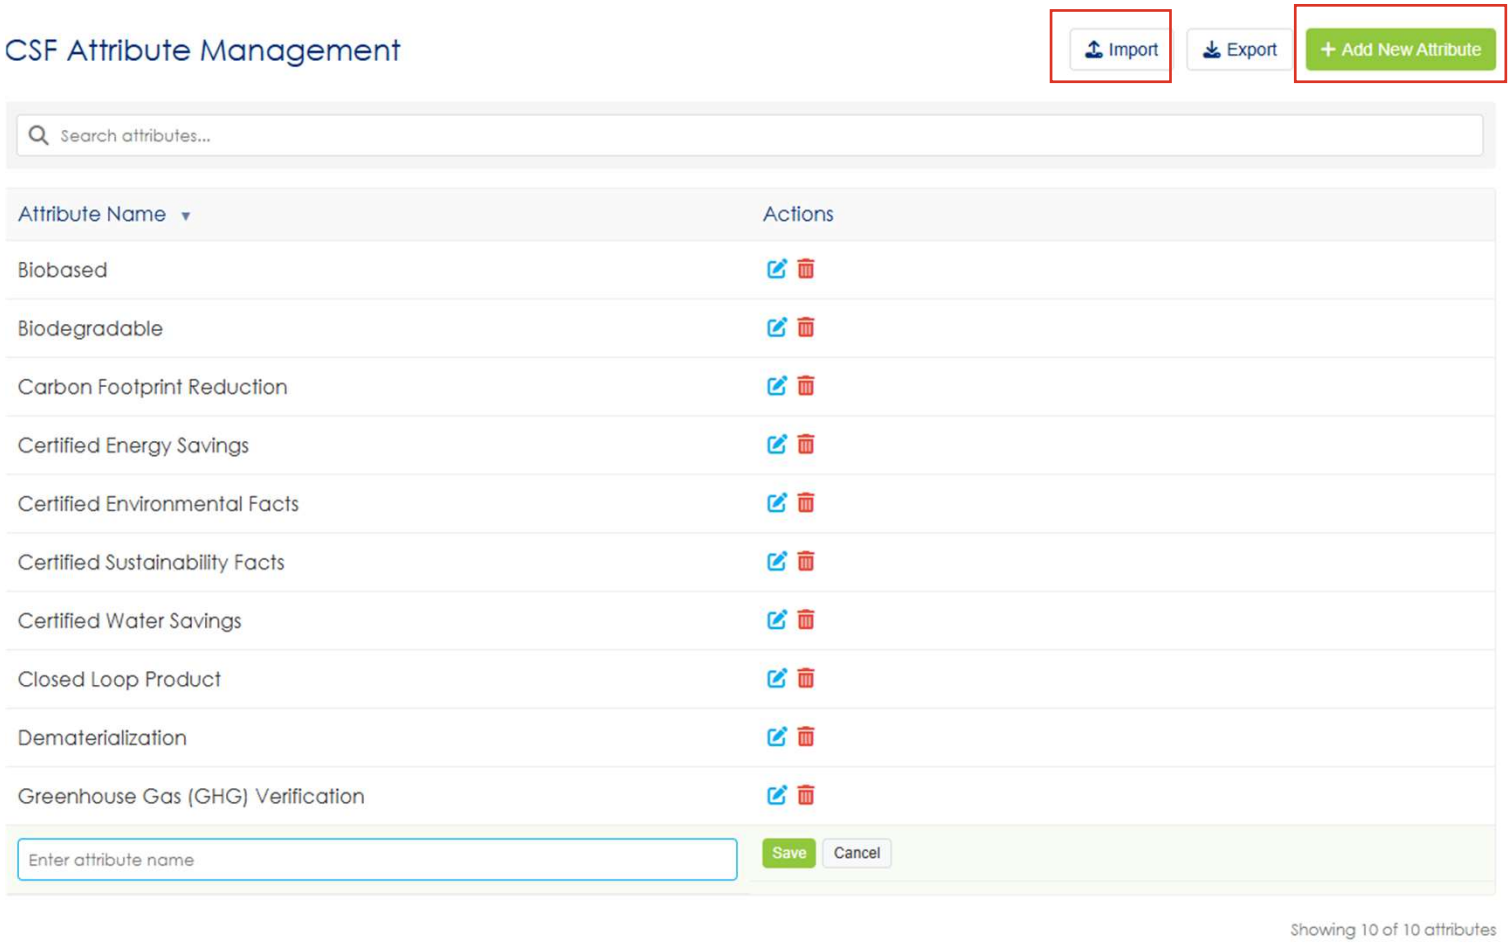

Notes:

- Ability to manage all Products (Admin Only)
- Product identifier management for multiple types: ASIN, UPC, GTIN, and EAN
- Search functionality to quickly find products
- Filtering options by type, status, and partners
- Status tracking (Active/Inactive) for each product ID
- Partner association (currently showing Amazon)
- Creation date and creator tracking
- Import and export capabilities for bulk management
- Adding new identifiers with dedicated buttons for each type
- Linking multiple identifier types to the same product ID (as shown with PROD-1001 and PROD-1002)
- Table view with deletion options (x button) for each entry

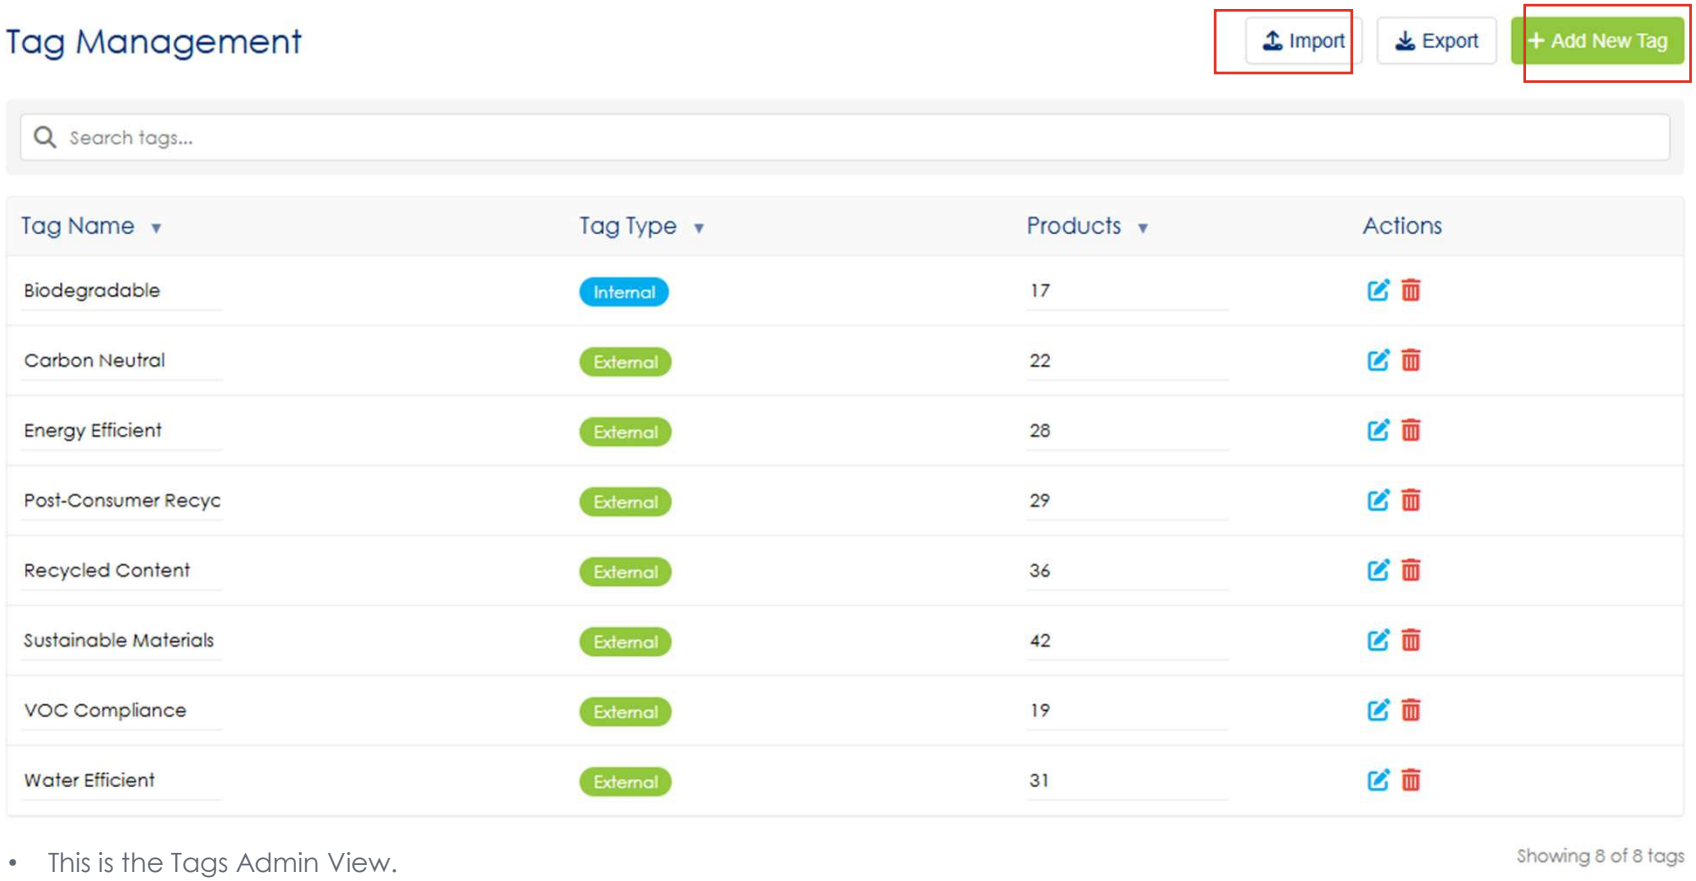

ANUKI CONSULTING

Wireframe Notes – 7.5.2 – CSF Attributes

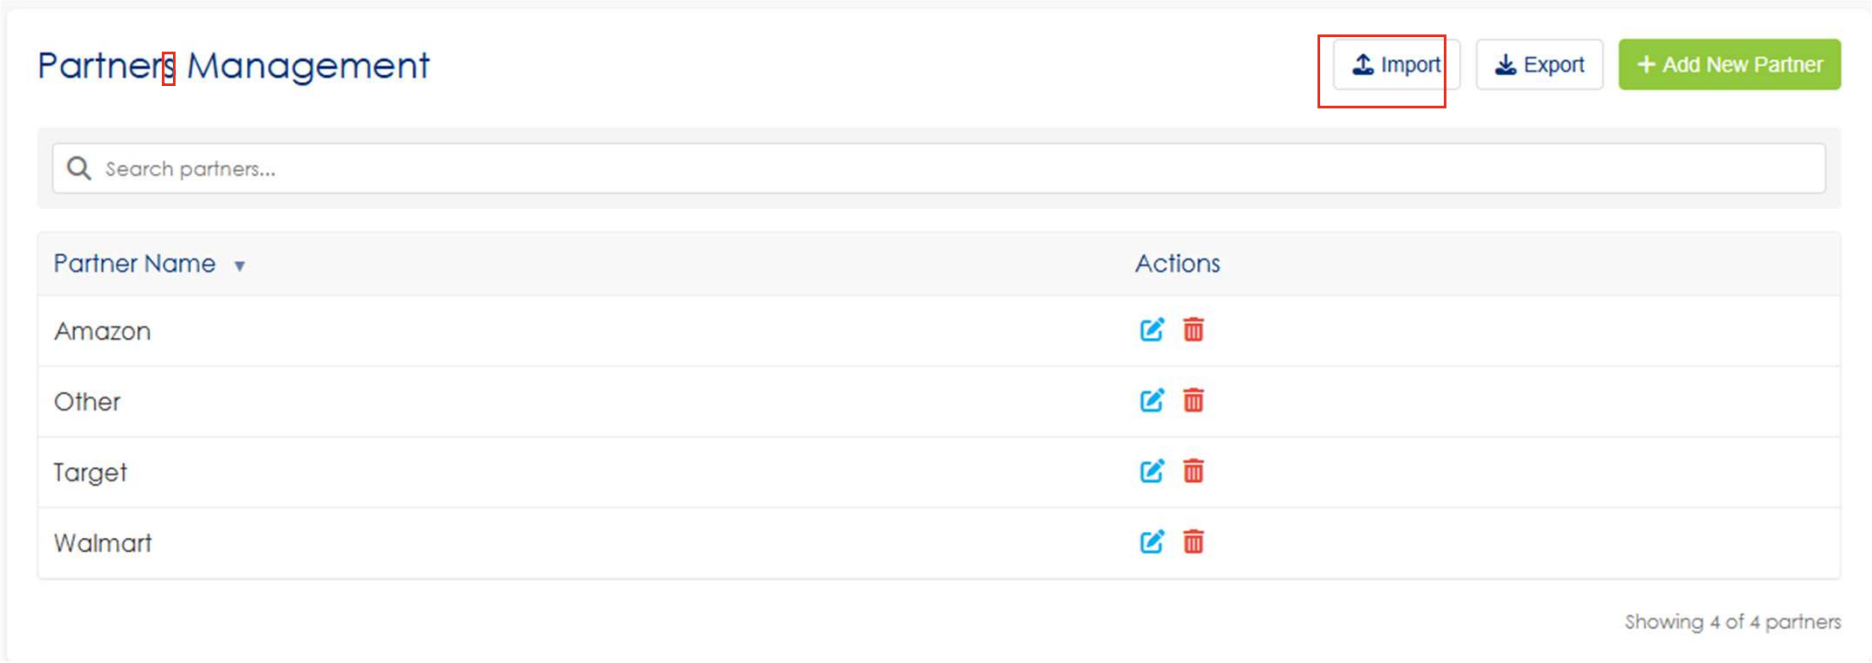

- This is the CSF Attributes View.
- Only Admins can edit this page.
- Ability to Add CSF Attributes
- Ability to Edit/Delete Selected CSF Attributes.

Wireframe Notes – 7.5.3 – Tags

- This is the Tags Admin View.
- Ability to Add, Edit/Delete Selected Tags.
- Ability to sort, export and import tags.

Wireframe Notes – 7.5.4 – Partners

- This is the Partners Admin View.
- Ability to Add new Partners.
- Ability to Edit/Delete Selected Partners.
- Ability to sort, export and import tags.

Out of Scope – Initial Design Phase

The following items are not included in the initial scope of design and implementation:

1. Notifications & Alerts
    1. The system will not deliver notifications or real-time updates to users during this phase.
2. Undocumented Features
    1. Any user stories or functional requirements not explicitly captured in this document or its supporting requirement documents are out of scope.
3. Clone Feature Enhancements
    1. The "Clone" functionality — including selective field carry-over (e.g., Certification Type, Company, Dates, Location, Country, Company Contact) — will not be implemented in this phase.
4. Bulk Upload for Product Identifiers
    1. Bulk upload capabilities (e.g., ASIN, UPC, GTIN, EAN) via copy/paste or file upload will not be available. The current scope excludes any listing or association management of product identifiers under certifications.
5. Product-Specific Fields
    1. Additional data fields specific to products associated with ASINs (or similar identifiers) will not be included, though they may be shown in wireframes for planning purposes.
6. Customized Reporting Widgets
    1. Customizable dashboard widgets, including the ability for external users to view data specific to their profiles or needs, are out of scope.
7. Third-Party API Integrations
    1. Integrations with third-party vendors or clients beyond those explicitly defined are excluded from the initial scope.

*Note: This will be amended, based on any changes to the requirements.
